

Seventy Four

The Origin

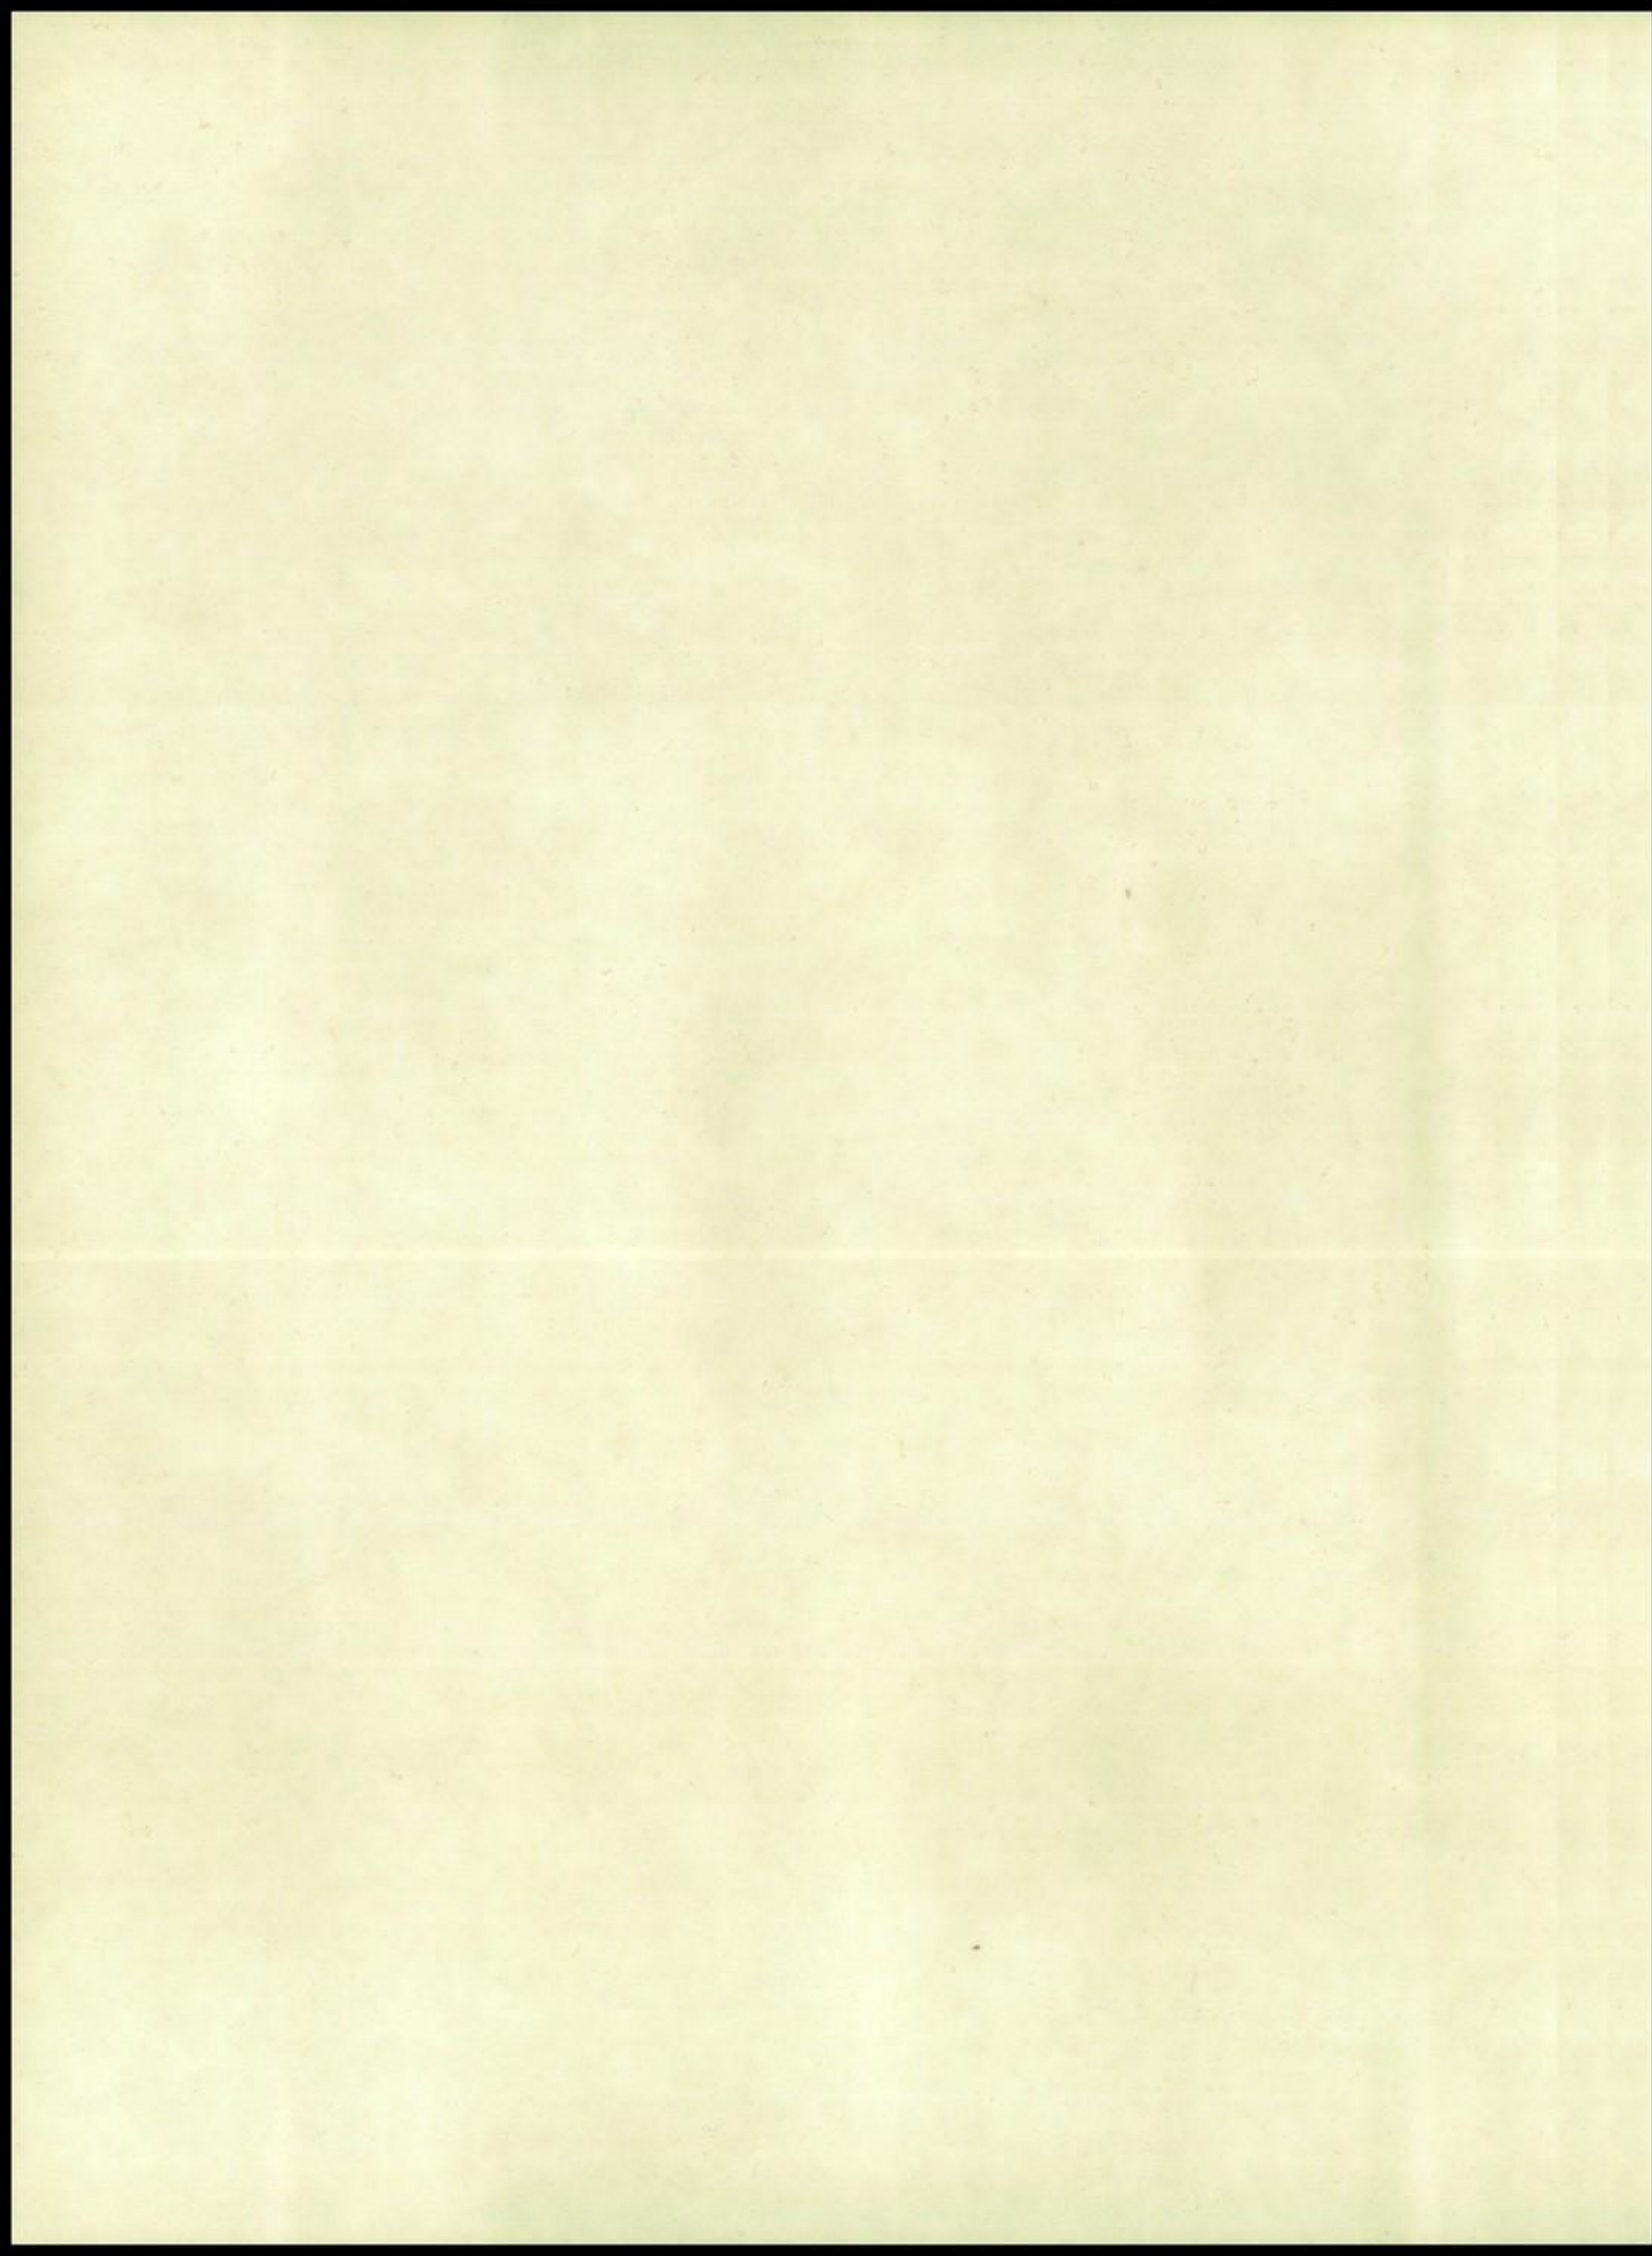

The first part of the paper discusses the importance of understanding the cultural context of the research. It highlights the need for researchers to be sensitive to the values and beliefs of the communities they are studying. This is particularly important in the field of education, where cultural differences can significantly impact learning outcomes. The author argues that a one-size-fits-all approach to education is not only ineffective but also disrespectful to the diverse cultures of our world.

In the second part, the author explores the challenges of conducting research in non-Western contexts. One major challenge is the lack of standardized methodologies. What works in one culture may not work in another. The author provides examples of how researchers have adapted their methods to better fit local contexts, such as using oral traditions instead of written surveys in some African communities.

The third part of the paper focuses on the role of the researcher. It emphasizes that researchers should not be seen as outsiders imposing their agenda on the community. Instead, they should be seen as collaborators who work with the community to address its needs. This approach is more ethical and more likely to lead to meaningful results.

Finally, the author discusses the importance of sharing research findings with the community. Research should not be a purely academic exercise. It should be used to inform policy and practice, to improve the lives of the people being studied. The author concludes by calling for a more inclusive and culturally sensitive approach to research in education.

Life is...

G. Deard

life (lif) pl. *Lives*

(1) a living being (2) the people and activities of a given time, or in a given setting or class. (3) all that is experienced by an individual during his existence . . .

Webster Dictionary

Life is a silhouette. It has an origin and a destiny. It reflects all of its encounters but exists of its own matter.

Life bursts into existence like the dawning of spring and bows graciously out like the crestfallen autumn.

Life is . . .

. . . figuring out why there had to be an energy crisis just when you got access to a set of wheels.

. . . posing for an award picture when someone else won the trophy.

. . . coming down to someone else's level.

. . . Pride and Unity for some things
and
. . . looking at the world through your own point of view for
other things.

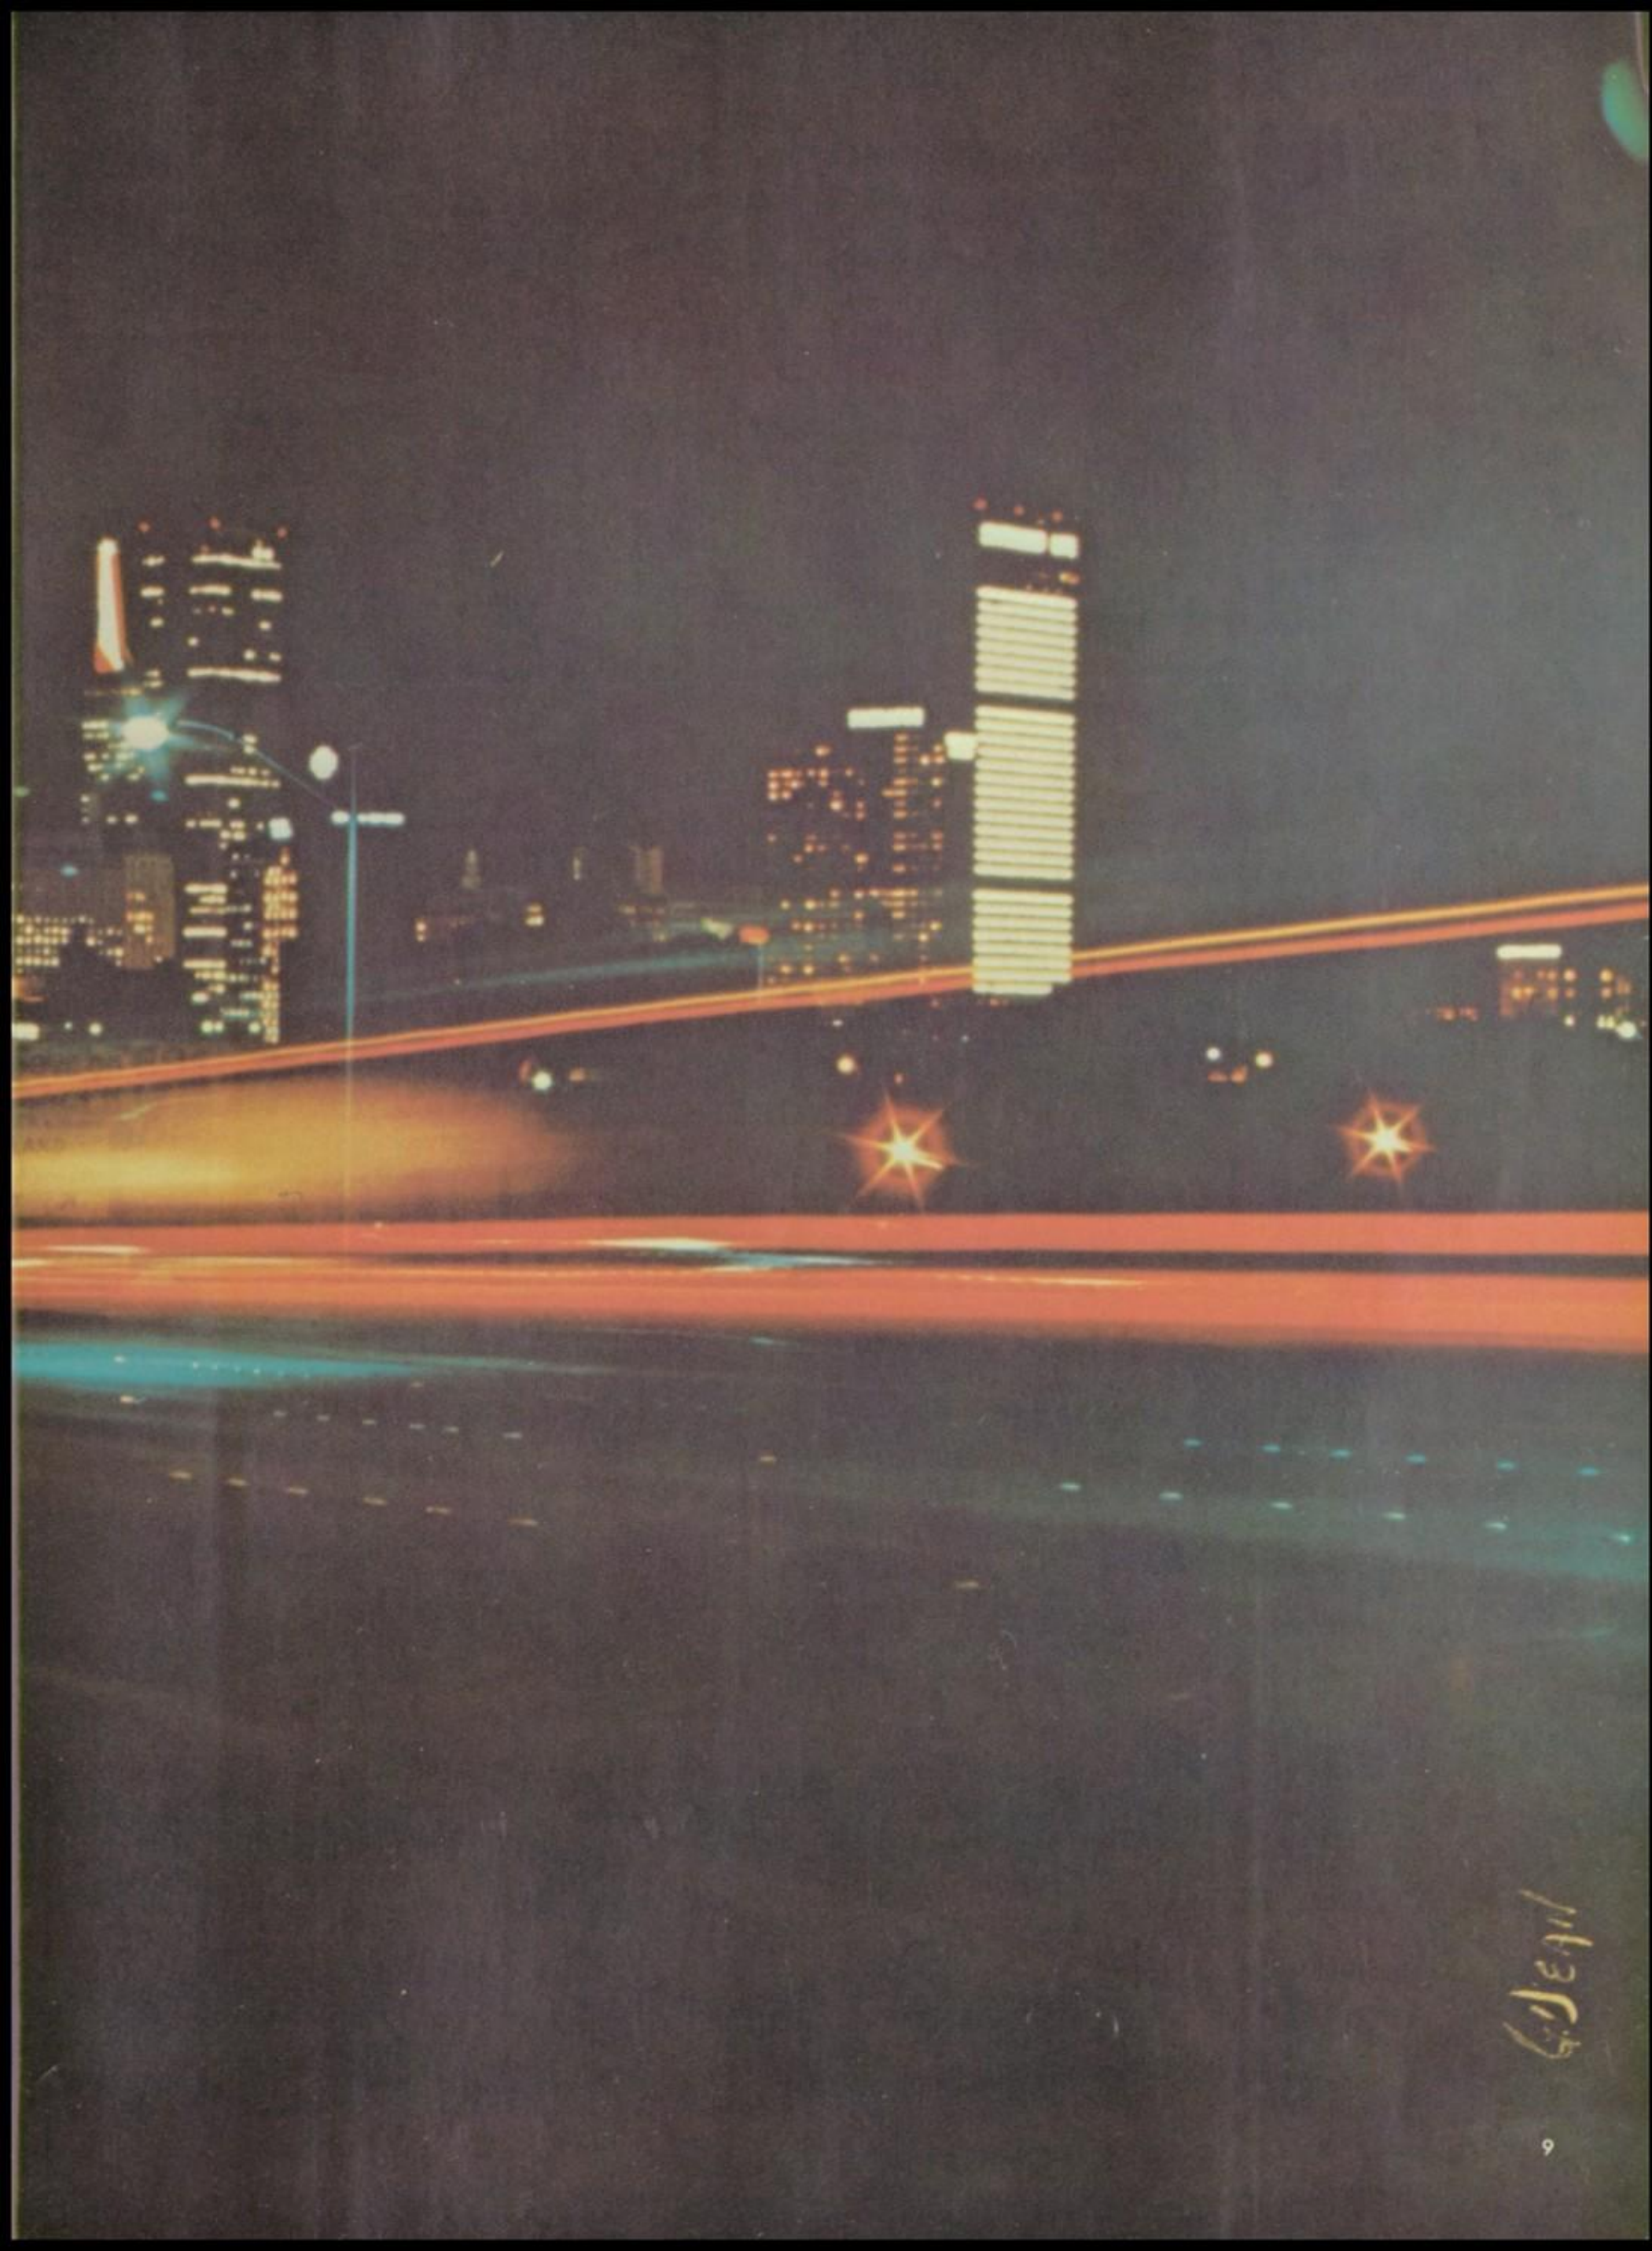

. . . having
peace within if not
without.

. . . trying to escape reality.

Tears and fears and feeling proud,
To say "I love you" right out loud,
Dreams and schemes and circus crowds,
I've looked at life that way.
But now old friends are acting strange,
They shake their heads,
they say I've changed.
But something's lost but something's
gained,
In living ev'ry day.
I've looked at life from both sides now,
From win and lose and still somehow
It's life's illusions I recall;
I really don't know life at all.

— Joni Mitchell

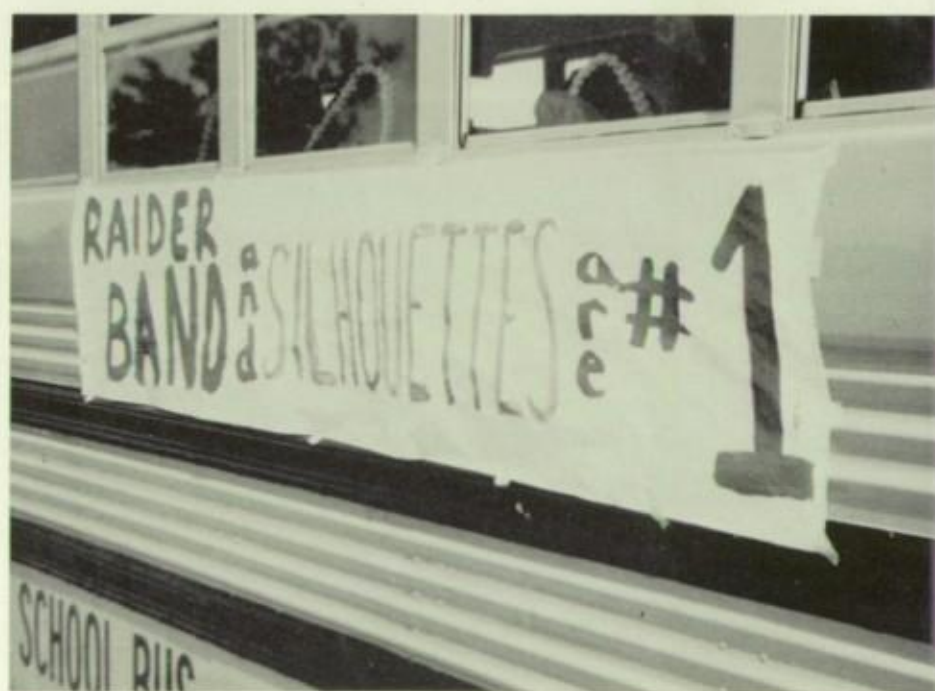

14376
G. J. 141

Life is . . .

. . . being concerned.

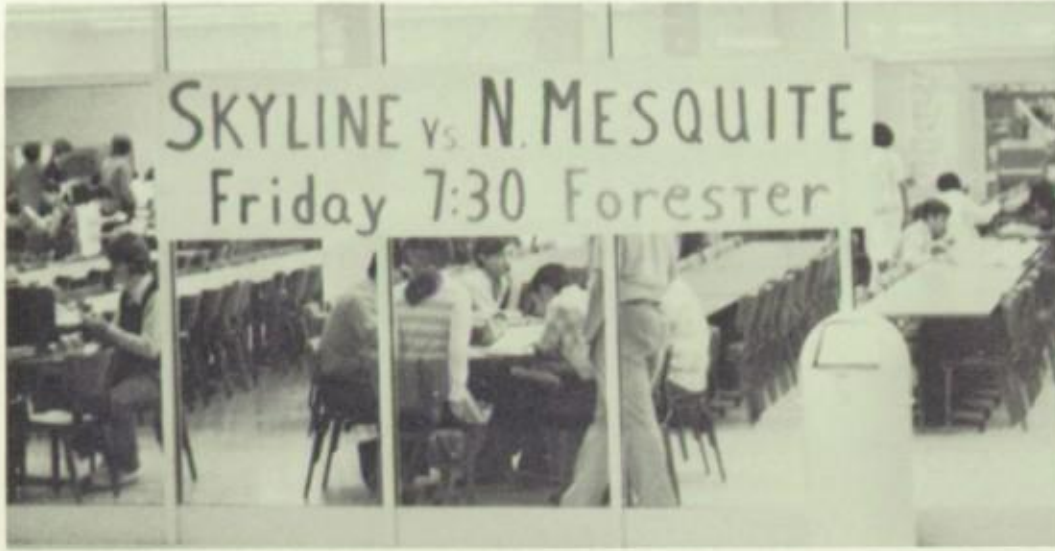

. . . walking to get anywhere.

. . . being #1 and knowing it.

. . . Skyline.

. . . knowing what's
happening

. . . togetherness.

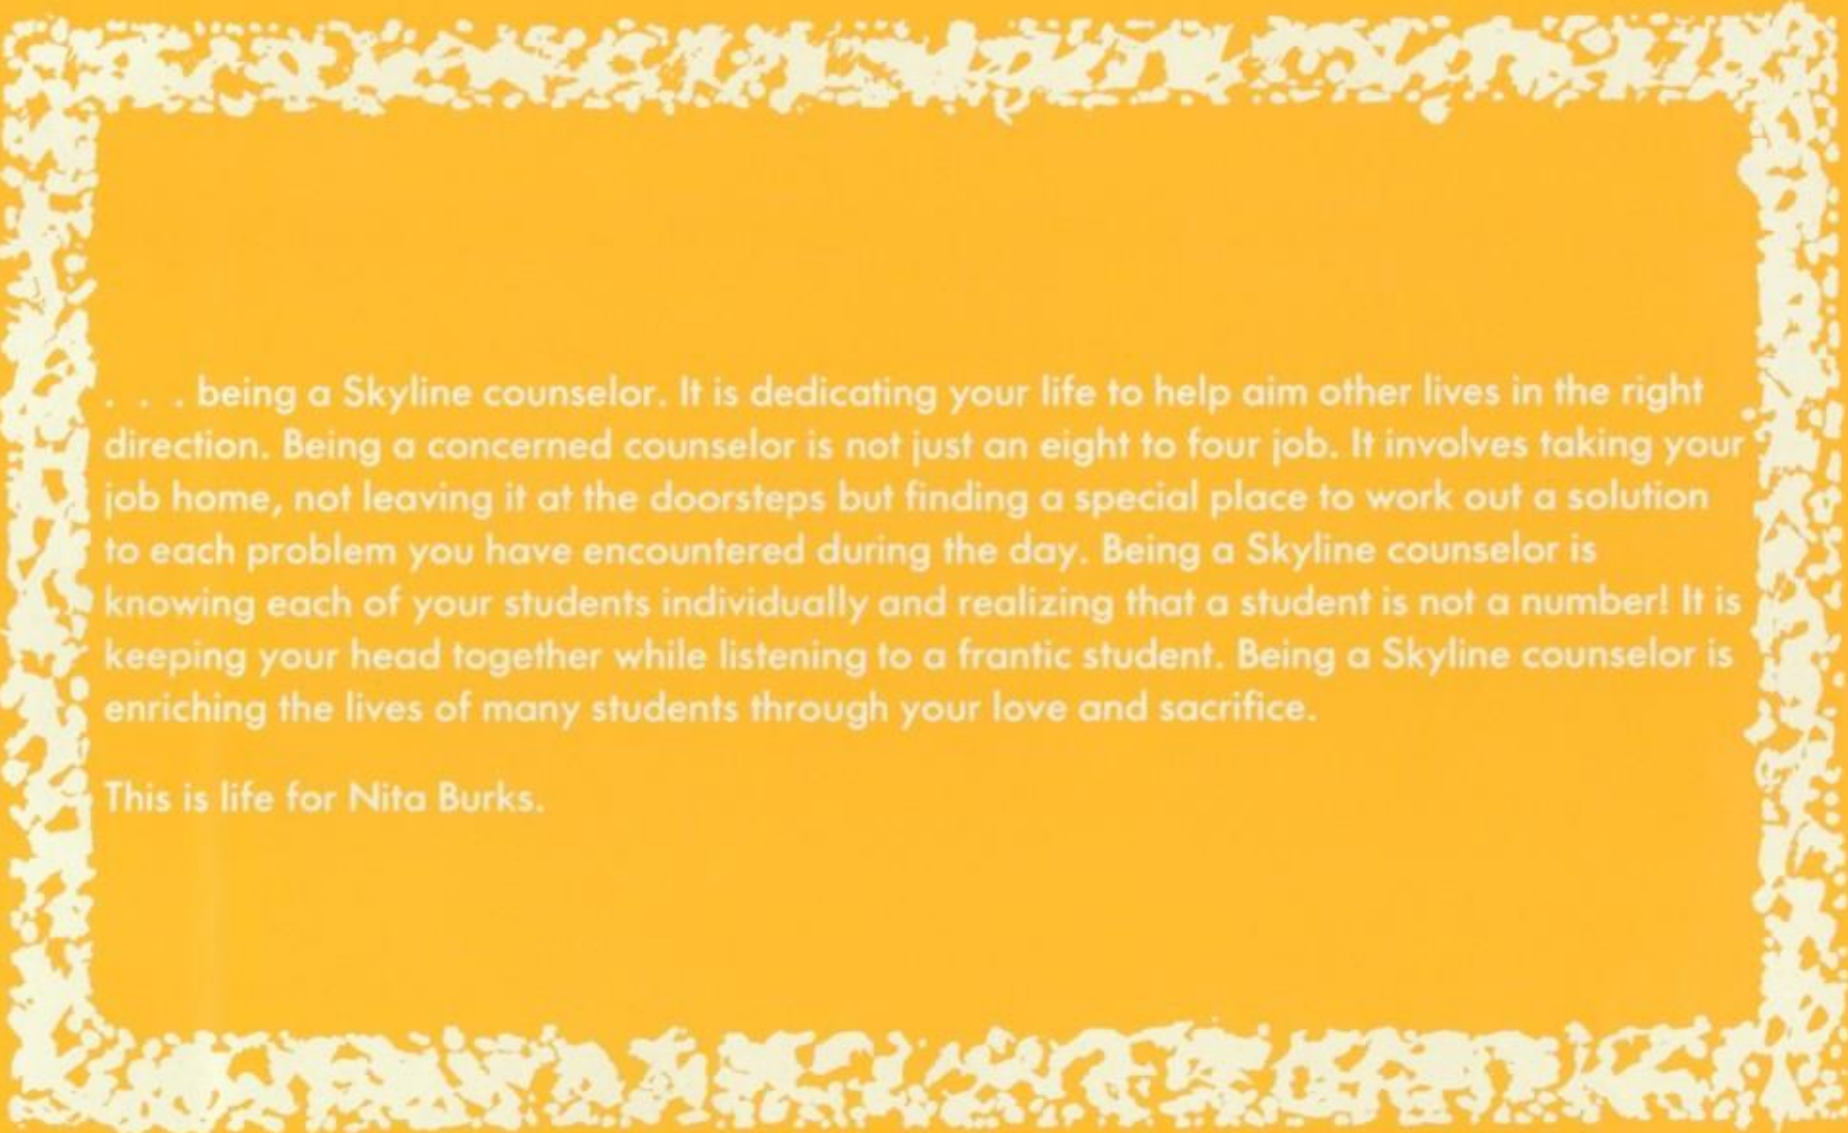

. . . carrying someone else's load.

Mrs. Nita Burks, '74 Dedicatee

Life Is . . .

. . . being a Skyline counselor. It is dedicating your life to help aim other lives in the right direction. Being a concerned counselor is not just an eight to four job. It involves taking your job home, not leaving it at the doorsteps but finding a special place to work out a solution to each problem you have encountered during the day. Being a Skyline counselor is knowing each of your students individually and realizing that a student is not a number! It is keeping your head together while listening to a frantic student. Being a Skyline counselor is enriching the lives of many students through your love and sacrifice.

This is life for Nita Burks.

. . . checking out a new scene.

. . . a tango.

. . . giving a smile.

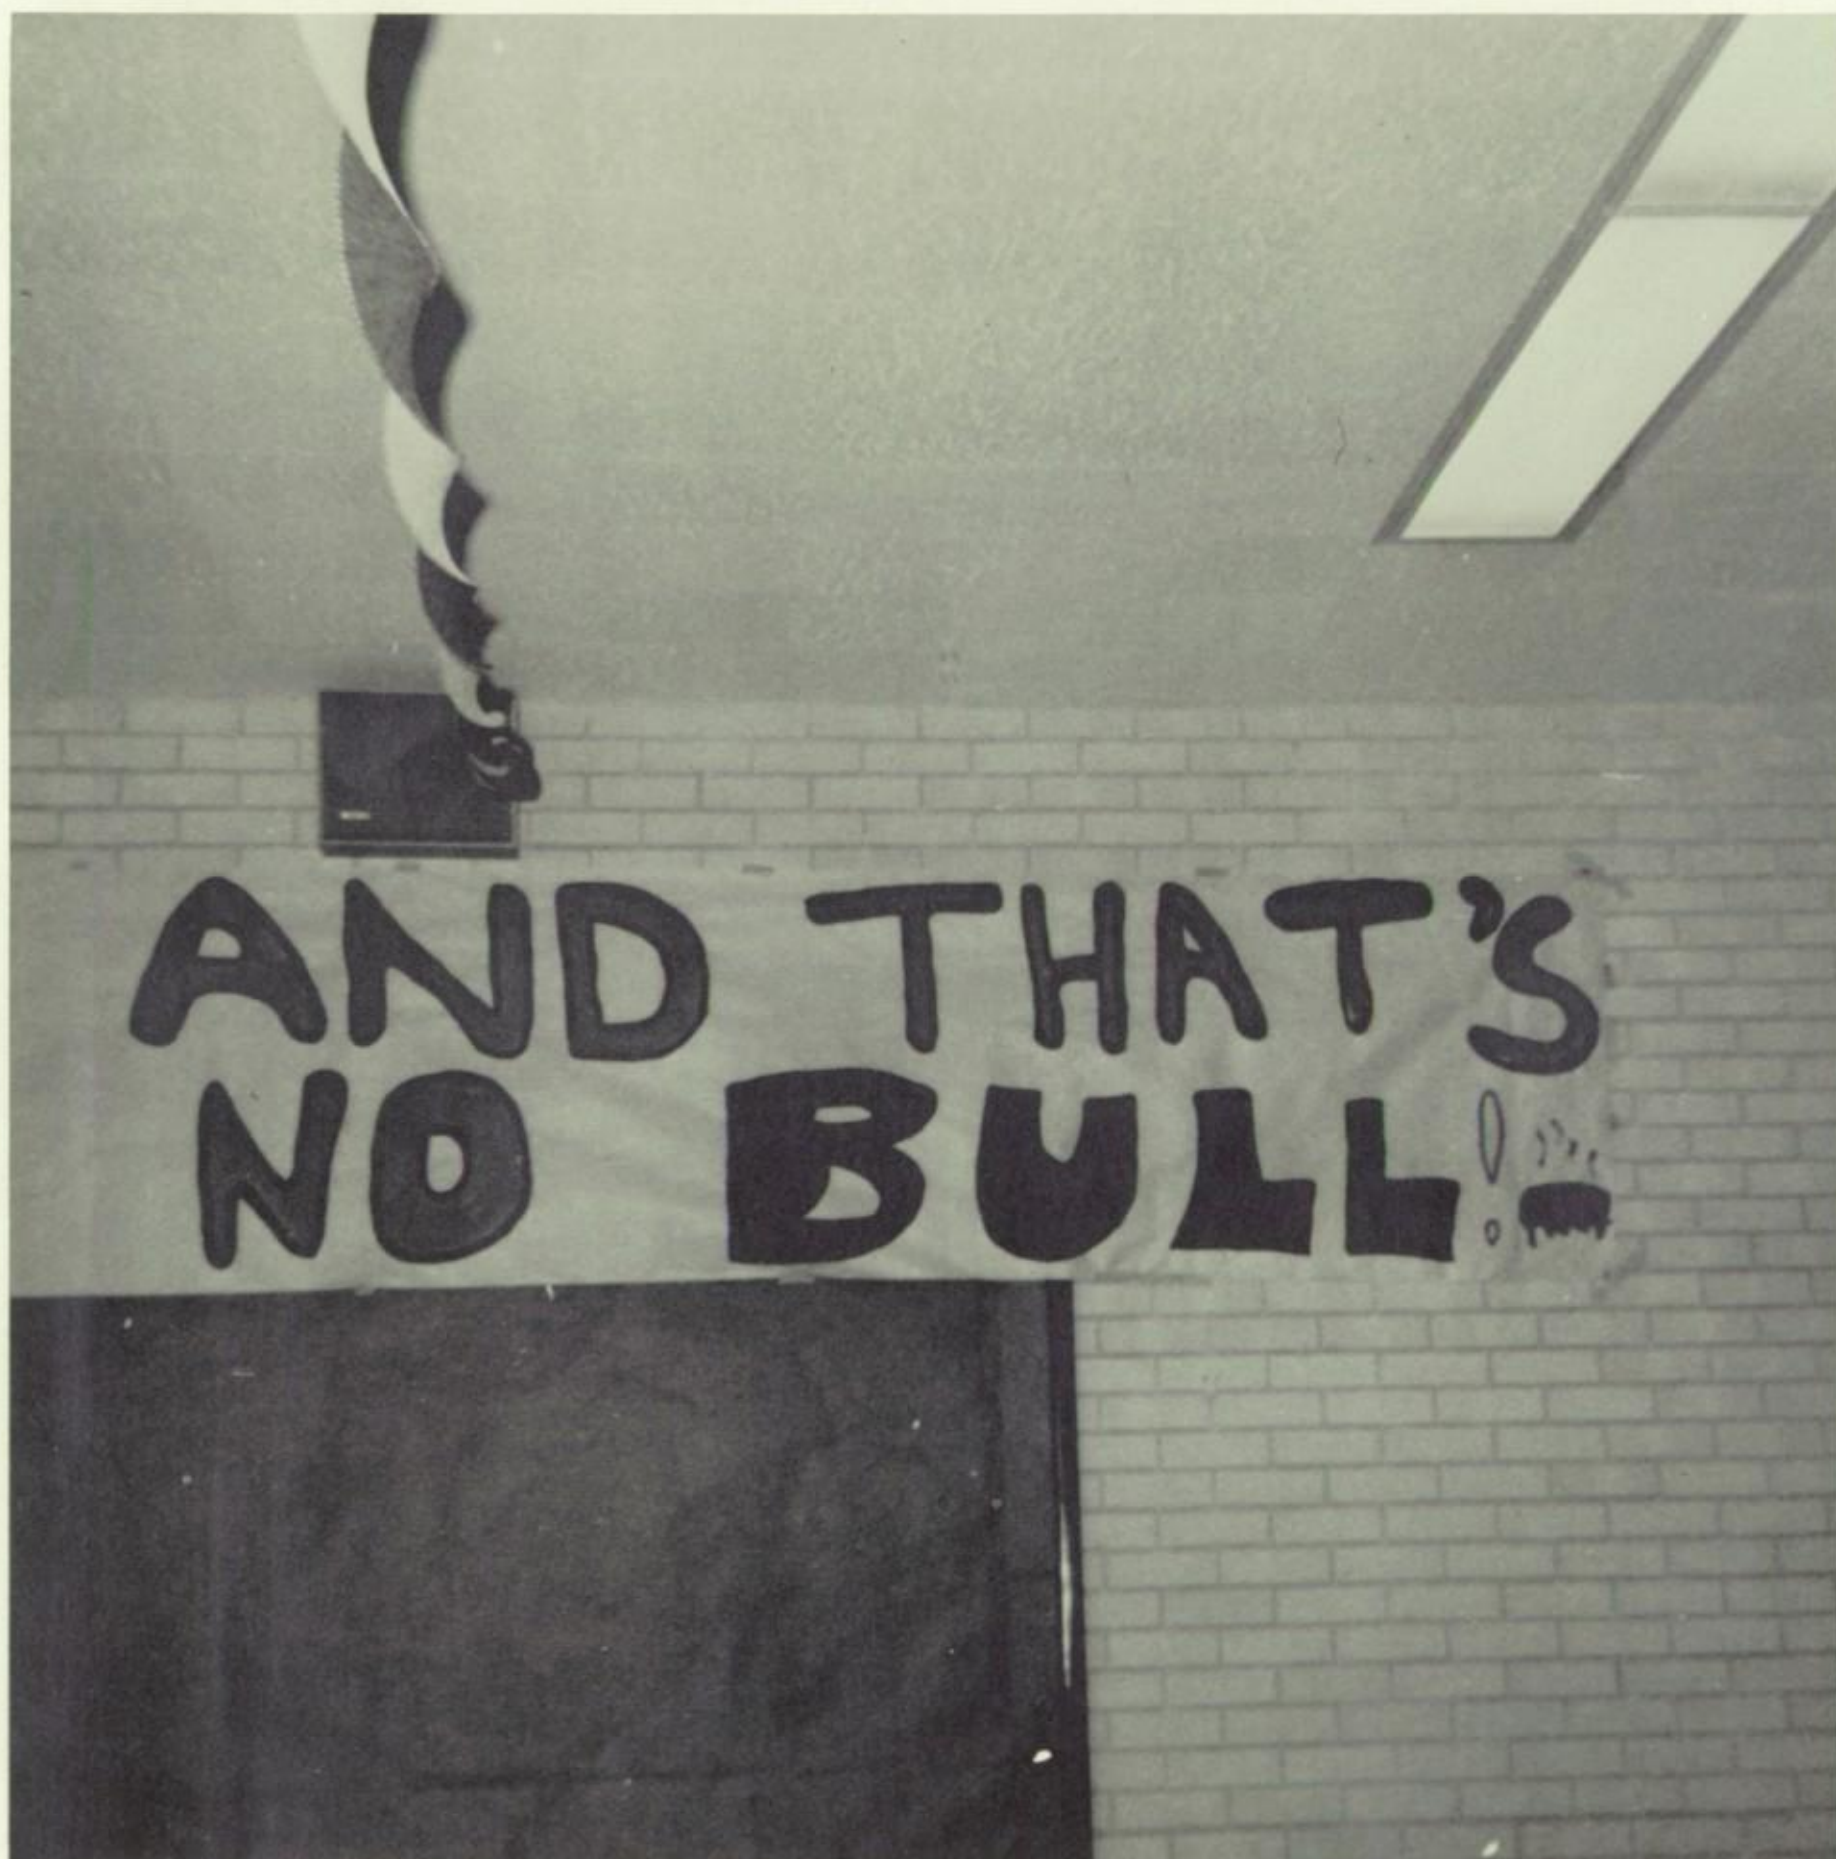

. . . full of disguises.

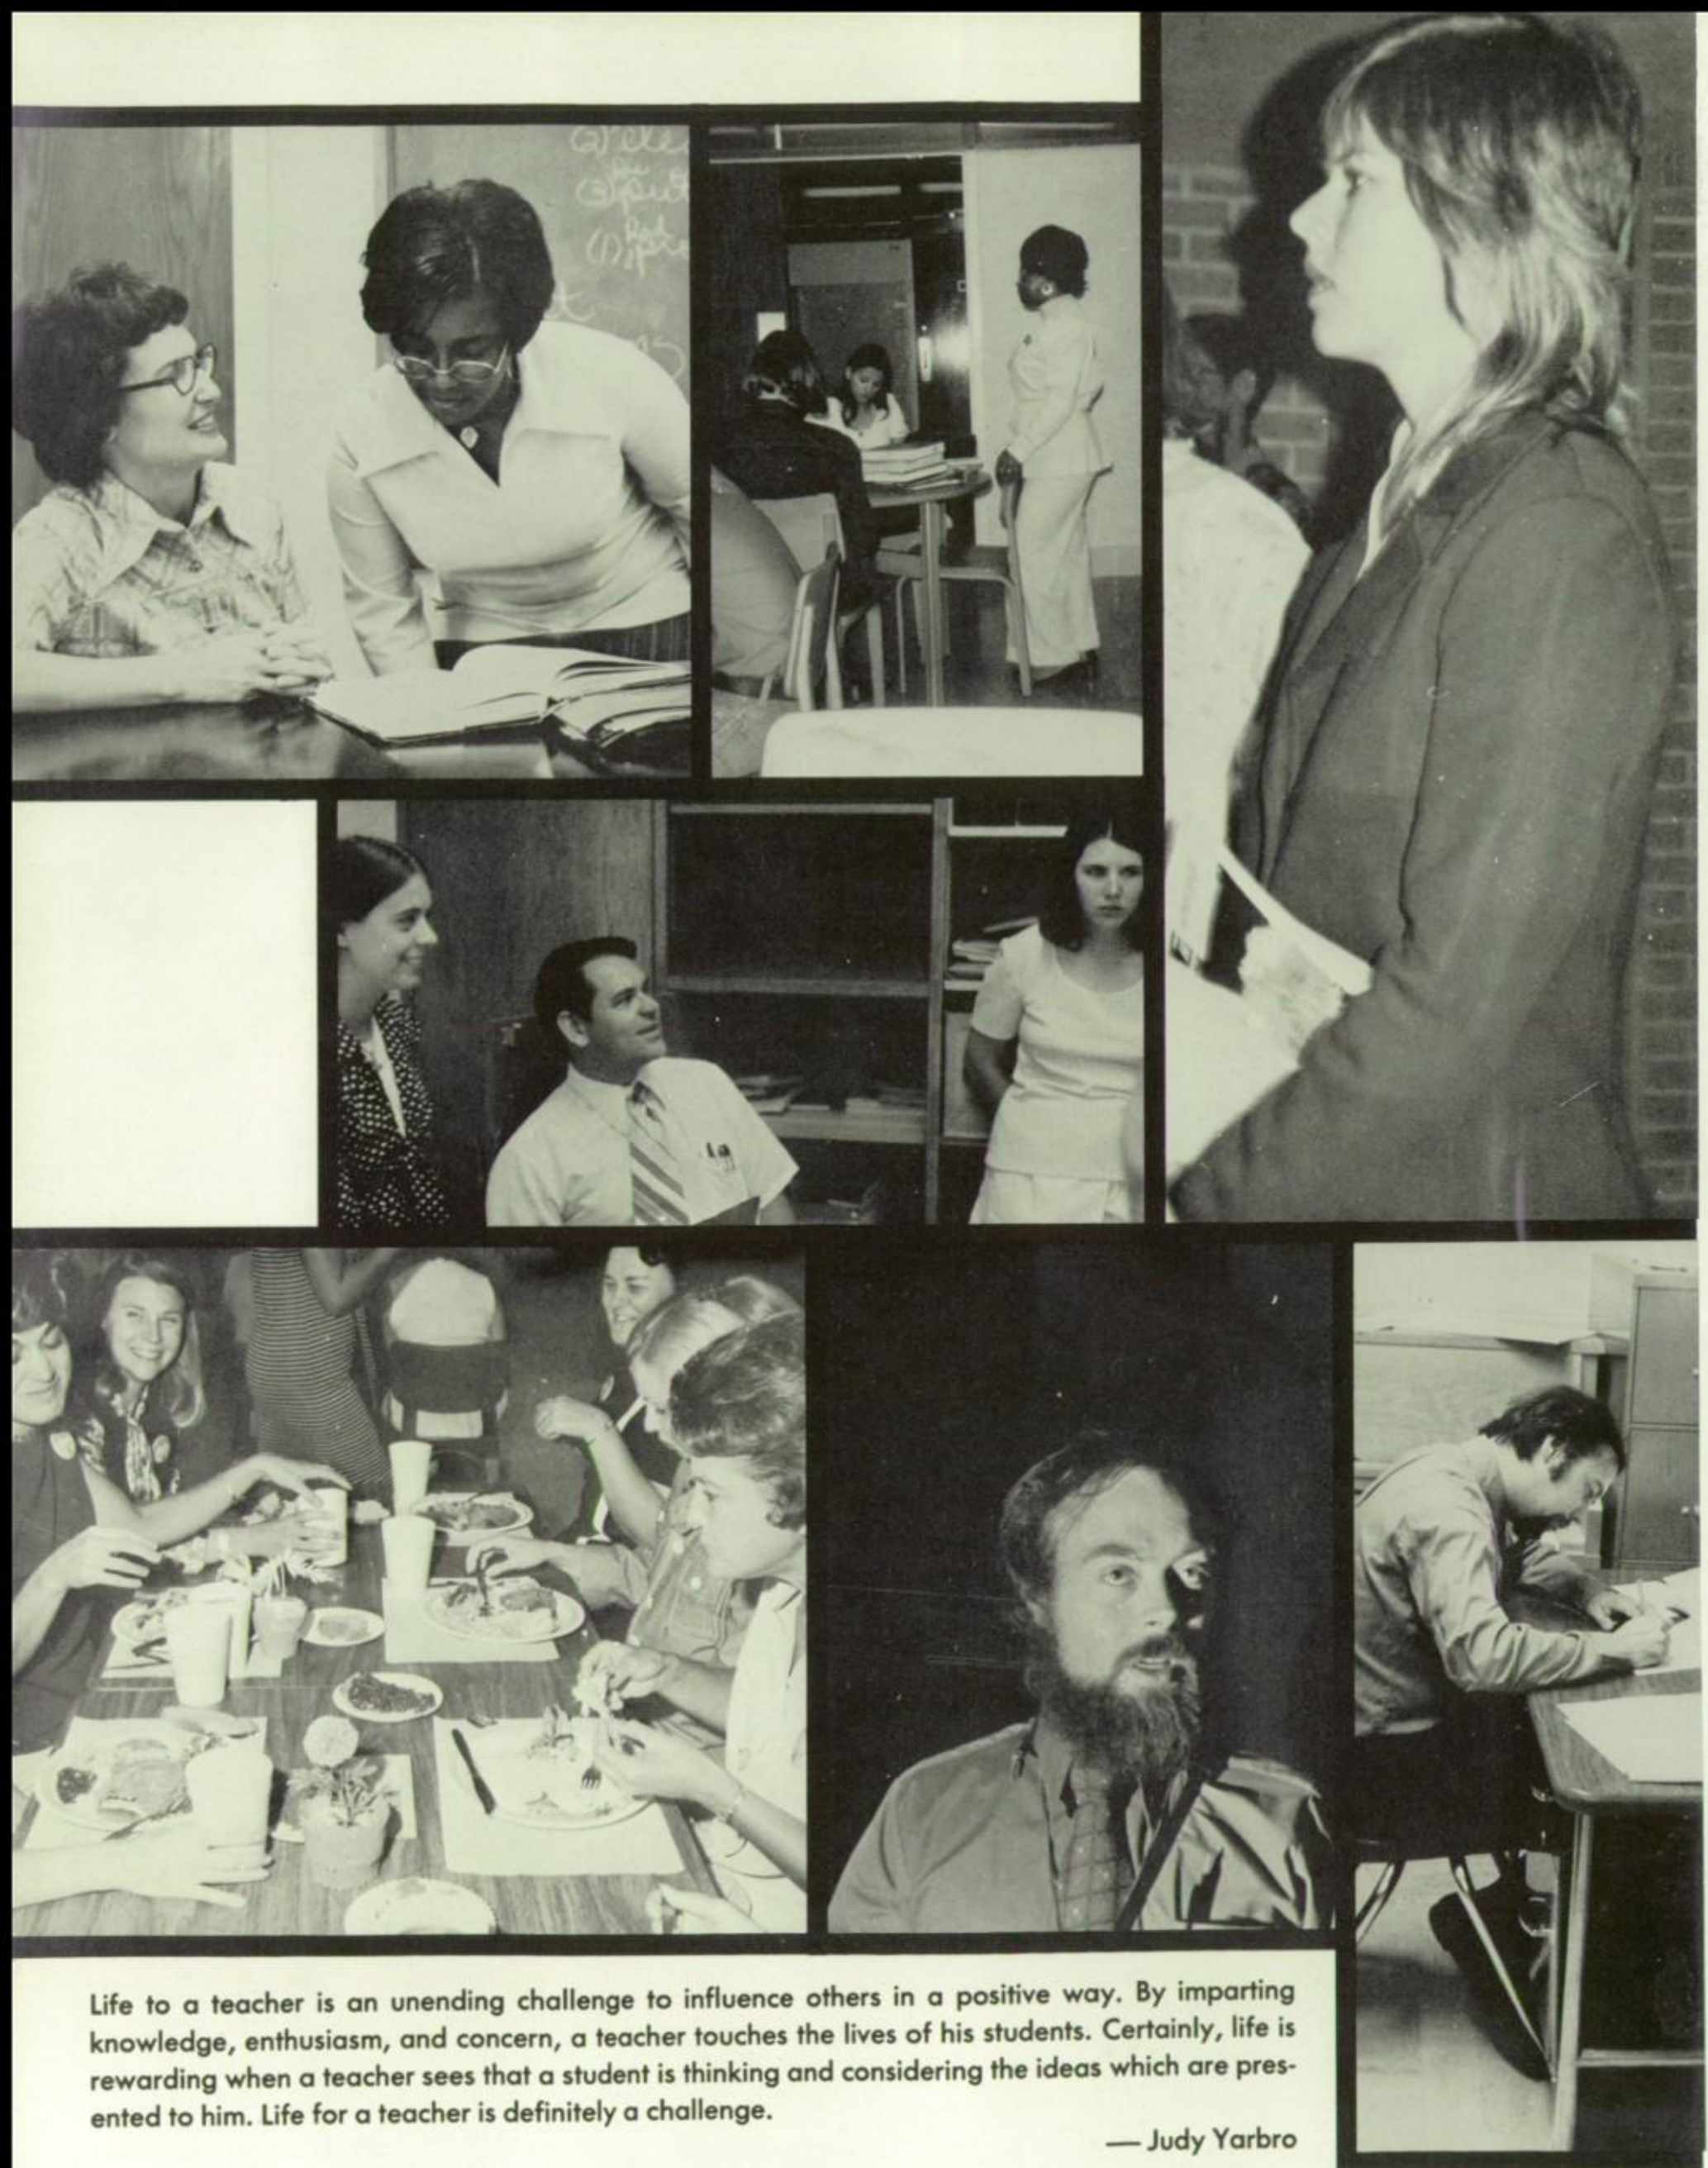

Life is ...

. . . up, sharing someone else's problems, doing your own thing, being a senior '75, getting up before sunrise, going to class, doing your homework, taking care of your own business, being responsible, having an afro, finding a date, skipping class, down, being a senior '76, getting caught, nothing but a thing, not having your assignment, Nixonized, joy, being blond, victory, never missing a day out of school, being someone else, being brown sugar, coming in at sunrise, being irresponsible, defeat, getting rid of someone, having a love jones, being yourself, something, and SENIOR '74!!!

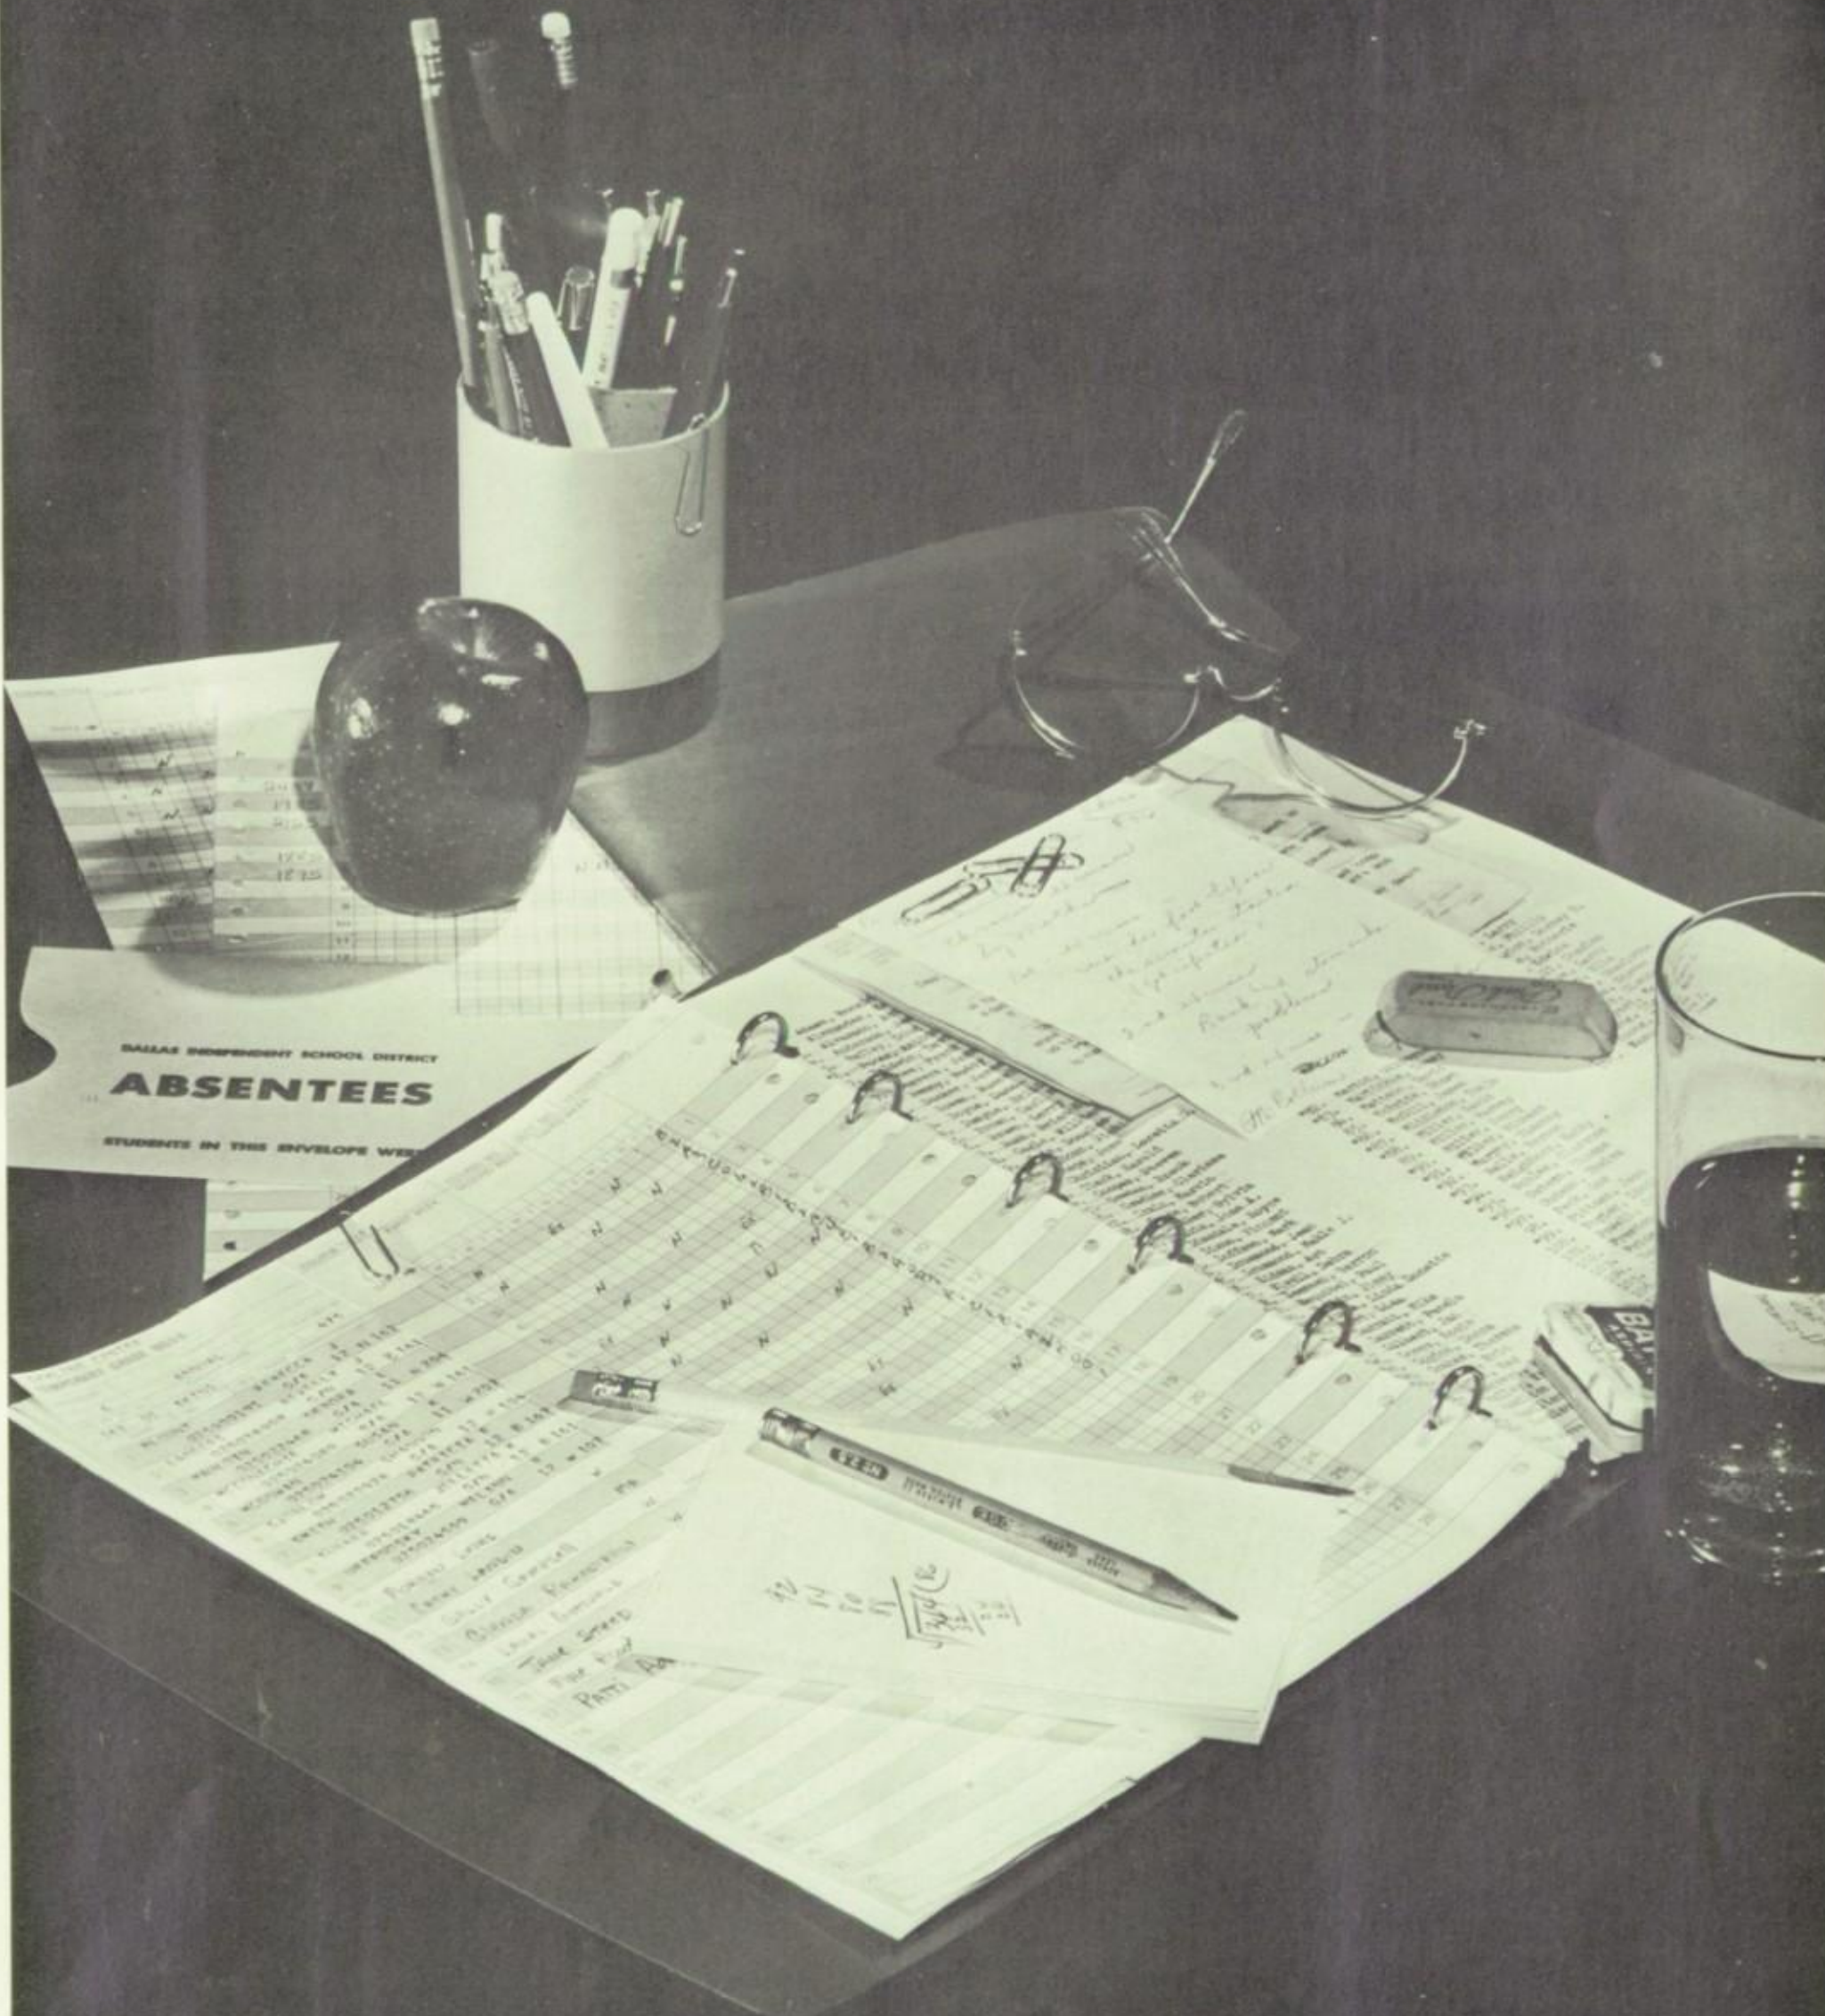

Life is everything; whether you like or not . . .

Life to a teacher is an unending challenge to influence others in a positive way. By imparting knowledge, enthusiasm, and concern, a teacher touches the lives of his students. Certainly, life is rewarding when a teacher sees that a student is thinking and considering the ideas which are presented to him. Life for a teacher is definitely a challenge.

— Judy Yarbrow

DALLAS INDEPENDENT SCHOOL DISTRICT
ABSENTEES

STUDENTS IN THIS ENVELOPE WILL

10 12 14 16 18 20 22 24 26 28 30 31

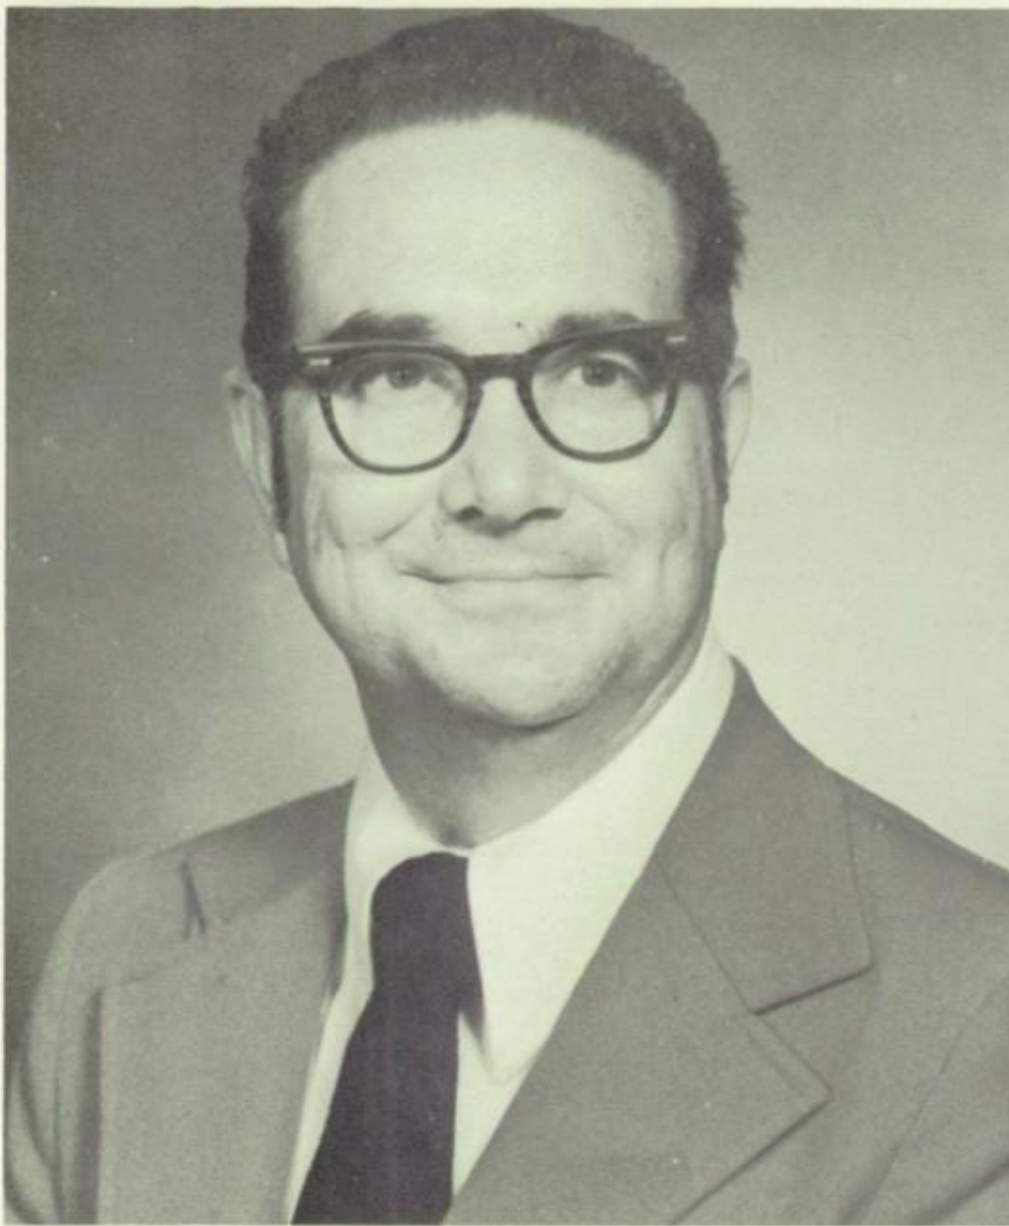

While a student at Skyline, your days were filled with school bells, chalk dust, history, math, sports, and throwing bubble gum into the wastebasket. But when each of you finish school, you will at that moment start out on another great adventure . . . be it college or the world of work. It could be an adventure that might carry you across oceans or across town. Perhaps an adventure or life of complete happiness, or one which includes wars, tragedy, and sorrow. When you leave school you will learn that education is what you have after you have forgotten the facts. The few years that you have been with us, we trust you have learned that for every scoundrel there is a hero, for every enemy there is a friend, that every nickel earned is of far more value than a dollar found, and you will know that men and women of other nations and races have hopes, fears, and ambitions which are not so different from our own. To you who care enough to ask where the best opportunities for the future lie, we must answer quickly, "They exist within people themselves."

In Memoriam to . . .

Mrs. Betty Beadles

For I am convinced that nothing can ever separate us from His love. Death can't and life can't. The angels won't and all the powers of hell itself cannot keep God's love away. Our fears for today, our worries about tomorrow, or where we are — high above the sky or in the deepest ocean — nothing will ever be able to separate us from the love of God demonstrated by our Lord Jesus Christ when He died for us.

Romans 8:38-39

Karen Hoskins

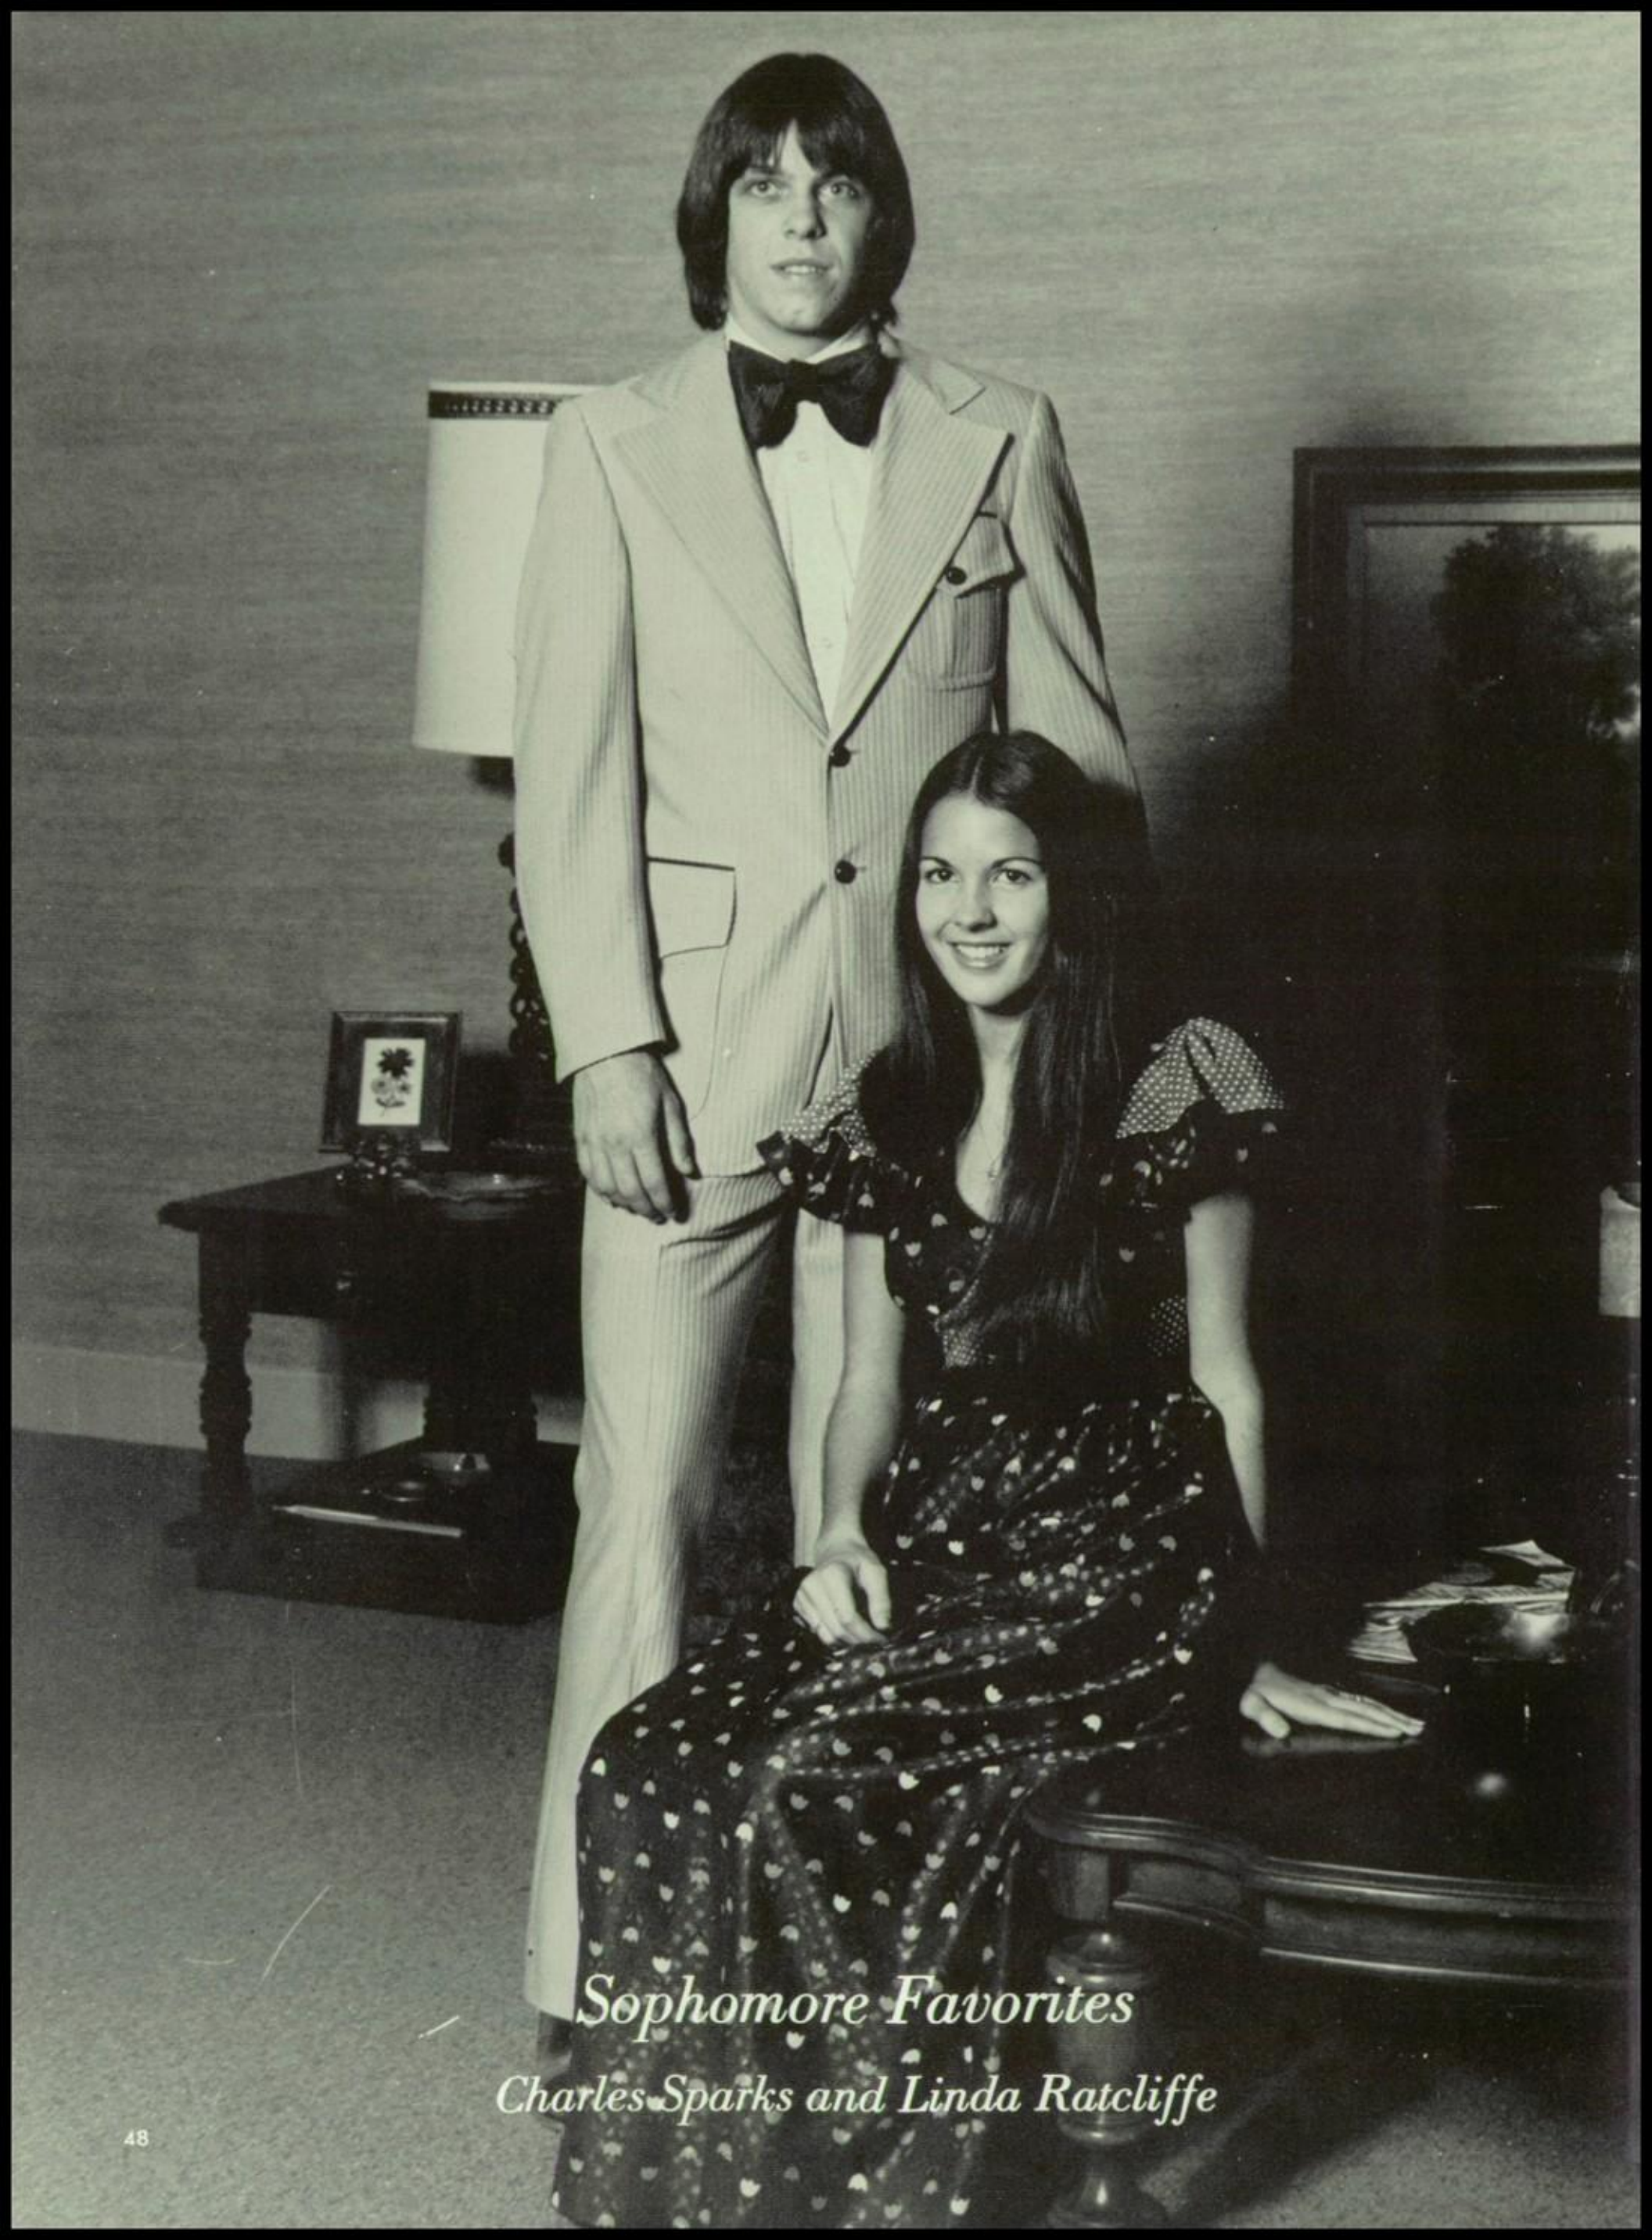

Christ shall even now, as always, be exalted in my body, whether by life or death.

Phillipians 1:20

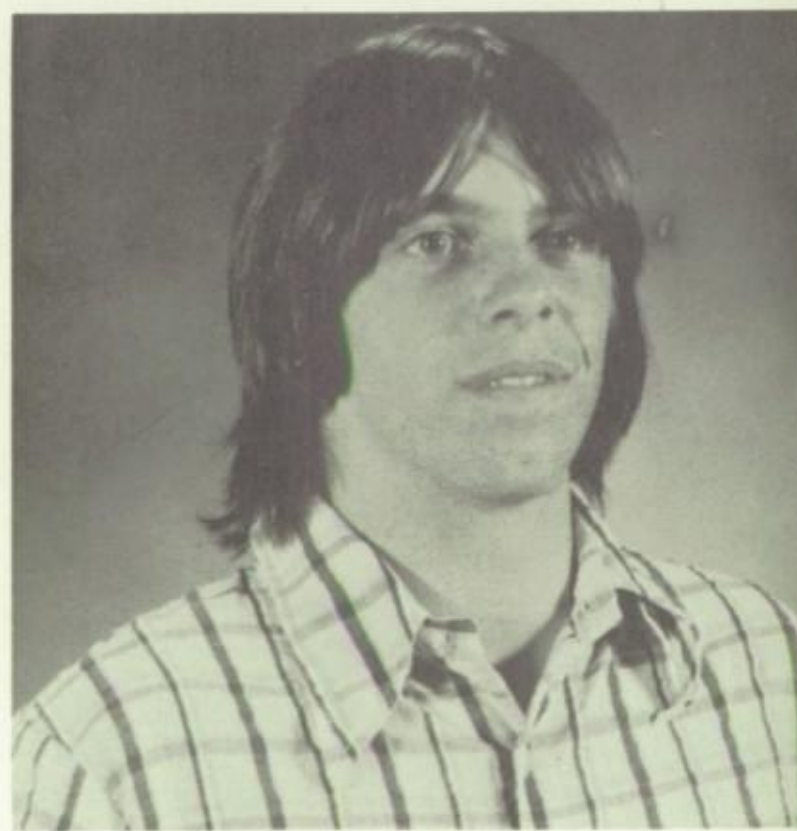

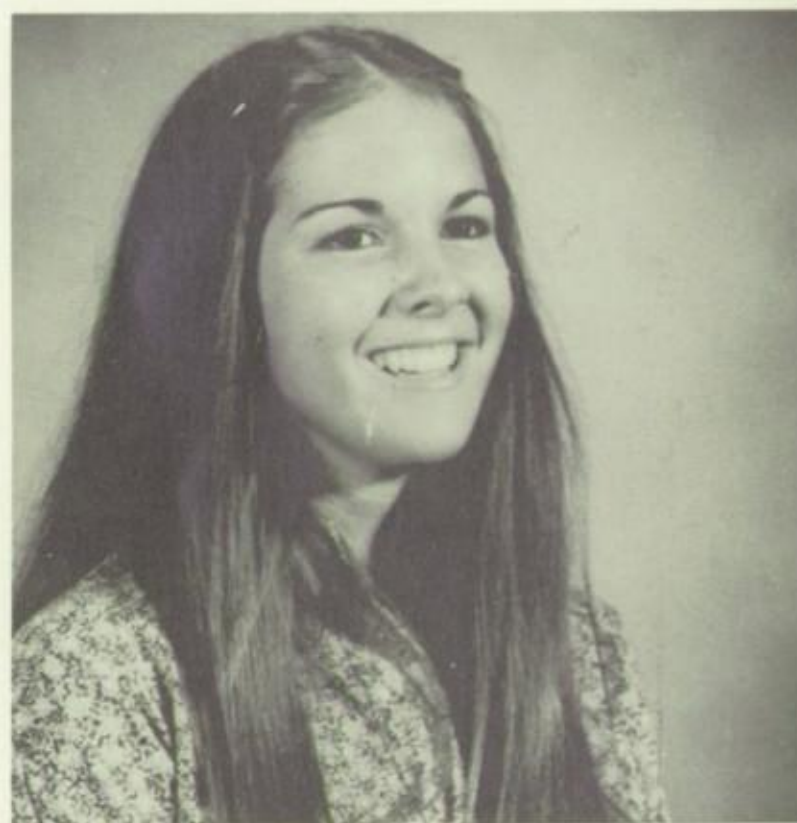

Lawrence Kelly Dock
William Bradford

Yet what we suffer now is nothing compared to the glory He will give us later.

Romans 8:18

Who's Who

Jorge Baldor

Directing the Student Senate requires an immense amount of leadership ability and interest in government. Jorge Baldor, this year's coordinator of the Senate, has both this interest and ability. Jorge serves on a number of decision-making committees including the Superintendent's Student Advisory Commission, the Textbook Revision Committee, and the Youth Citizenship Seminar. Jorge's interest in politics has prompted him to participate in the Texas Democratic Convention and the Ten State Regional Rules and Reform Hearings for the Democratic Party. He is also a registered lobbyist for the state of Texas.

Mario Bowens

Mario Bowens has always gone the "extra step" to promote understanding and acceptance of the philosophy of Skyline. In his day to day activities he has repeatedly shown that with hard work all students can succeed. Mario's extra curricular activities include Marching Band, Concert Band, Student Senate, Skyline Students for Afro-American Advancement, Office Education Association, and Youth Choir for the New Hope Baptist Church. Mario led the 1973-74 Marching Band in making music for the pleasure of Skyline fans. He likewise has led the student body in building a school exemplifying pride and unity.

John Clinchy

John Clinchy's interest in civic affairs and human relations has prompted him to contribute greatly to the Skyline Concept. As editor-in-chief of Reflections he has fostered brotherhood among the students at Skyline. His leadership in planning and promoting the City Government Day enabled many Seniors to learn more about their civic duties and responsibilities. John's self-determination and motivation are proven by his work with the City Planning Department as a part of the Man & His Environment curriculum. John balances his serious concern with public affairs with a deep love of music. A gentleman, a musician, a humanitarian, and a warm friend, John Clinchy's versatility is an example to all.

Elizabeth Cottingham

Elizabeth has been an outstanding representative of Skyline in many respects. She was a member of the Debate Team for three years and has won numerous trophies for her oratorical presentations. Elizabeth's friendly, helpful attitude made her popular with the Senior Class resulting in her election as "Most Likely to Succeed." She kept others informed in her roles as feature editor of Reflections and student announcer. Not only did Elizabeth's voice echo through the Skyline halls every day on the PA announcements, but her efforts have left a lasting influence on the greatness of Skyline.

Rochon Greene

Rochon Greene is one of those rare individuals that briefly pass by every now and then. She is an excellent student, a credit to Skyline and shows in her actions and attitude that she lives by a very high standard of principle. Rochon's outlets for her talent and interest include National Honor Society, Mu Alpha Theta, French Club, Spanish Club, and Junior Achievement. Rochon has worked to achieve the best in scholarship, leadership, and communication and definitely deserves a place among the Who's Who at Skyline.

Debi Harris

Creativity and sensitivity are the two adjectives which best describe Debi Harris. Debi has served Skyline in her quiet, persistent manner as Art and Creativity editor of Reflections and through her speech and debate activities. Debi has shared her writing skills through the activities of the CDC English Cluster. Her personal drive has helped her produce over 600 original poems. Many of these she shares with Skyline students who read Reflections and Fragments, the literary magazine. Debi's deep devotion to her fellow man can best be communicated through the words of one of her own poems, "Everyone's out for himself and not anyone else, except for a few dreamers who'll find it's a hard road they chose — but it's worth it to be one of those."

Anthony Joiner

Anthony Joiner, a talented actor, has brought recognition to Skyline through his participation in many speech and debate tournaments. Anthony is a master at his specialties, dramatic interpretation and duet acting. He has represented Skyline in various talent shows and has acted at Theatre Three and the Dallas Theatre Center. Anthony hopes to further develop his talents at the Juilliard School of Drama in New York City. His talent and ability coupled with his eagerness to help have made Anthony an outstanding Skyline student.

Mike McConachie

Scholarship and participation are the things that are important to Mike McConachie. As an officer of several clubs including Key Club, Spanish Club, and National Honor Society, Mike's leadership role at Skyline has been most important. His intelligence and organizational abilities have been essential in his role as Business Manager for the Origin. Mike is dependable and actively assumes all responsibility assigned to him. He fosters and promotes cooperation among members of the Skyline community through a friendly, easy-going attitude.

Mae Frances Rowlett

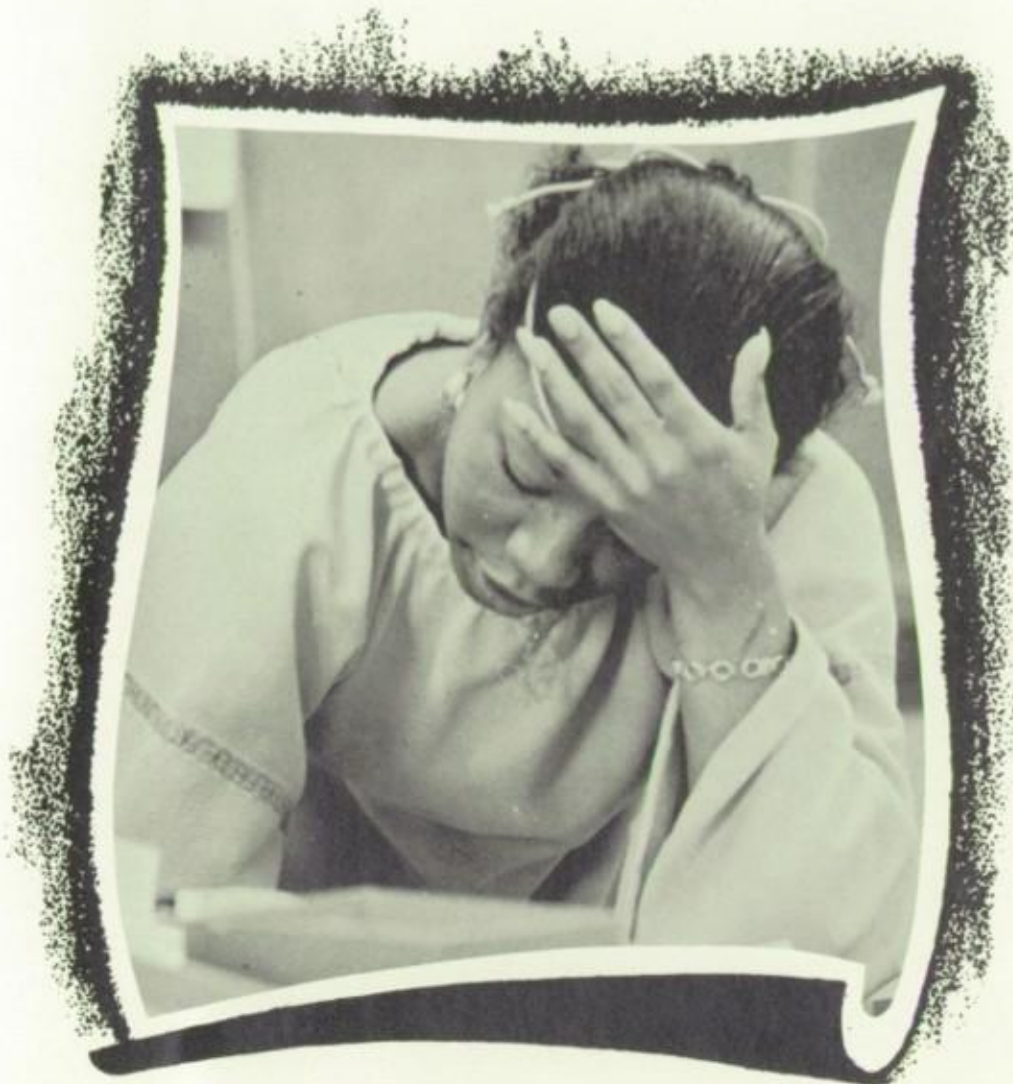

A cheerful "Hey Babe," and a slap on the back is the familiar greeting of Mae Frances Rowlett. Mae Frances' joyous nature and zest for life make her a pleasure to be around. During her years at Skyline Mae has been a member of the Origin Staff, TAHOS, and National Honor Society. She was instrumental in the planning, organizing, and conducting of Black History Week. Mae constantly strives to be a proud example of her race through her scholastic pursuits, extra curricular activities, and especially through her personal relationships with other students and faculty members.

Cathy Taylor

Cathy Taylor's numerous activities include serving as Drama Club vice-president, officer in church choir, past worthy advisor of Rainbow Girls, and class president of Bible Study Class. She also participates in Future Teachers, library assistance, Student Senate, Choraliers, and the Student Theatre Club of the Dallas Theatre Center. She has done extensive South American and European travel with her choir. In addition to her numerous activities and her excellent scholarship, perception, and participation Cathy has a delightful outlook on life which has contributed greatly to the morale of faculty and students.

Jelletta Turner

The work required to edit a yearbook that will preserve the memories of 4000 students is monstrous and would not even be attempted by many. The one who did have the nerve to take on the job was Jelletta Turner. For two years Jelletta has snapped photos, written captions, filed pictures, settled arguments, and nursed headaches in the course of publishing the yearbook. In her "spare time" she won duet acting trophies, maintained a high scholastic average, and participated in Junior Achievement. For Jelletta, "Life is" . . . Skyline.

Cheryl Fields

Cheryl Fields has used her business skills to better the attitudes and spirit of Skyline students. She serves as vice-president of the Secretarial Science Office Education Association. At the beginning of school Cheryl typed, mimeographed, and distributed song and yell sheets among classes to build spirit. She also served as overall chairman of the Valegram project. Cheryl displays the character, leadership and dependability of a superior Skyline student.

Melinda Lichtenwald

Melinda Lichtenwald is an active and enthusiastic Senior of Skyline. She is a member of the National Honor Society as well as the Student Senate. Many times she finds herself as the leader or chairman of organizations and activities and she accepts the responsibility willingly. In the Music Cluster she participates in chorals and other choral groups. Other activities consist of the Senior Pub, Mu Alpha Theta, Future Teachers of America, and the German Club. Melinda is planning on a degree from Howard Payne College in Brownwood, Texas.

Debi Reid

To always be ready with a kind word or a helpful suggestion or even just a smile isn't easy but these are things that come natural to Debi Reid. As Senate Vice-Coordinator she has planned dances and studied troubling situations trying to find a solution, and puts her dancing and yodeling ability to work as Vice-President of the German Club. Active in choir and the music cluster, she played Amahl in the Christmas production, "Amahl and the Night Visitors," and placed runner-up in the Youth Citizenship Award contest. Debi is a member of the Principal's Student Advisory Committee and a member of the DISD Superintendent's Student Advisory Committee.

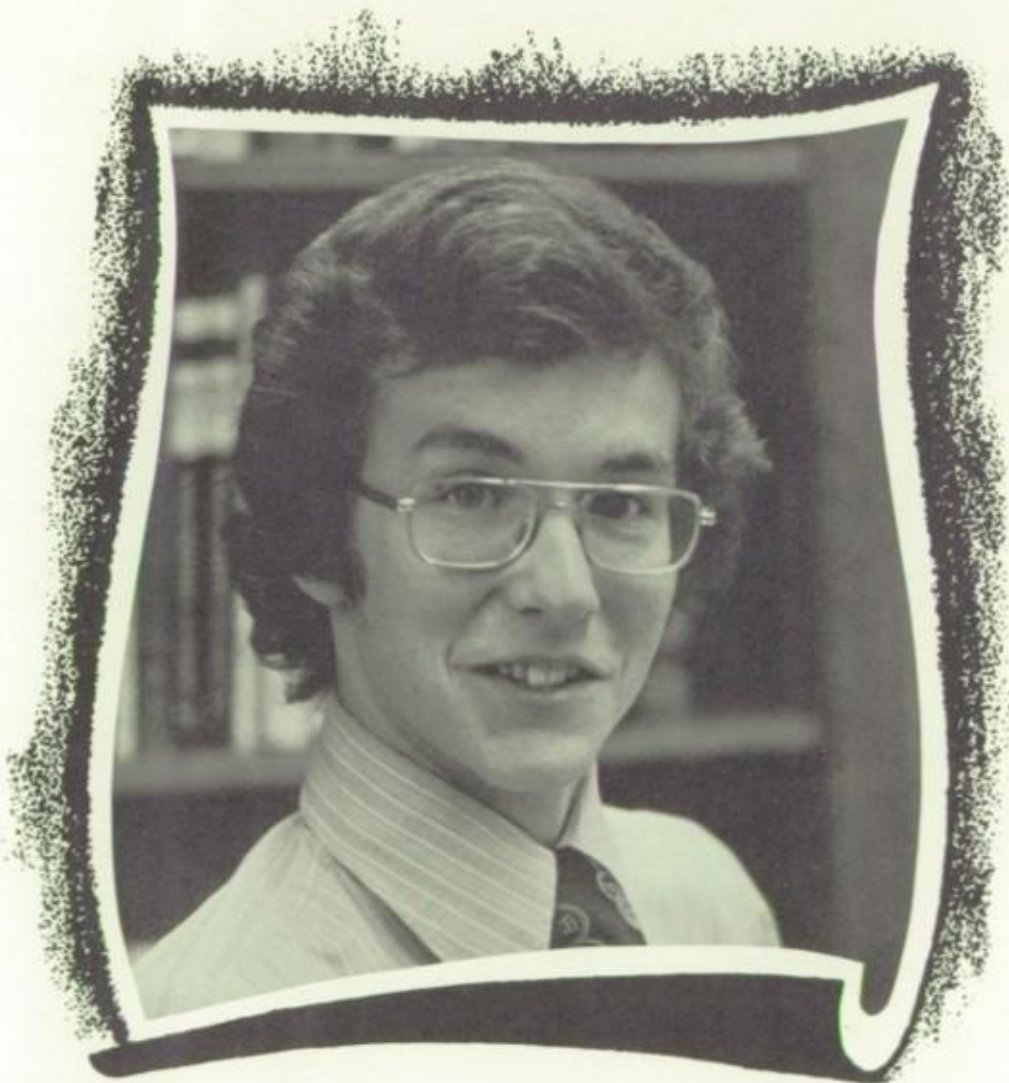

Leanne Cannaday

Leanne Cannaday has shown her school spirit in many different ways. She is the captain of the Skyline Silhouettes Drill Team. She is an active member in the National Honor Society, Spanish Club, and the Ice Skating Club. Leanne has been a member of the music cluster for three years. She sings with the CDC Women's Choir and the Limited Edition, singing solos on several occasions. Leanne also appeared in Skyline's operetta "Amahl and the Night Visitors." Leanne Cannaday is truly an outstanding senior at Skyline.

Jon Farrier

Jon Farrier is a very talented young man. He is an active participant of the Music Cluster. He is a member of both the Symphonic Band and Marching Band. Jon also sings in the Limited Edition. He participated in Skyline's production of "Amahl and the Night Visitors." Jon also played his French horn in the pit orchestra of the Dallas Summer Musicals. Jon Farrier's considerate attitude makes him a favorite with students and teachers alike.

Mary Jo Carlson

Described as an "outstanding individual," "top intellectual," and "constructive student," Mary Jo Carlson has been an active and welcome addition to both Skyline High School and the CDC. In her three years at Skyline, she has been a member of the Science Cluster, Science Club, Mu Alpha Theta, National Honor Society, and the Senior Pub staff. More than scholarship, however, Mary Jo has shown a willingness to help out, consideration towards both students and faculty members, and a sparkling sense of humor. A combination of wit and intelligence, Mary Jo is sure to succeed in any endeavor.

Jacquelyn Love

Soft-spoken, gentle, and understanding are just a few of the adjectives that can describe Jacquelyn Love. A member of National Honor Society and National Forensic League, Jacquelyn exhibits scholarship as well as kindness towards others. She has been described as having an "excellent understanding of people" as well as being a "hard worker — always dependable." In her three years at Skyline, she has participated in English and Drama clusters, and won trophies in duet acting. Well-liked by both students and teachers, Jacquelyn will go far in whatever she does.

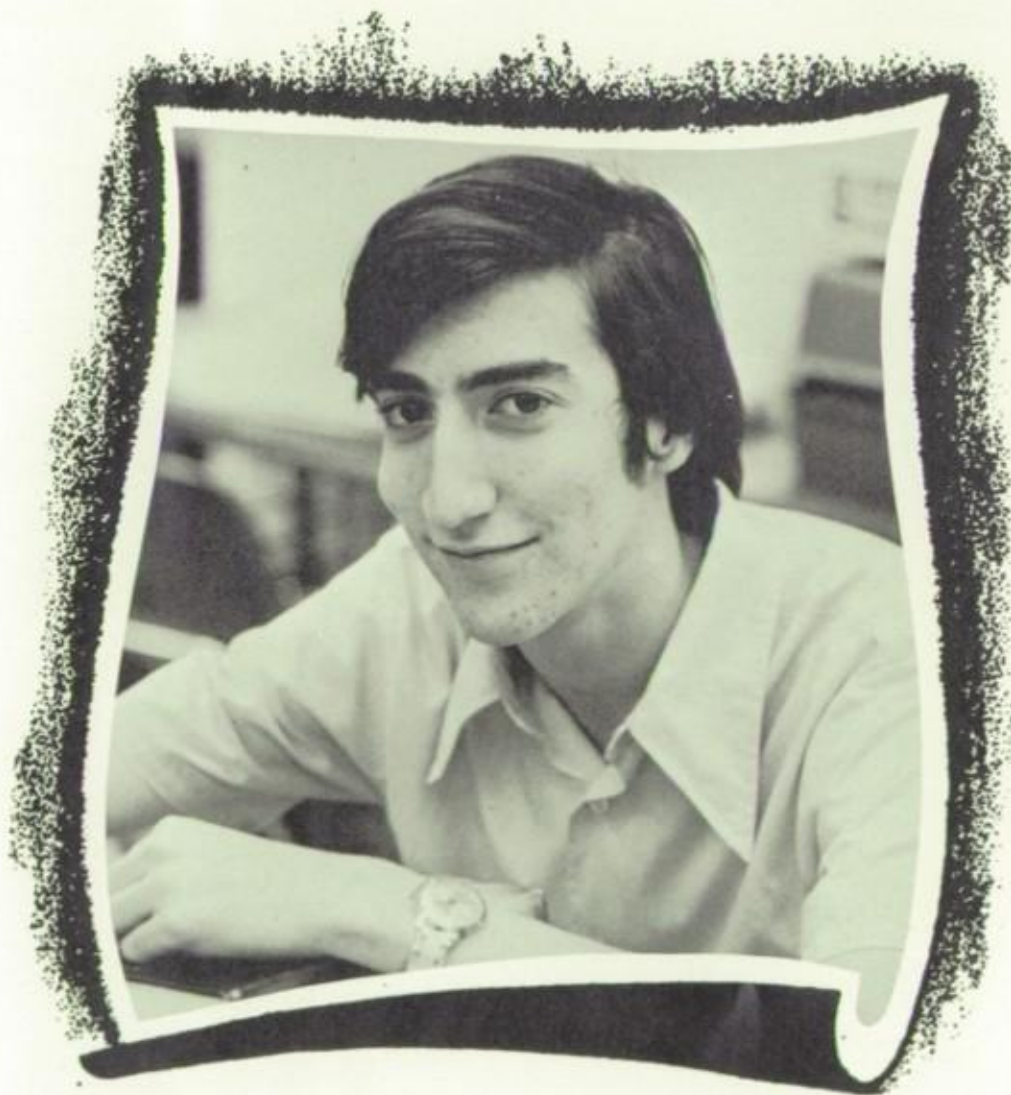

Laura Everett

Laura Everett has made many contributions to Skyline Center. A transfer student from Samuell High School, she is in the music cluster. A talented pianist, Laura plays in the Advanced Piano ensemble. Laura has received many honors in speech and drama. She won a trophy in duet acting in one of the past speech tournaments. An outstanding senior, Laura Everett deserves the honor of Who's Who.

Eric Brahinsky

An extremely talented musician, Eric Brahinsky shows his talents not only in the Music Cluster but all over Skyline. He is the concertmaster of the Skyline Symphony and also plays for other functions in the community. He holds the position of third chair in the All-State Orchestra. Eric also has an outstanding academic record. He was a finalist in the National Merit Scholarship program. He is a member of the National Honor Society and Mu Alpha Theta. A well-rounded student, Eric is sure to go far in the future.

Kregg Hood

Described as "the ideal gentleman" and a natural leader," Kregg Hood has been an active and welcome member of Skyline. During the last three years, he has participated in Mu Alpha Theta, National Honor Society, National Forensic League, Tennis team, the ROTC Rifle and Drill teams, and, most notably, the Debate team. Kregg has also narrated slide shows and films for local and national distribution. He has an interest in not just those around him, and the present, but he also has an eye towards the future. Kregg is truly a credit to Skyline.

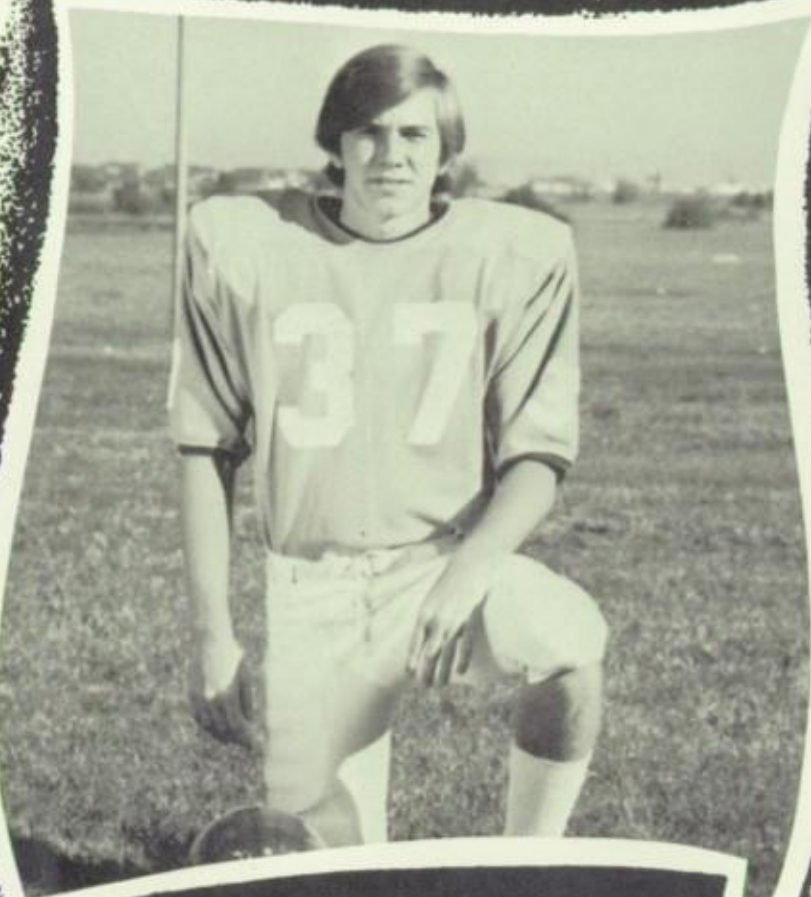

Kathy Farnham

Kathy Farnham is one of the hardest working Seniors at Skyline. She has been a member of the Silhouettes for the past two years, serving as a lieutenant during her senior year. Kathy is an active member of the speech and debate team. She has won many trophies in past speech tournaments. She is a member of the National Forensic League, and the staff of the Senior Pub. Kathy has also served Skyline by narrating various films about the Career Development Center. Kathy Farnham has earned her place in the Who's Who section.

Mike Hughes

Mike Hughes has done an outstanding job in Skyline's athletic department during his years here. He has played on the varsity football team for the past two years. This year he had the honor of being selected for the All-District football team. Mike has also been a two-year starter for both the basketball and baseball teams. Mike's abilities as an athlete have enabled Skyline to receive city wide recognition.

Rick Sartain

Known for outstanding scholastic leadership as well as his ability in sports, Rick Sartain is a familiar face around Skyline. Affectionately known as "pink" to his friends, Rick is friendly and has a straightforward manner to all those around him. Besides being a two-year varsity letterman in football, Rick is also a member of the National Honor Society, National Forensic League, Student Senate, and president of the Fellowship of Christian Athletes. Rick's friendly manner and scholastic ability, as well as athletic ability, make him a favorite around the halls of Skyline.

Chuck Bennett

Chuck Bennett is one of Skyline's finest leaders. Chuck served as drum major of the Raider marching band. He helped enable the band to put on the most outstanding half-time shows in the history of Skyline. Chuck is also an active member of the German Club. He plays in the German band and takes part in the German dancing. Chuck is also a member of the music cluster. He sings in the Limited Edition and took part in Skyline's production of "Amahl and the Night Visitors." With these qualities of leadership, Chuck is one of the most outstanding students at Skyline.

Annette Hendricks

Annette Hendricks is a combination of talent and beauty. She has been a member of the Silhouettes for two years. Annette is an active member of many clubs including Spanish Club, Future Teachers of America, National Honor Society, Young Life, and the Ice Skating Club. During her junior year she received one of the highest honors any class can bestow upon its members, that of Junior Favorite. Annette is in the Man and His Environment cluster and is preparing to become a social worker. Annette is a truly beautiful person both inside and out.

Kay Burt

Kay has been an excellent student in Fashion Merchandising this year. She accepts responsibility, is a capable leader, and has an excellent attitude. She is always willing to help in an emergency, whether it means taking her car on a field trip or obtaining the cooperation of the music cluster for a fashion show. She works hard in areas she feels she is weak and always seems to enjoy new learnings. She was chosen as a model for the fashion show and took her responsibility seriously.

She has also given a lot of serious consideration to whether or not she wants to choose a career in fashion merchandising. She is truly using her cluster experience as career exploration.

Lula Goolsby

Determination alone is apt to bring success — but when combined with talent, the character of Lula Goolsby comes immediately to mind. Lula, whose insatiable interest in political affairs led her to the Man and his Environment Cluster in her sophomore year, has made innumerable contributions to the Skyline community. In addition to Lula's intellectual aspirations, her overwhelming empathy for others made her an individual that Skyline could consider itself fortunate to know.

Denise McTyre

"Denise always brightens my day." That's how a friend once described Denise McTyre. She has been a member of the Silhouettes for the past two years, participating in all their activities. Denise is also an active member of the Spanish and Ice Skating clubs. She is also very proud of Skyline and shows this pride by giving tours to the public. Denise is a good representative of Skyline and is very deserving of this honor of Who's Who.

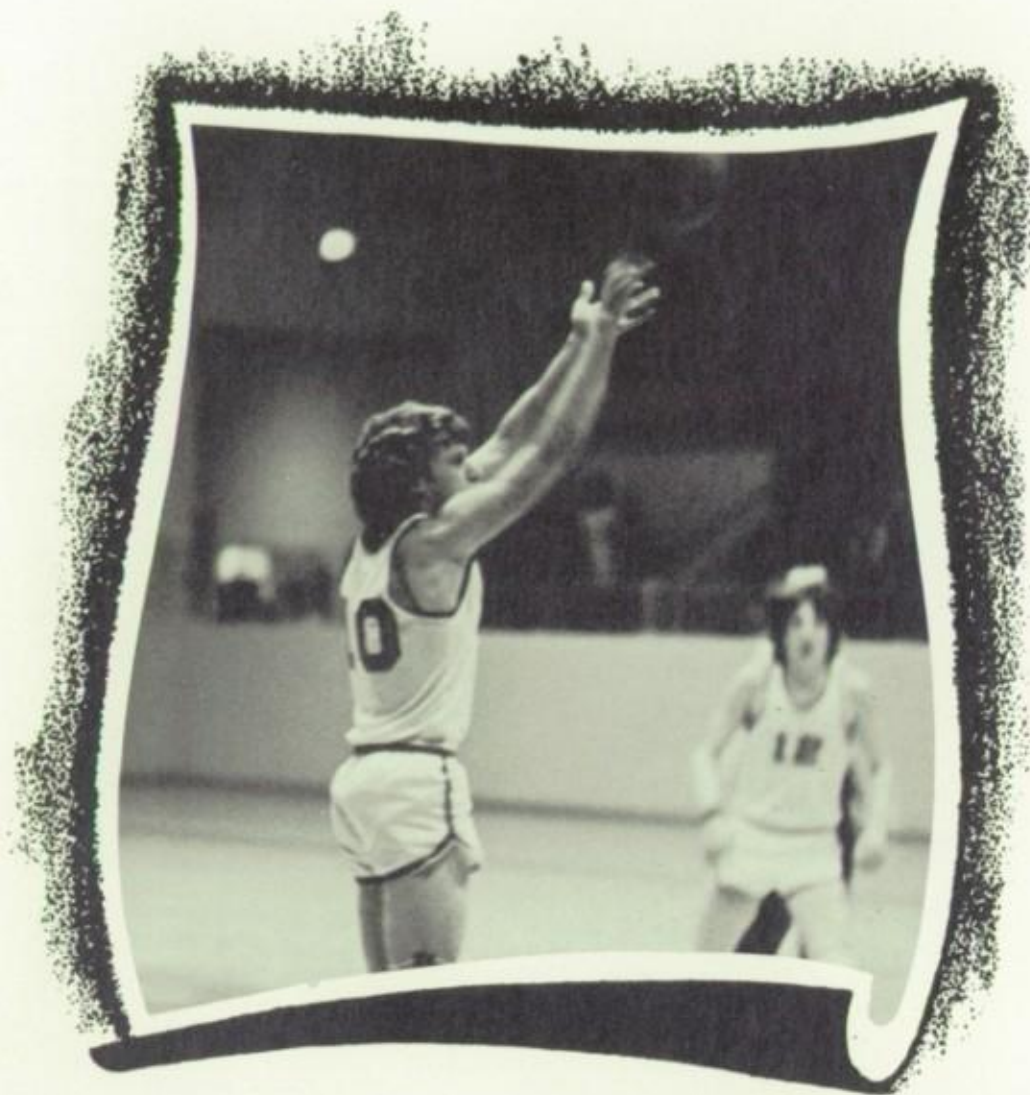

Laura Landers

Laura Landers is a good representative of the Skyline senior class. She is a member of the Silhouettes, the Service Club, the Student Senate, and Young Life. All these activities make Laura a busy girl but she keeps up with them as well as her academic work. The warmth Laura exhibits to all her friends makes her a favorite in the halls of Skyline.

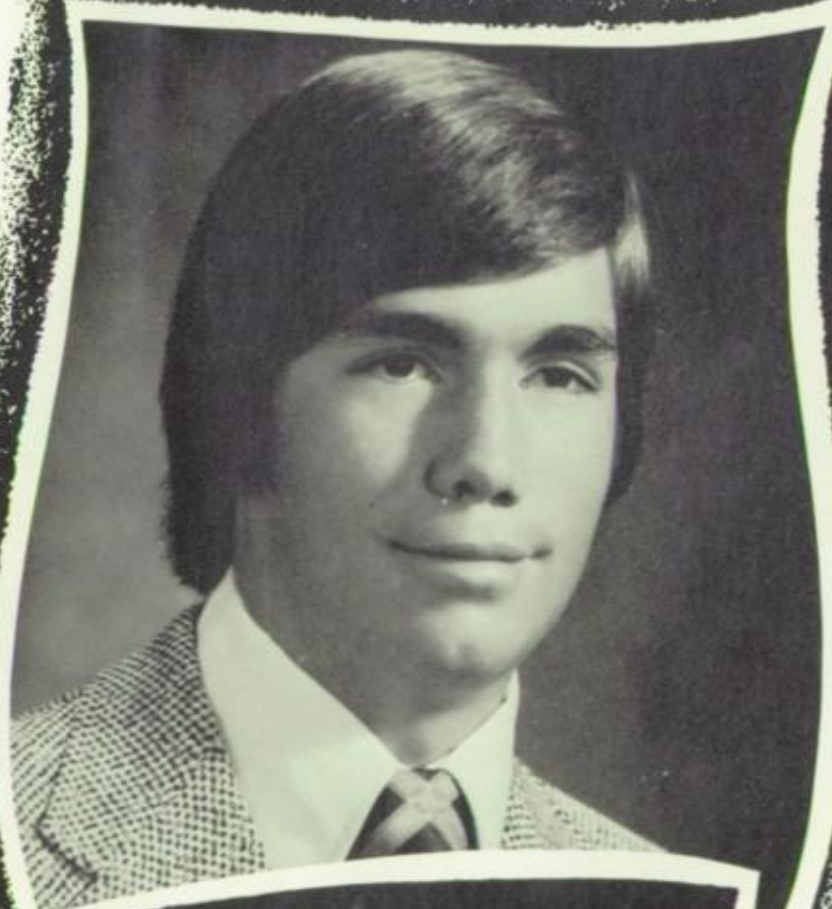

Doug Bohne

Doug Bohne is one of the most outstanding players in Skyline's athletic department. He has been a member of both the football and the basketball teams, lettering in both sports. Doug is respected both by his fellow players and his coaches. Doug's warm personality as well as his athletic abilities make him one of the best-liked people at Skyline.

Randy Redden

"Always ready to lend a hand" is the best way to describe Randy Redden. He has served as a manager and trainer for the football team for the past three years. He is an active member of Young Life and participates in all their activities. Randy is also in the Key Club. He has also participated in a Children's Workshop. Randy's kind personality makes him a valuable asset to Skyline.

Dee Richardson

"A real problem solver" — "Outstanding" — "concerned." The personality of Delores Richardson — known as "Dee" to her friends — can be described by all these terms and more. At Skyline, Dee has been involved by being a cheerleader, a student senator, on the girls' basketball team, and also represented Skyline as the Homecoming queen during her Senior year. She also sang with the Ebony Choir during Black History Week this year. Not only is she active in extracurricular fields, but she plans to be a doctor in bacteriology, studying in the Science Cluster. Delores has certainly been a credit to Skyline.

Sallie Sampsell

The warmth and friendliness of Sallie Sampsell makes her a joy to know. She is always cheerful and has a personal greeting for every person she sees. Sallie's interests are divided among several creative endeavors. She finds every opportunity available to develop her writing talents — she is a member of Reflections, the Pub, the Origin, Fragments, and the English-Journalism cluster. Sallie's musical talents are appreciated by the Skyline music groups as well as the Westminster Youth Choir of Oak Cliff Presbyterian Church. For those who know Sallie, a day is not complete without her happy hello and Who's Who would not be complete without honoring her.

Patricia Smith

Patricia Smith is an energetic, hard-working student at Skyline. She is a member of Skyline's Television Arts Cluster, where she has shown to be a conscientious and enthusiastic student. She is also a member of Skyline's Marching band, the ORIGIN staff, and the Pub Staff. Patricia's quick smile, enthusiasm, and talent have made her a valuable addition to Skyline.

Vanessa Agnew

If there's one word to sum up Vanessa — she's involved. Vanessa has been a member of Skyline's Silhouettes, FTA, National Honor Society, Student Senate, was named to Who's Who Among High School Students, and a finalist in the National Merit Scholarships Competition. She was also an organizer and participant on the Black History Week. Her involvement extends out into the community where she is active in several organizations which participate in helping needy families and educating disadvantaged students. She is an active, vivacious student who has certainly earned her place in Skyline's yearbook — the who's who.

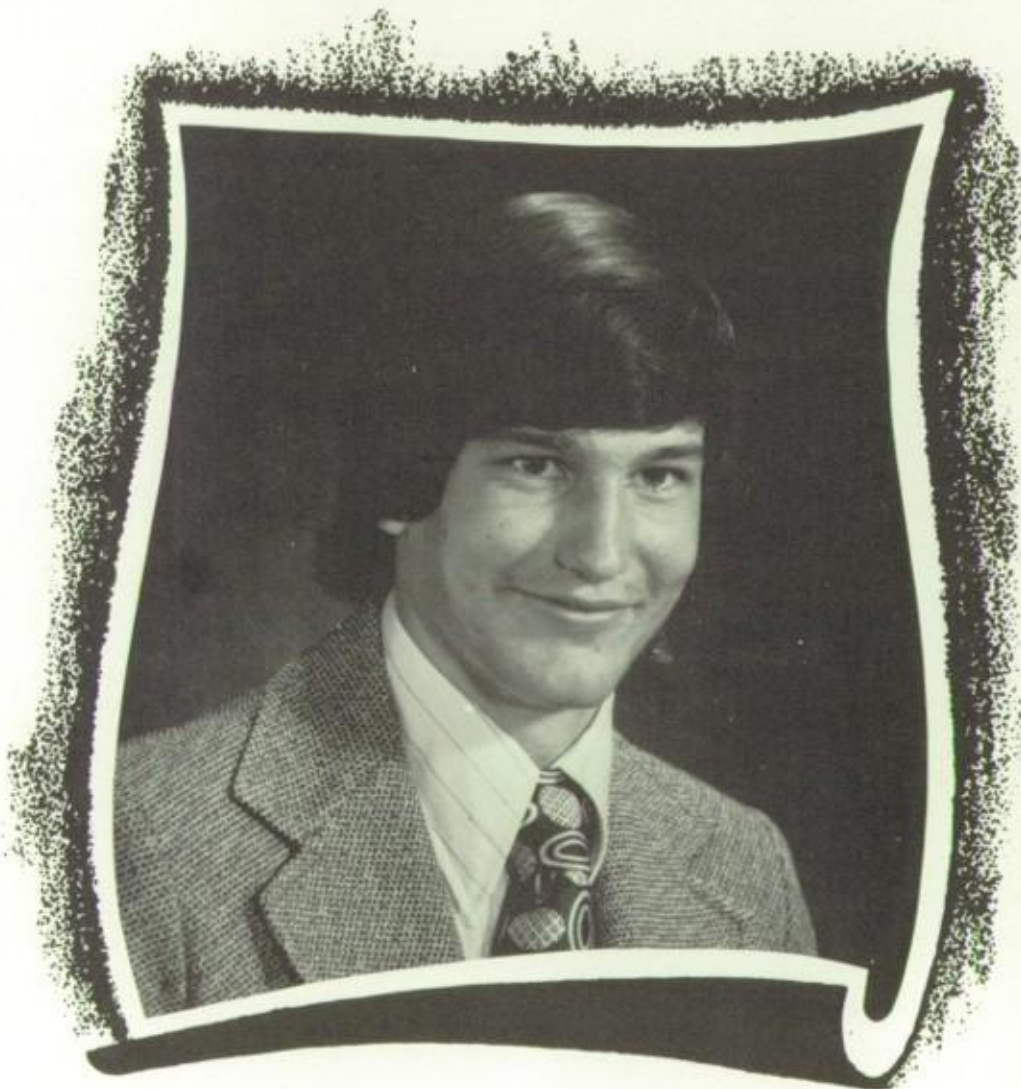

Sharon Sprinkel

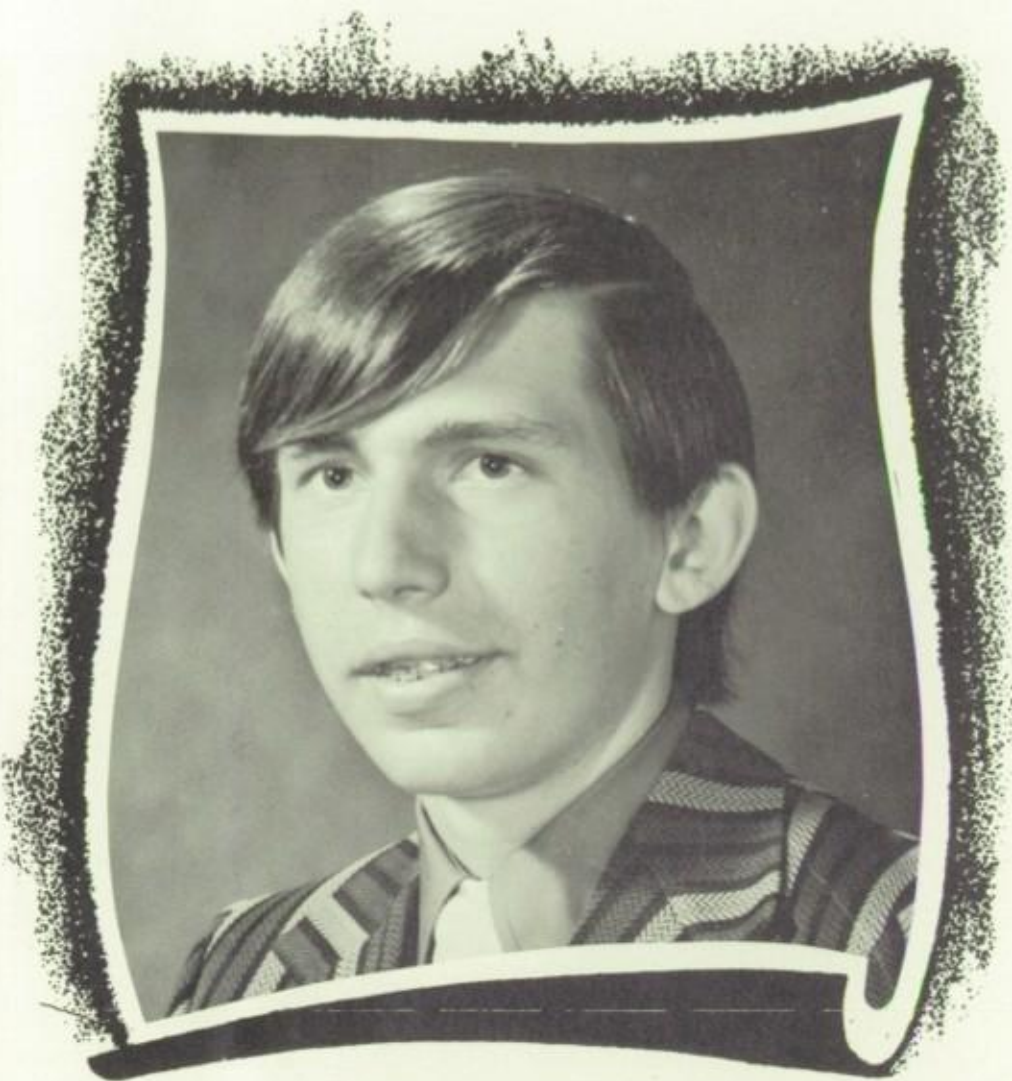

Bubbly and helpful are two of the best words used to describe Sharon Sprinkel. She has been a member of the Silhouettes for the past two years. Sharon also participates in various Young Life activities. She is helpful both to friends and to those she does not know. Sharon is one of the outstanding tour guides of Skyline Center. With the personality she has, it is easy to see why Sharon was selected for Who's Who.

John Talley

John Talley has a fine attitude toward life. He simply works to the fullest extent of his capabilities. John is in the architecture cluster and has been doing outstanding work. He is also a member of Skyline's varsity Football team. Talented, dedicated, and a respected member of Skyline's senior class, John will surely go far in life.

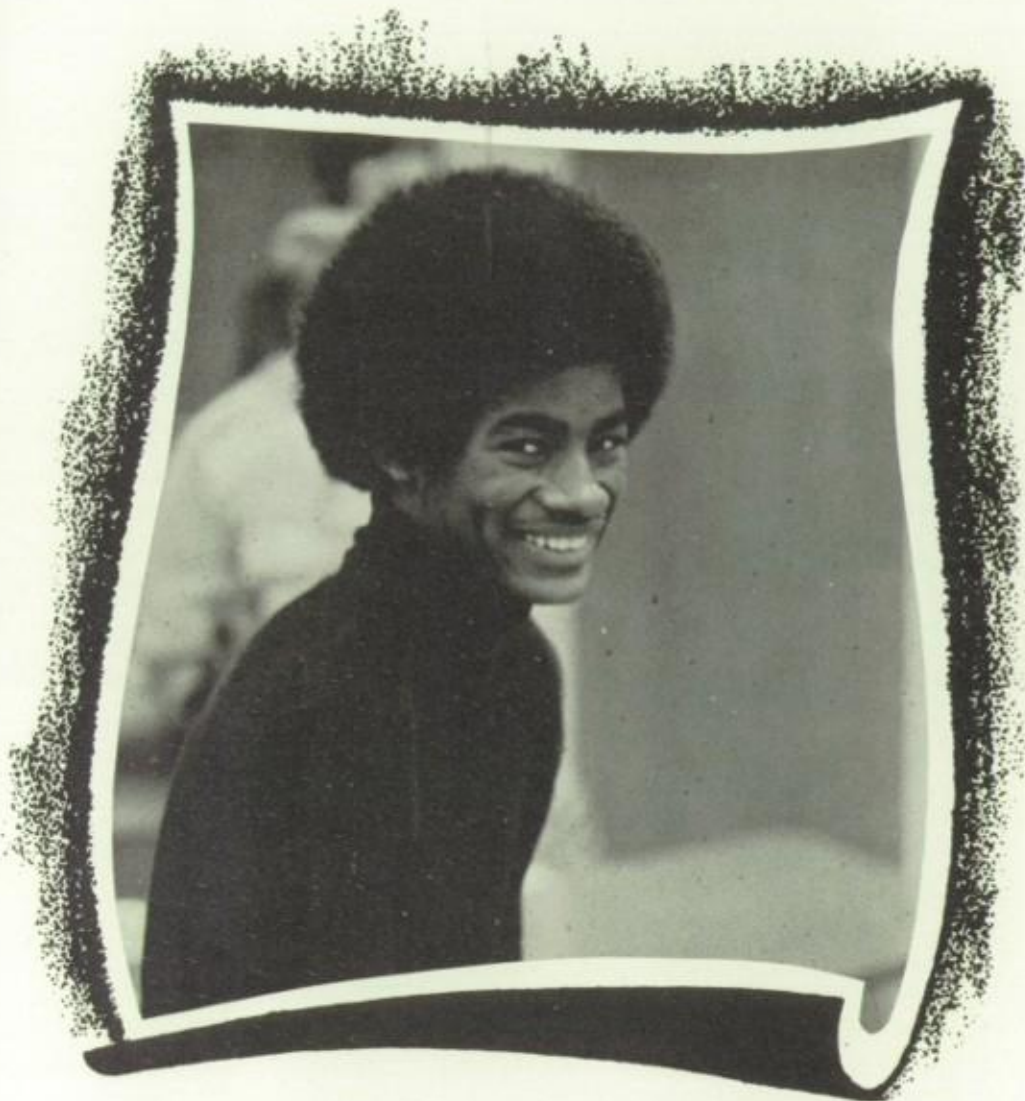

Peter Boecher

When Peter Boecher sees a thing that needs to be done, he does it, and does it well. A Library Student Assistant, he also helps train new students for work in the library. An active participant in the German Club, Peter is a German folk dancer. He also is a member of Mu Alpha Theta and OEA. Peter is a good example of the Skyline spirit, always ready to do any job well.

Danny Anderson

Danny Anderson cares about people. That is why he takes the time to be a manager for the football team. He is also in the Architecture Cluster, and from all indications, his future as an architect is very bright. Danny's attitude of concern both for his work and for other people will take him far in life.

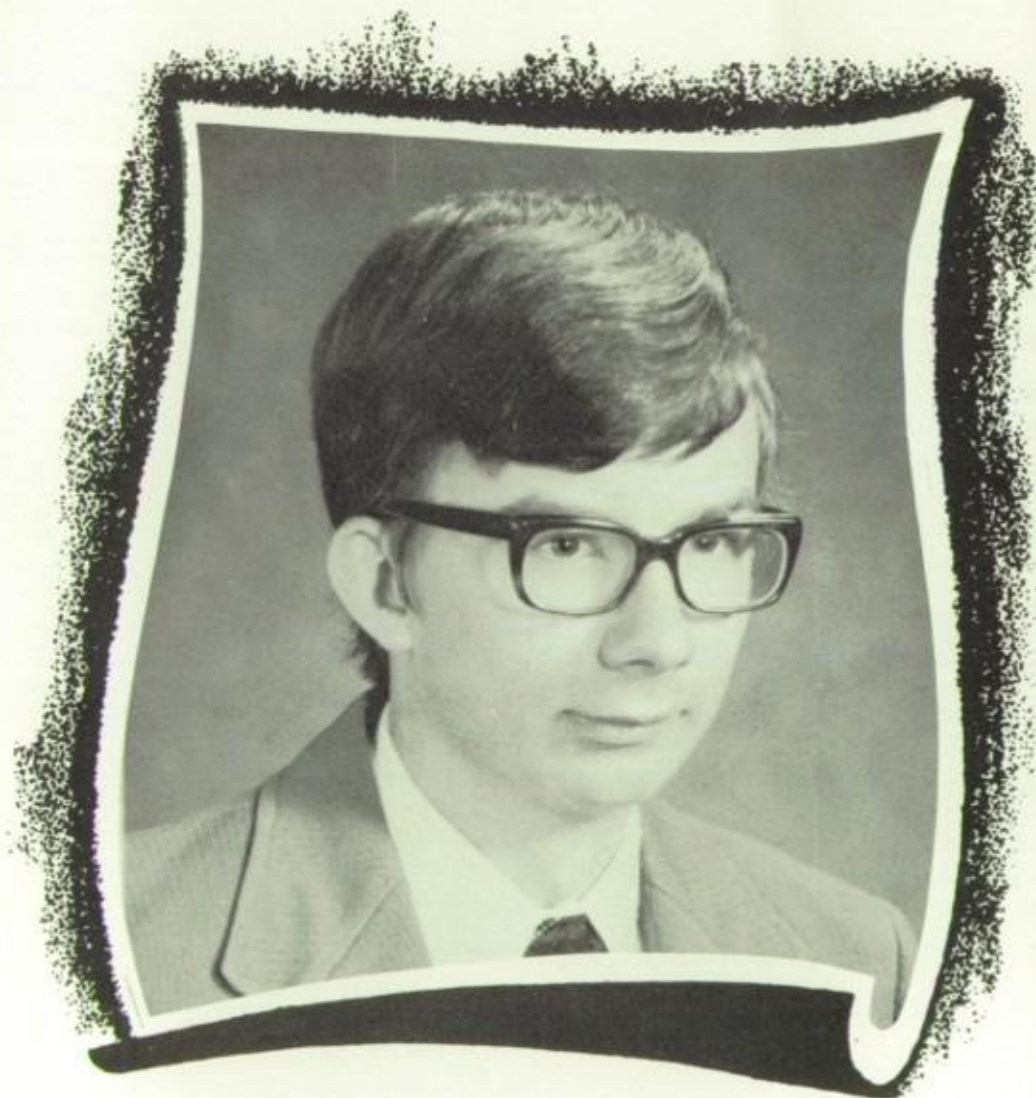

David Session

The artistic ability of David Session has enabled him to be noted as one of the outstanding students in the Architecture cluster. David serves as parliamentarian for the Architecture Vocational Industrial Clubs of America, and is a member of the Spanish Club. In a world of growth and progress, David's talent will surely lead him to a successful career.

Russell Bromley

Two words sum up Russel Bromley: active and involved. Since transferring to Skyline from White in his junior year, Rusty has been associated with numerous events at Skyline. As president of the German club, he has made it one of the most active clubs in school. He also participates in Key Club and National Honor Society. Rusty is also involved in the community as a volunteer at Children's Medical Center, and a past president of Dallas Red Cross Youth. Academically oriented, Rusty is a member of the Advanced Science Cluster, and there is little doubt that Russel Bromley has made numerous contributions to Skyline.

Jane Steed

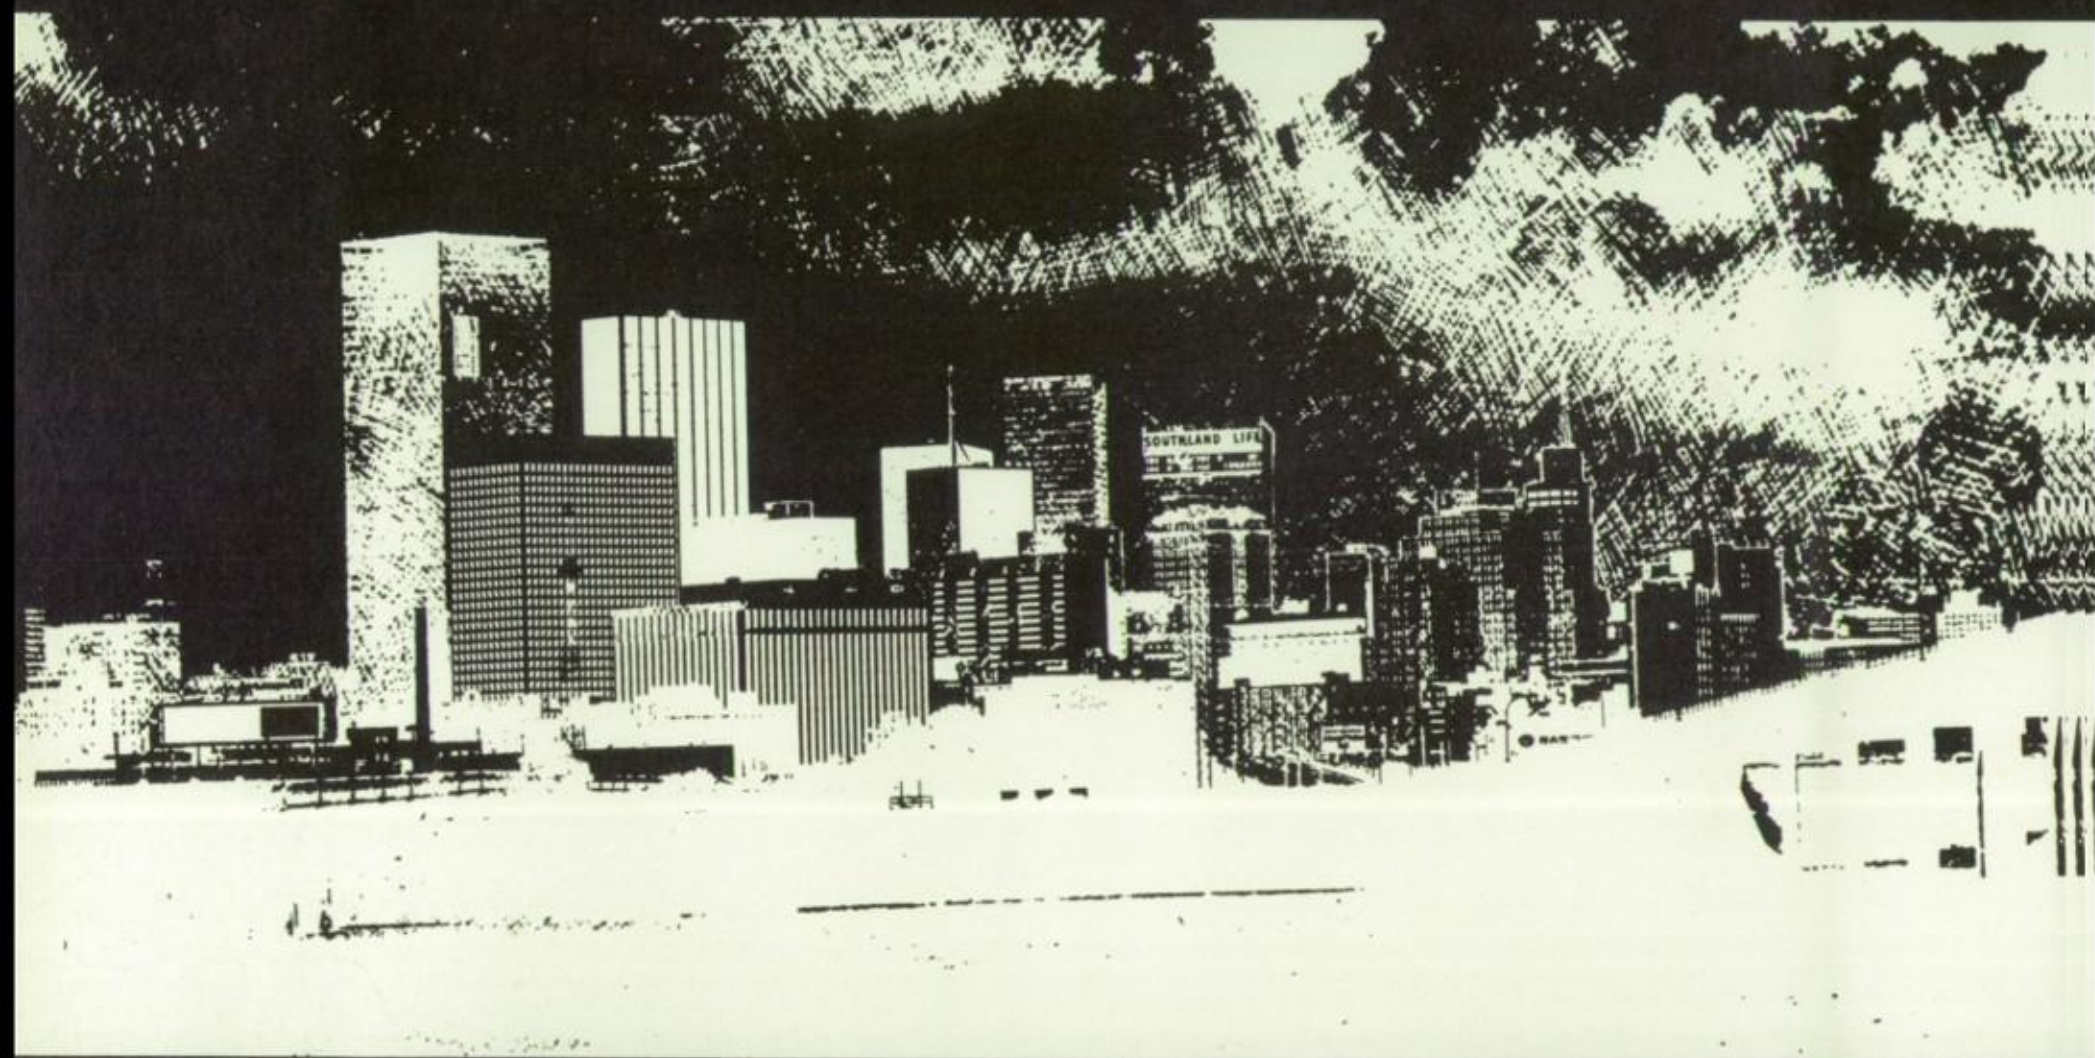

Jane Steed's musical talents have brought great joy and entertainment to many Skyline audiences. Jane has always been willing to accompany any group or individual and her great talent is often in demand. Her interests are not confined to music, however. Jane was a valuable member of the Origin staff reserving precious moments of her music practice time to help produce the yearbook. In addition she was a member of the Pub Staff, Student Senate, and the National Honor Society. Jane's quiet charm and her deep sensitivity to others make her a credit to Skyline and a friend to all.

Milann Ubernosky

Milann Ubernosky is a student any friend or teacher can always rely on regardless of the task she is given. Her sense of humor and friendliness make her a joy to be around. In service to Skyline she has been a member of many clubs and organizations including FTA, Service Club, French Club, Choraliers, Senior Pub, and National Honor Society. For two furious weeks Milann wrote paragraphs, cropped pictures, and laid out pages so that others could be honored in the Who's Who section of the Origin. It is only appropriate that her service and devotion to Skyline be likewise honored.

Key Club

Life is, for a SILHOUETTE, full of responsibility and enjoyment. Her morning hours are spent learning and perfecting complex routines so that Skyline can say that our half-time show is the best.

Marching in "The Parade of Champions" the state competition with the band, she represented Skyline and the pride of the student body. The SILHOUETTES; however, do not go unrecognized. They won fourth place

in pompom competition in a national convention held at S.M.U. this summer.

Many times it is her smile and enthusiasm that inspires the football boys and lingers in their memories. SILHOUETTES, we appreciate this portion of your life which you have dedicated to Skyline.

**DRUM MAJOR:
CHUCK BENNETT**

For the Skyline Marching Band, Life Is, waking up early to chilly mornings out on the practice field. Pep rallies in the auditorium and performances at football games where, at half-time, the crowd closely watches the band to see if the "lines are straight" and to see if anyone is "out of step". Each person is an important member of this dedicated group.

The Marching Band has participated in the "Parade of Champions" and the State Fair Parade. This school spirited organization is made up of 102 people, a small group compared to the large number of Skyline students and yet its function makes it a very necessary factor in the life of Skyline High School.

The band is led out on to the football field by the drum majors, Chuck Bennett and Mario Bowens, followed by the majorettes, Cathy Steyo, Danette McNew, Pam Shanahan, Janet Mikesell, LaMetra Willis, Karen Godek, and feature twirler, Teri Pierce. These nine colorfully uniformed members make up the head of this organization with each one contributing a major portion to the band's overall effect. The first place trophy at The All Star Twirling Camp was won by twirlers Cathy Steyo, a sophomore, and DaNette McNew, a junior. Teri Pearce, a junior, won a first place trophy in the Novice National World Two Baton, a second place in the Novice Flag routine, and an eighth place medal in the Intermediate Parade Majorette, at Notre Dame University with over 2,000 contestants from all 50 states and Canada.

It takes nerve, a little courage, and a lot of pride to be able to get up in front of four thousand students and yell yourself hoarse; these three qualities and many more are what made up this year's 73-74 cheerleaders. Six girls and two "dudes" were chosen last year for their personality, acrobatic skills, appeal, and for their great lung and mouth capacity.

Through the agony of defeat during a football game, the early morning practice, the sore throats, the skinned elbows, the jokes, the laughter, and the sudden "last game-blues," our cheerleaders have cartwheeled and jumped, and somehow survived.

BATTALION STAFF

Career Development Center

Life is remembering when you were small
And finding out for the first time
How much there is to learn;
Or dreaming with someone special
About all the things to be planned
Yet to do or just to hope for.
Life is the ups and downs
The temporary and the permanent,
But most of all . . .

Life is today.

Health Careers Cluster

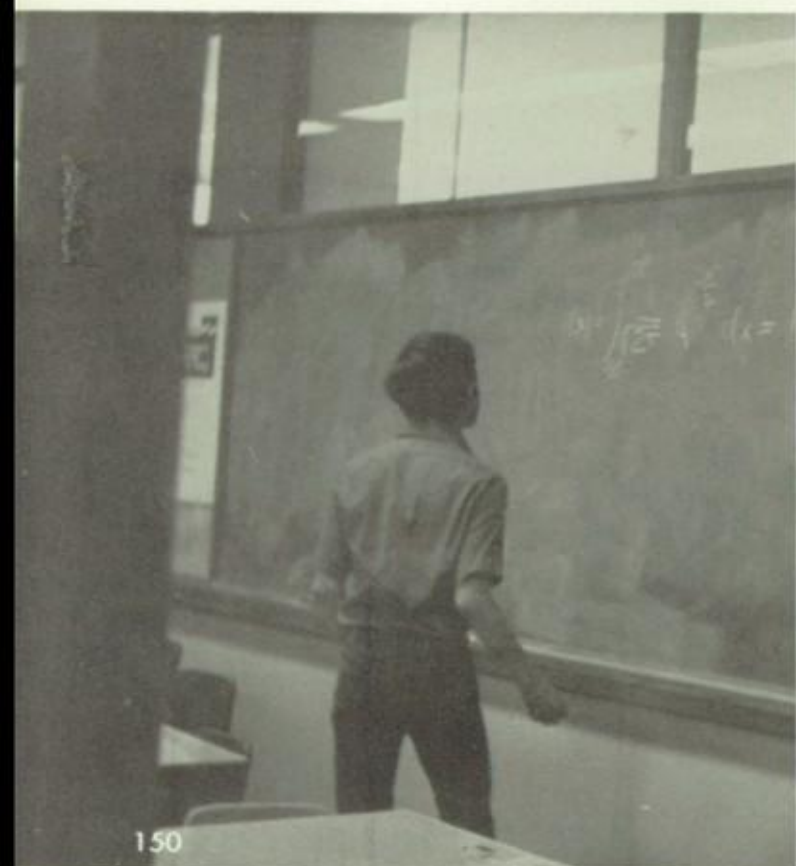

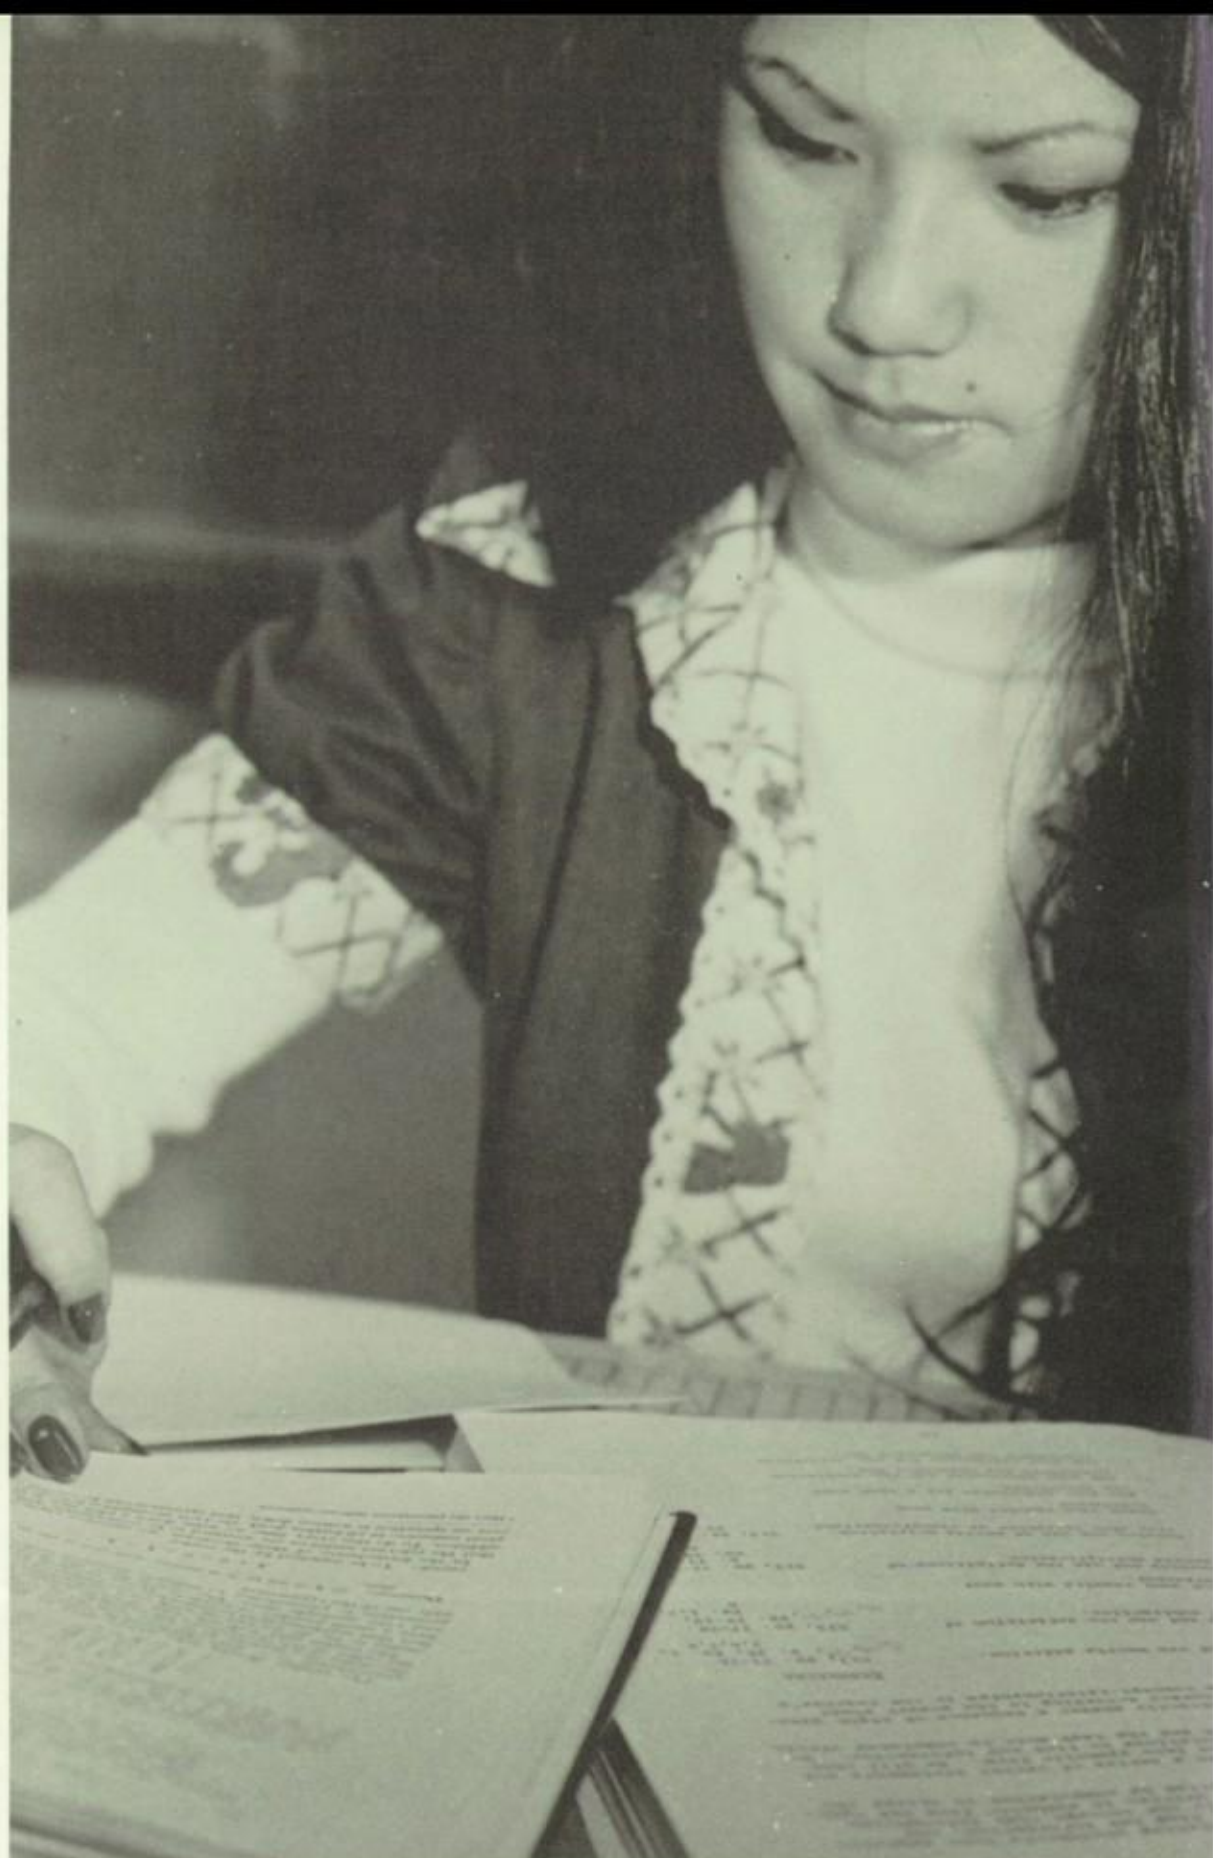

The Health Careers Cluster is divided into three courses: Medical Careers, Dental Laboratory Technology, and Dental Assisting. Medical Careers has a detailed exploration of the various medical fields for its first year students. The course is designed to equip the student to perform as a non-registered laboratory technician in a clinic or hospital. Upon completion of this two-year course, the student is capable of performing all routine laboratory tests.

The Dental Laboratory Technology course is a two-year program which includes basic and advanced principles of construction with dental appliances necessary to restore the mouth to normal function.

The third course, Dental Assisting, is a two-year course which teaches the basic knowledge and skills in the fundamentals of chairside assisting and dental office routine.

The Advanced Math Cluster allows the student to continue his mathematical studies in depth by offering two programs. The first area occurs during the fall semester and is the building of a background of statistical work. The work in combinatorics and probability theory includes a detailed coverage of both descriptive and inferential statistics. The second area involves an introduction to career opportunity by working with an individual or company involved in his career interest. The students are encouraged to participate in seminars involving students throughout the city. Computing equipment is available from desk calculators, tape printing calculators, programmable calculators, to share time on-line computer terminals.

Advanced Mathematics Cluster

7.95K

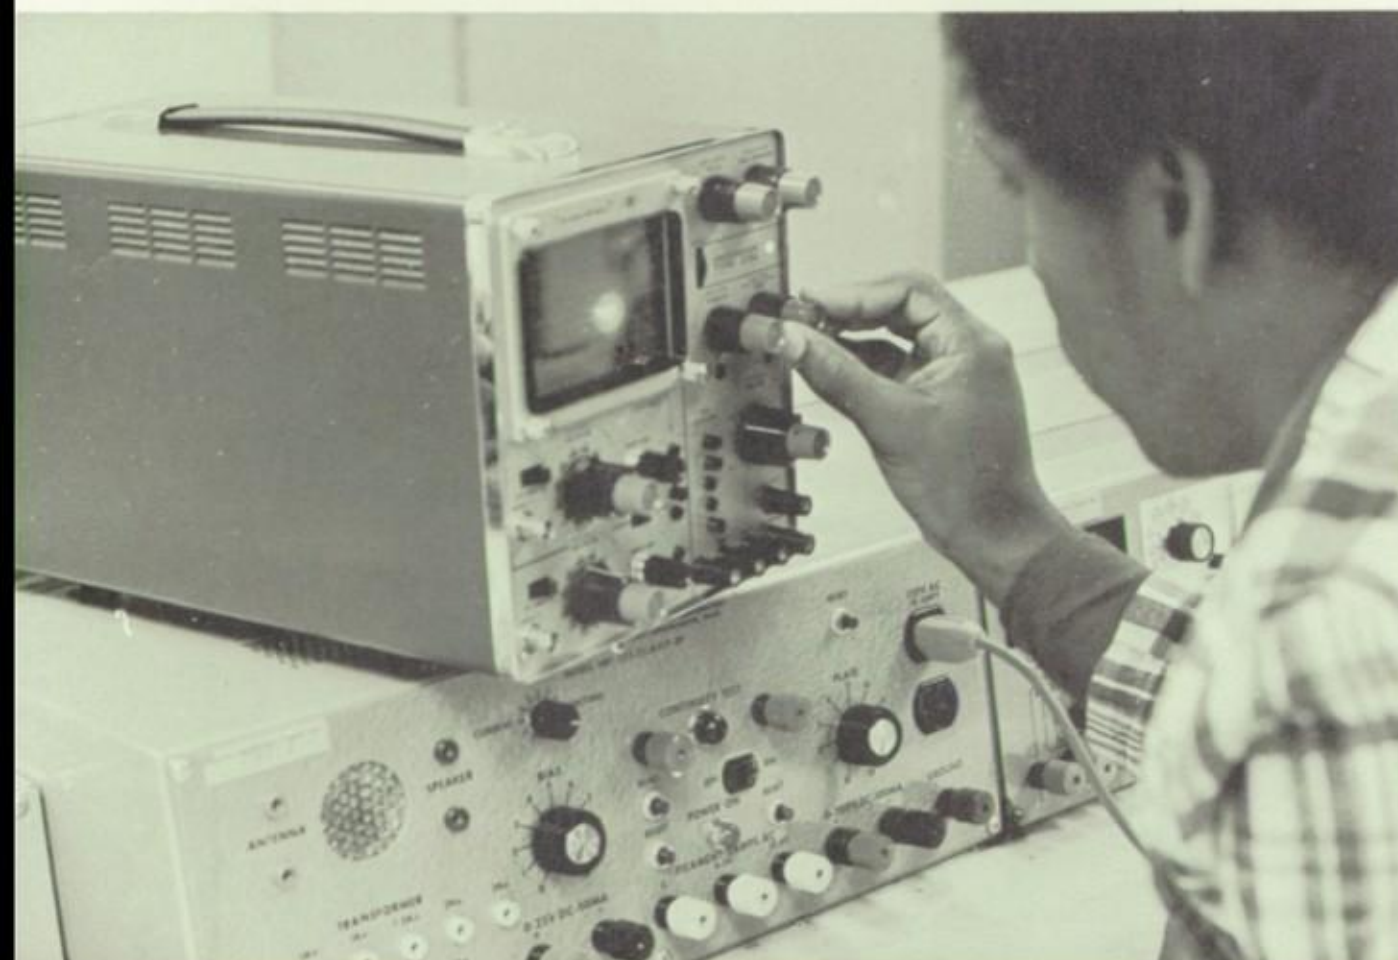

$Z = \sqrt{R^2 + X^2}$

$Z = 14.67 \Omega$

5.37 mA

Check all your answers before turning your paper in for evaluation.

If a student is advanced enough to progress in the program, the third year offers further specialization and work in his area.

Photographic Arts Cluster

The Photographic Arts Cluster is composed of two areas: Still-Photography and Cinematography.

The first year student in Still Photography learns how to handle a camera, location, and studio photography. He also learns how to develop black and white film and the process for color film.

In the student's second year he is given training in contemporary portraiture, commercial advertising, and color printing.

In Cinematography, the first year student is given a laboratory course and instruction for operating motion picture cameras, the process of color film, editing, lighting, and exposure. The student also studies good film composition and script writing. In the student's second year he may continue his study in his field of interest with an emphasis on printing, sound, film makeup, special effects, animation, film production, composition, lighting, and continuity.

Television Arts Cluster

In the Television Arts Cluster the students receive practical experience in the operation of audio and video equipment by working with it. These experiences develop the students' skills that are required of a technician operating a television program after completing the Skyline television course.

In the student's first year, he gains a working vocabulary and an understanding of the fundamental principles and concepts in television production. The skills that are available to him to learn are cameraman, floormanager, technical director, script writer, recording technician, and many others.

A second year student may specialize in industrial television or may branch out to gain experience and training that are related to what he learned in his first year.

Construction Cluster

To meet the manpower needs for the promising future in the world of Construction, Skyline is offering the World of Construction Cluster made up of nine construction trades.

General building trades is a one year course in general construction, emphasizing carpentry, bricklaying, and concrete masonry.

The construction Electrician lays out, assembles, installs, and tests electrical features, apparatus, and wiring used in electrical systems. They also install and connect electrical machinery, equipment, controls, and signal and communication systems.

Glaziers cut, fit, and install plate glass, ordinary window glass, mirrors, and many special items.

Plumbers and pipefitters are craftsmen who install pipe systems which carry water, steam, air, or other liquids or gases needed for sanitation, industrial production, or other uses.

The cluster also teaches the trades of bricklaying, cement, and concrete finishing, floor covering installation, painting and paperhanging, plastering, and lathing.

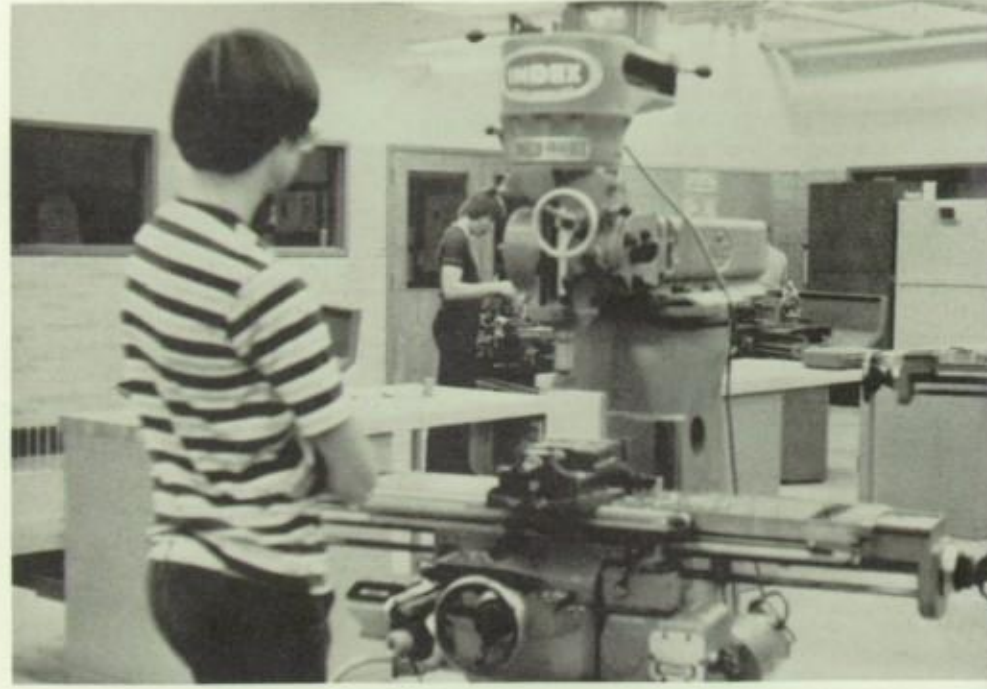

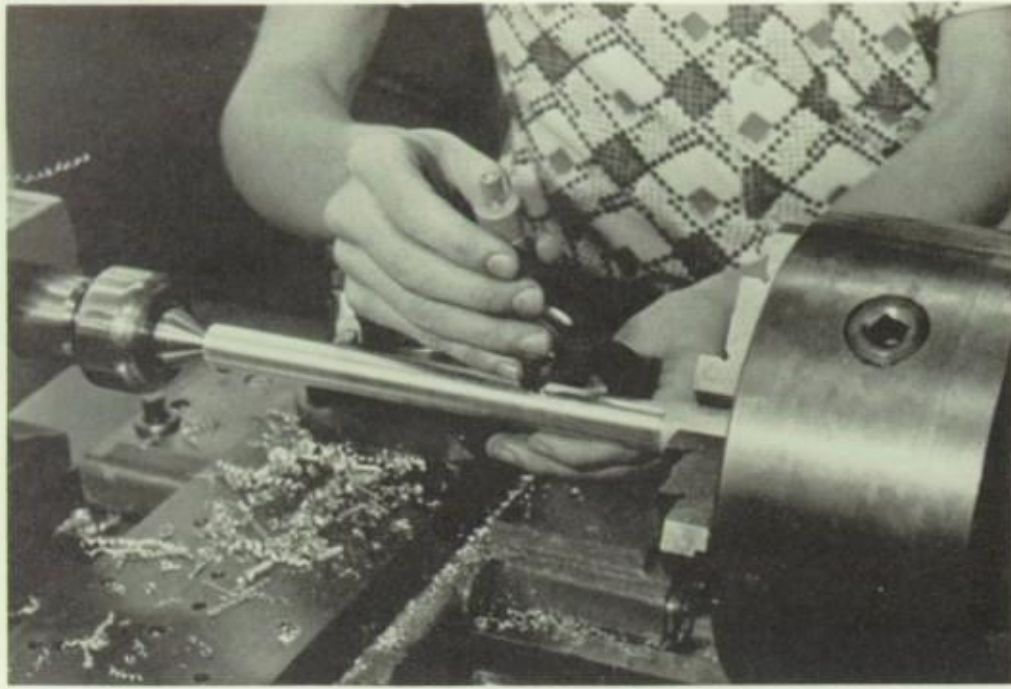

Transportation Services Cluster

The Transportation Cluster is divided into three subclusters: Automotive, Auto Body, and Diesel Technology.

The Automotive Technology Cluster is designed for students to learn, diagnose, test examine, adjust, rebuild, replace, or reassemble the parts of the automotive, electrical, hydraulic, or mechanical systems. A first year student learns safety regulations, the ability to use shop manuals, the four-stroke cycle internal combustion engine, to service the lubrication and standard transmissions. In the student's second year he builds the knowledge he gained his first year as well as learning to service the braking system, automatic transmissions, engine block, and others.

The Auto Body Technology Cluster provides the students with the knowledge of the techniques used in rebuilding and refinishing automobiles. In the student's first year he gains a working knowledge of the structure of the automobile and tools used in body repair. He may also specialize in the welding skills used, developing the ability to analyze minor metal damage, or the ability to straighten and smooth damaged sheet metal. A second year student may continue his accumulated experience and specialize in repairing collision damage, front-end repairs and alignment, refinishing, or collision estimating.

In the Diesel Technology Cluster a student receives first hand experience and a knowledge of the tools used in repairing and servicing diesel engines and diesel powered equipment. In the student's first year he learns tool usage history, and a knowledge of basic diesel engines. He may specialize in air intake and exhaust systems, cooling, fuel and many other systems. A second year student takes a study of modules, clutches, torque converters, and brake systems.

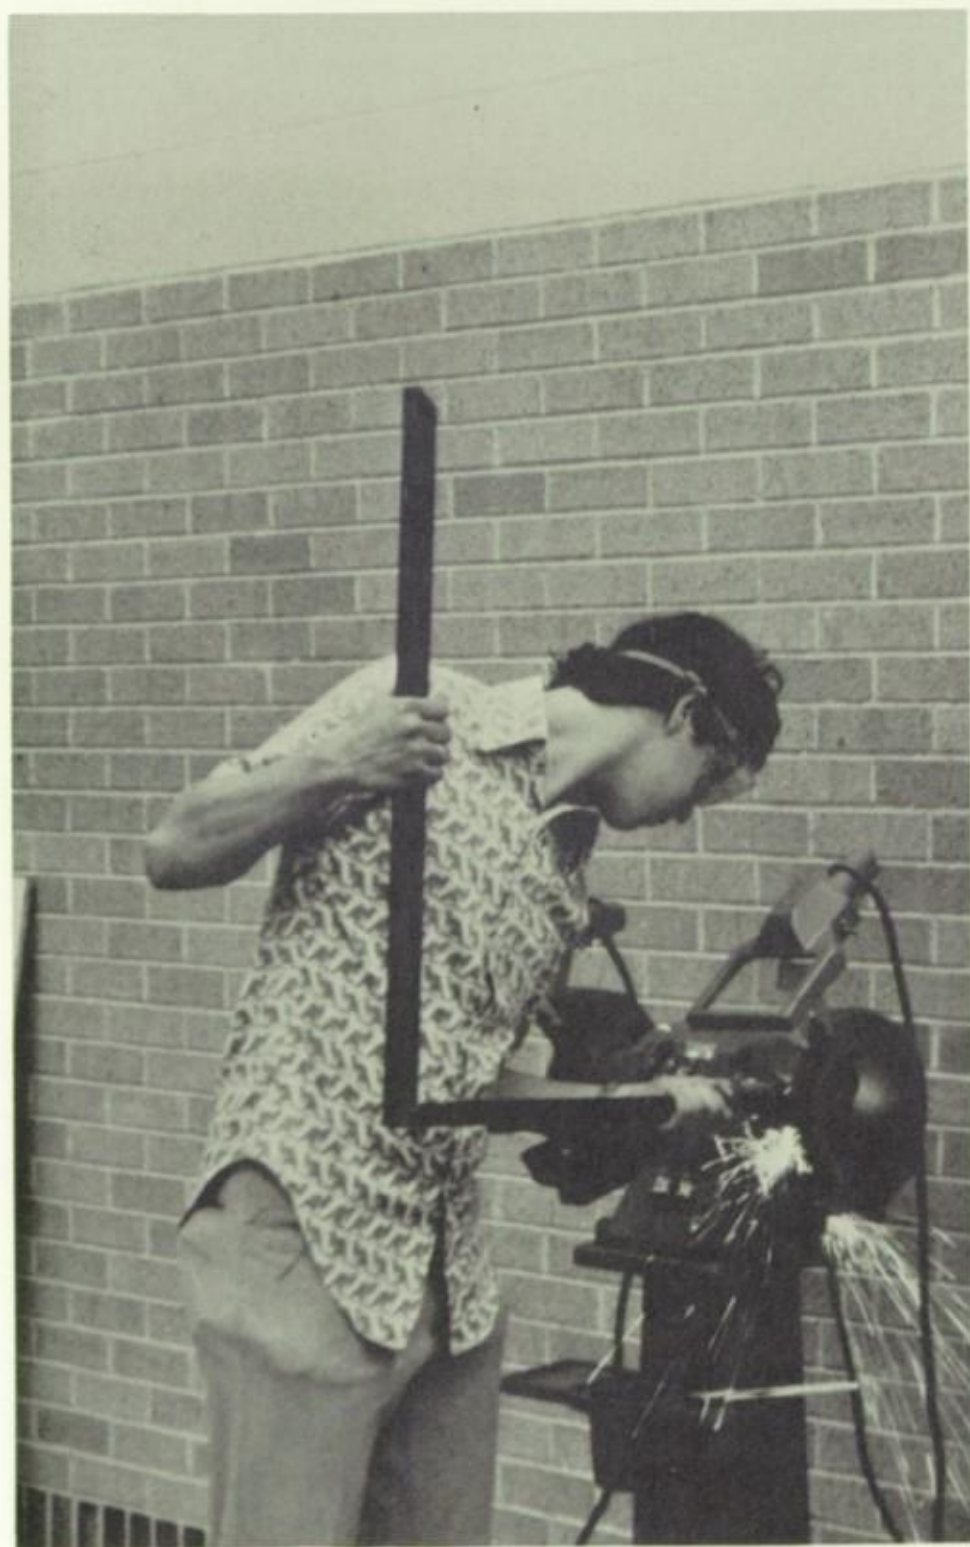

World of Manufacturing Cluster

The World of Manufacturing Cluster consists of five components: Quality Control, Machine Shop, Sheet Metalwork, Welding and Technical Drafting. The student of this cluster learns to make safety judgements, to develop industrial skills, and to acquire effective work habits.

A first year student in the Quality Control Cluster receives a working knowledge of basic metals, which are used for what, and how and why their structure is changed. They also attain a basic knowledge of heat treating equipment, blueprint reading, and the use of precision measuring instruments. A second year student studies mechanical measurements and tolerances, and internal and external gauges. They also heat treat metals, test and evaluate manufactured products, design and build models with mill designs.

The Sheet Metal Cluster trains first year students in blueprint reading and sheet metal layout. The students design and build various metal projects. In the students' second year they work in complicated layouts with triangulations and receive ship and field experiences by installing the ducts in the houses built by the Construction Cluster.

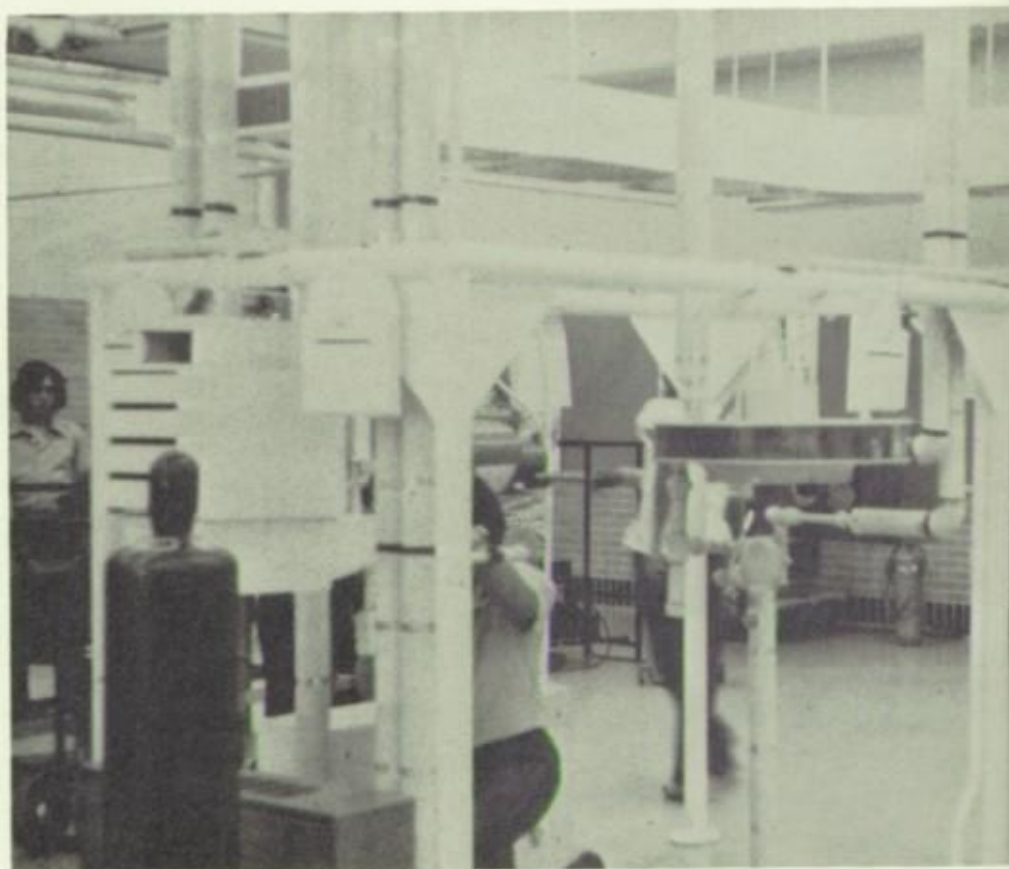

World of Environmental Control Systems Cluster

The World of Environmental Control Systems Cluster involves the student in learning to install, start, test, and make ready the systems for customer use.

In the student's first year, principles of refrigeration and electricity such as basic compressor repair, evacuation and charging of system, and refrigeration are taught.

A second year student receives on-the-job training programs where they will put to use the knowledge they gained their first year.

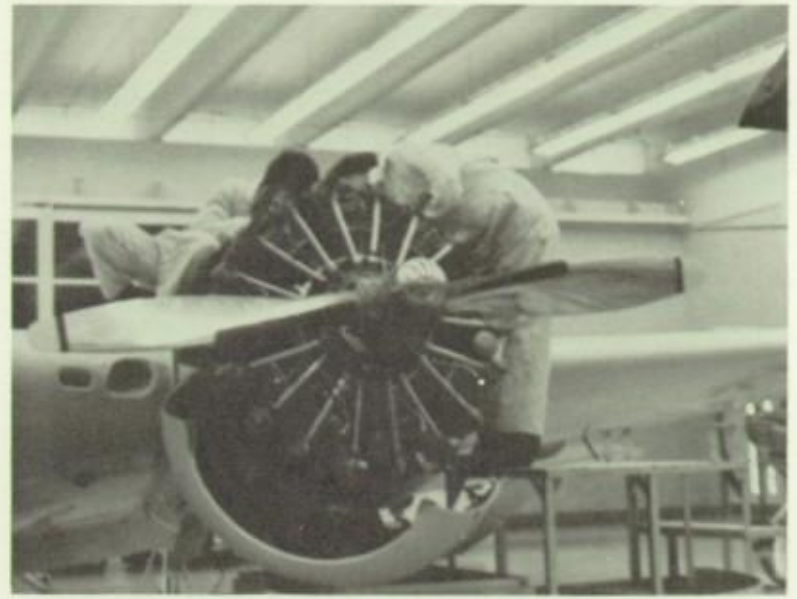

Aeronautics Cluster

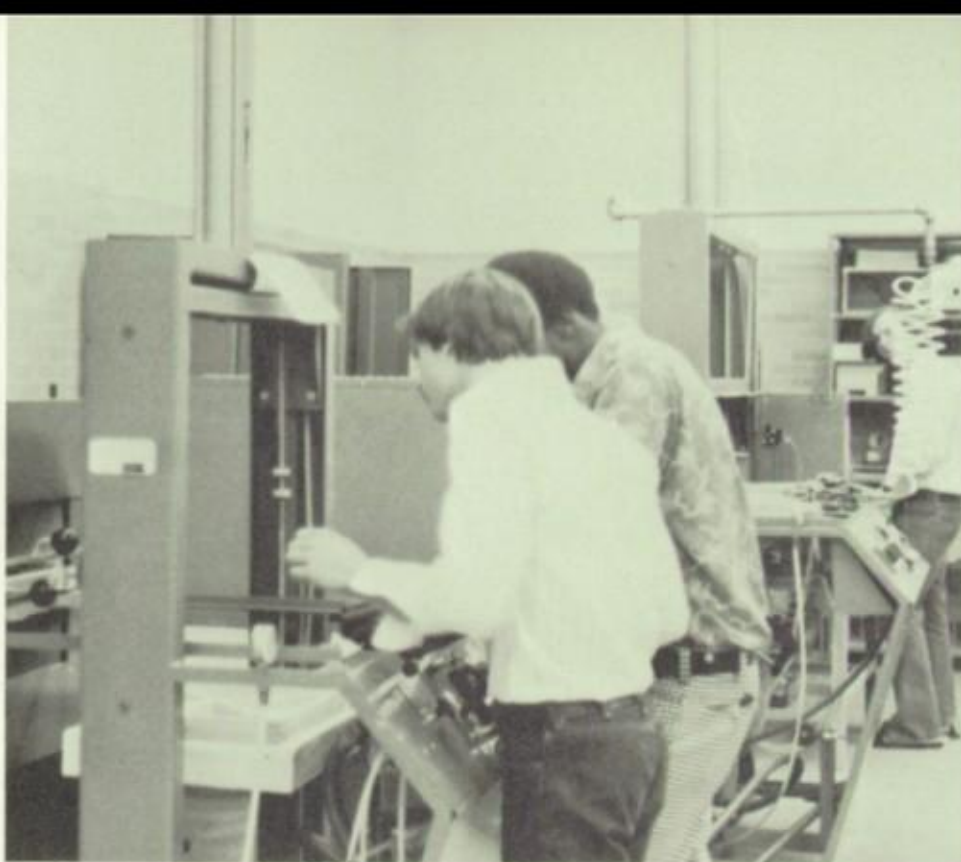

Aeronautics is a three year cluster designed by the Federal Aviation Agency to familiarize the student with the basic principles of aircraft operation. The 30,000 foot airplane hangar is furnished with classrooms, demonstration areas, and practice equipment.

A first year student learns the principles of flight, structure, and maintenance in modules of work.

A second year student may take Airframe, the study of the structural components of an aircraft, or Powerplant Mechanics, the study of the engines that make the aircraft move.

In his third year a student may continue his specialization that he selected in his second year. If he completes this phase, the student may be recommended to take F.A.A. examinations.

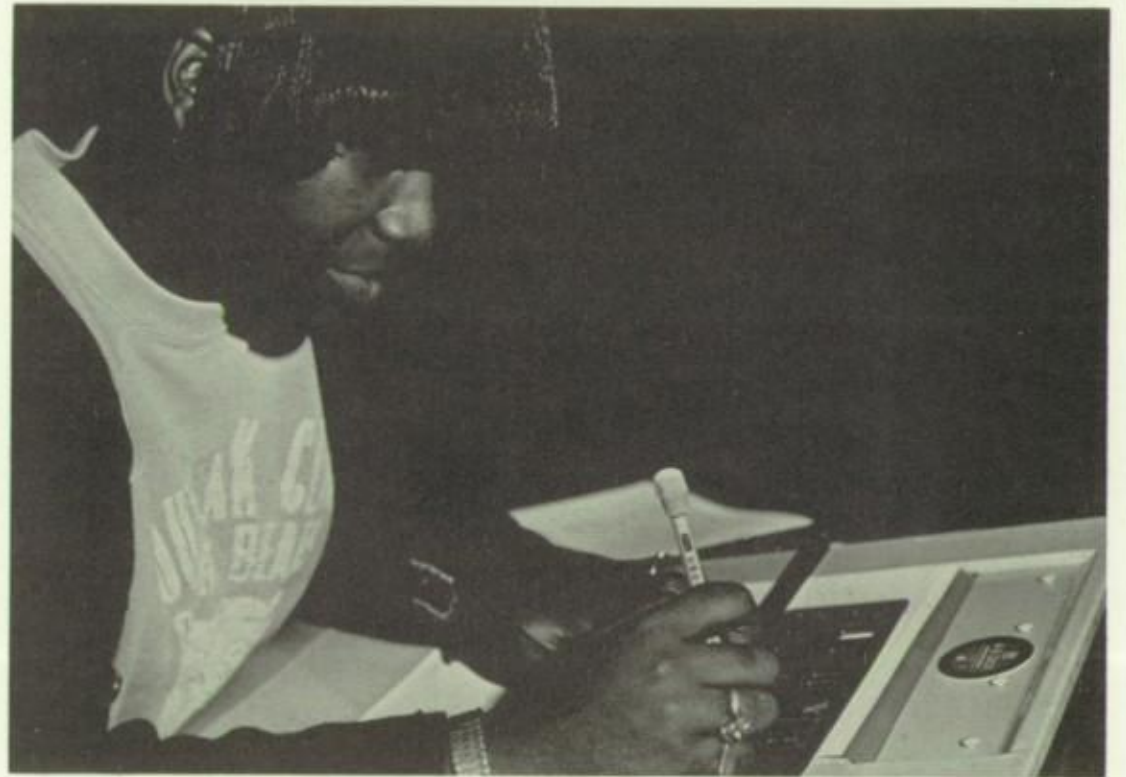

Plastics Technology Cluster

The Plastics Technology Cluster enables students to develop the skills for a comprehensive study of the plastics industry.

A first year student learns the exercises of plastic chemistry. He also develops skills in the various molding processes: injection, compression, extrusion, rotational, thermoforming, and cellular. Setting up, maintenance and operation of the machines as well as field trips are also on the student's agenda.

In the student's second year he develops skills in the fabrication and finishing of plastics, tool making, reinforced plastic molding, and decoration of the plastics. He also works on projects such as: dune buggies, sailboats, canoes, and many other articles.

Business And Management Careers Cluster

The Business and Management Cluster is composed of four areas: Advanced Accounting, Business Administration, Secretarial Science, and Simulated Office.

Before entering into these advanced areas of study a first year student needs to develop the basic skills of typewriting, shorthand, accounting, keypunch, office machines, and the concepts of American business.

A second year student may concentrate upon the area of her choice. Advanced Accounting offers instruction in skills necessary for an entry-job in bookkeeping or credit on college level. In Business Administration principles in finance, accounting, marketing, and personnel are taught. Students develop their shorthand and typing skills in Secretarial Science. Simulated Office offers an actual office setting in which students further develop their clerical skills.

World Of Fashion And Merchandising Cluster

The World of Fashion Cluster is a combination of three subclusters: Design and Pattern making, Apparel Assembly and Power Machine Technology, and Merchandising. For experience the cluster has set up a boutique "Our Place" where the garments made by the cluster are sold to the students and teachers.

In the Design and Pattern making section, first year students learn the basics of industry, art developments in design, pattern developments, power machine control, the cutting production. A second year student studies past designers; fall, summer, spring, and master patterns are also developed. Students learn to plan and forecast a given line, develop master patterns, and to grade patterns in all sizes.

The Apparel Assembly and Power Machine Technology Cluster first teaches Power Machine Technology with over-ride, hemmer, button, buttonholer, and bar-tack machines. In the student's second year she receives instruction in fabric characteristics, sample making, garment costing, style forecasting, pressing, and size-out.

In the Merchandising Cluster a first year student learns all about production, distribution, and sales of fashion; selling work is done as well in "Our Place." A second year student goes into an in-depth study of sales promotion and management duties. They are also given more freedom to pursue their career interests.

Horticulture Cluster

The Horticulture Cluster allows the student to have basic experience in five areas: landscape and design, nursery production, green house crop production, floral design and flower shop operation, and turf management. The students use commercial techniques for growing purposes and color, harmony, and design for arrangements and corsages. Laboratory experience is provided inside a greenhouse, floral shop, and large garden plot.

The student's first year gives him the basics of the five areas. After his first year a student may specialize and participate in that area's workshop.

Performing Arts Cluster

The Performing Arts Cluster is composed of three subclusters: Music, Dance, and Theatre Arts.

The Music Cluster is designed for students who have a musical background in voice or an instrument.

The core of the cluster is Comprehensive Musicianship which is taken by all students. In addition, the student studies in the area of his choice and takes part in one of the performing groups: band, choir, orchestra, or piano.

The Dance Cluster is contained in a large well-equipped air-conditioned studio in the "A" building. Most of the students have a classical or ballet background and are being taught on the majority modern dance. The second year student is involved in working in cluster groups.

The Theatre Arts Cluster allows the student a study in the six basic areas of theatre: acting, scenery, lighting, sound, make-up, and costume. In the student's second year he may learn directing and design as well as continue an in-depth study of his chosen area.

FRENCH HORN: Jon Farrier, Skipper Bayro, Steve Coffman, and Morgan Lyons. TROMBONE: Hunter Hillin, Wes Hackney, and Scott Nichols. TUBA: Nathan Gilley.

Visual Arts Cluster

In the Visual Arts Cluster, two types of "art" are taught: Studio Art and Commercial Art.

The Studio Art Cluster provides the student with a well-rounded knowledge of the fine arts as ceramics, pottery, metal, and clay sculpture, drawing, painting, and crafts. The students work in an artist-client relationship in order to prepare them for their professional roles. As seniors the students prepare a portfolio to use for job applications or for admissions into college or professional art school.

In the Commercial Art Cluster students receive a working knowledge of a variety of media, such as water color, pastels, and scratchboard. The student may specialize in storybook illustration. After learning airbrush, silk-screen, and basic animation the student may continue in technical animation, cartoon animation, airbrush illustration, special effects, and others.

Interior Design Cluster

The Interior Design Cluster provides the student with an overview of how an interior designer works. In this cluster, the student gains a knowledge of period furniture and architecture, textiles, fundamental drafting, building construction, blue print reading, fabrication media and methods, merchandising and market research.

The students have an opportunity to learn of the economical, cultural, and geographical influences throughout history. The students who are interested in becoming interior designers, may work with actual materials used in the application of designing concepts and will practice actual job contracts with clients to completion.

Man And His Environment Cluster

The Man and His Environment Cluster is designed to provide an opportunity for the students to explore many areas of social science including sociology, psychology, anthropology, political science, economics, comparative religion, education, and law in a changing society.

Students may choose from a variety of activities which are appropriate to their career interest. The activities include community observation and participation.

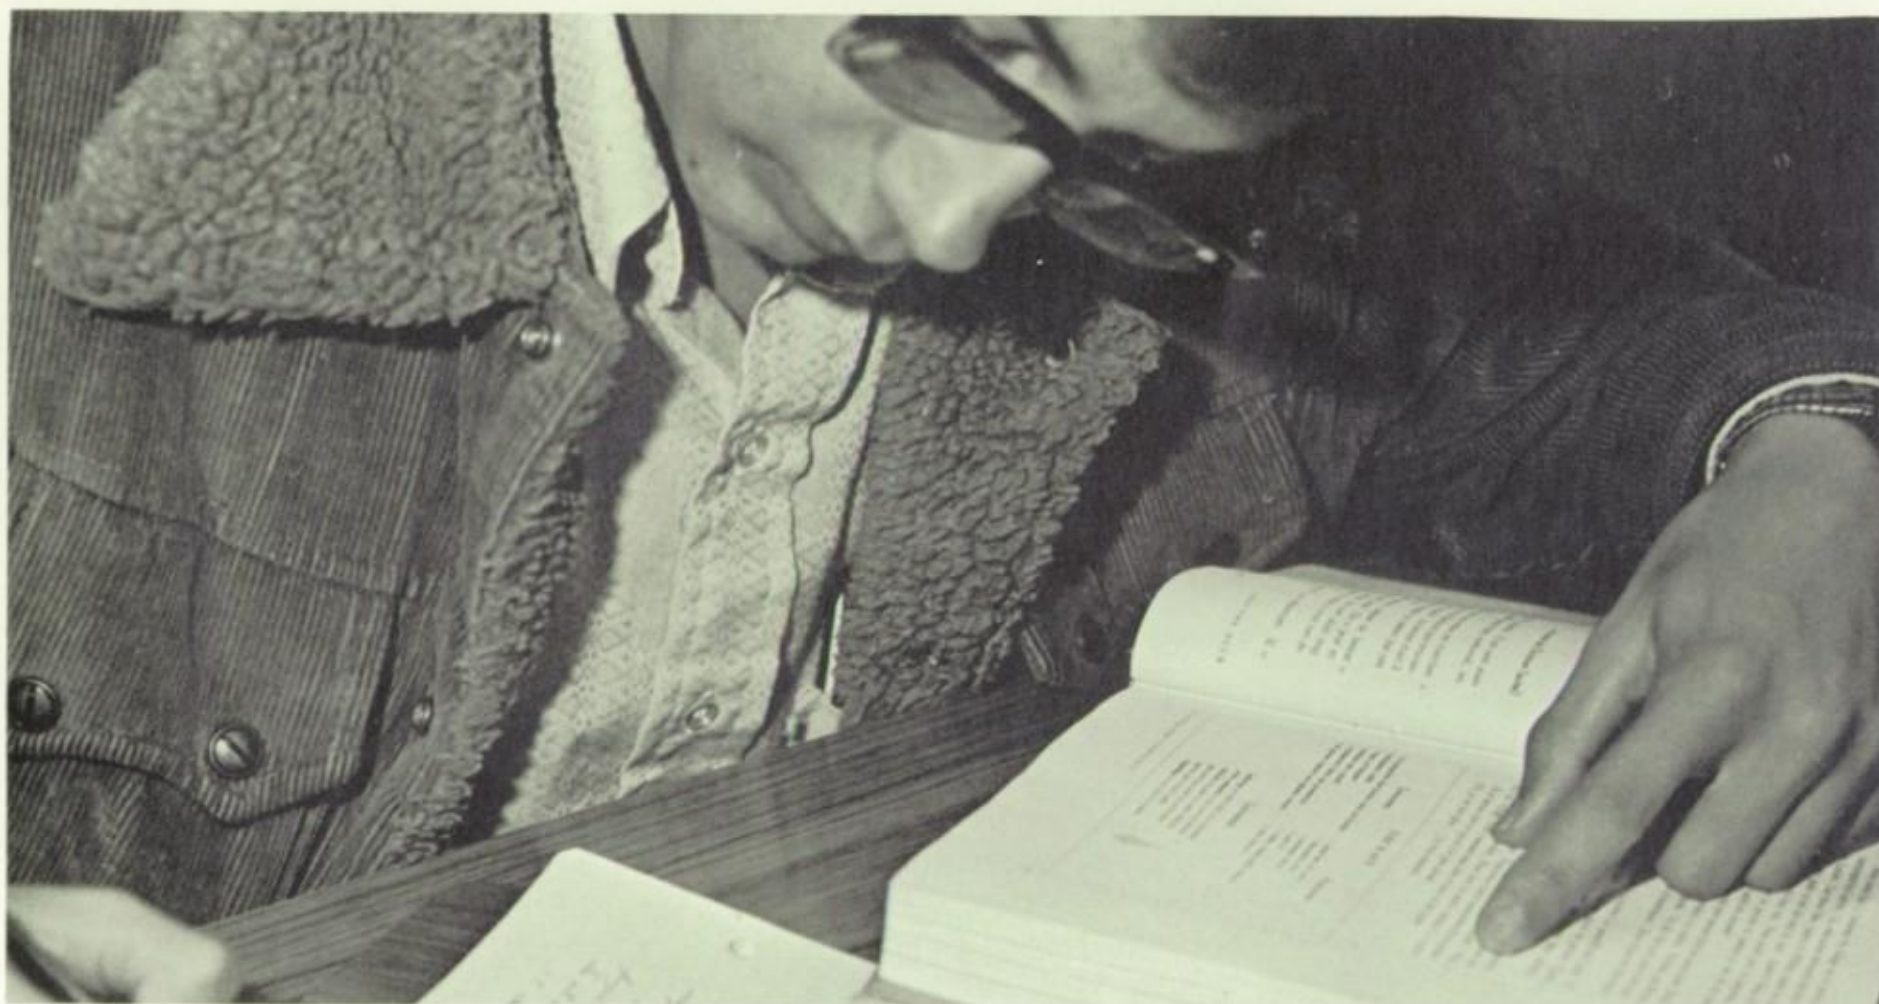

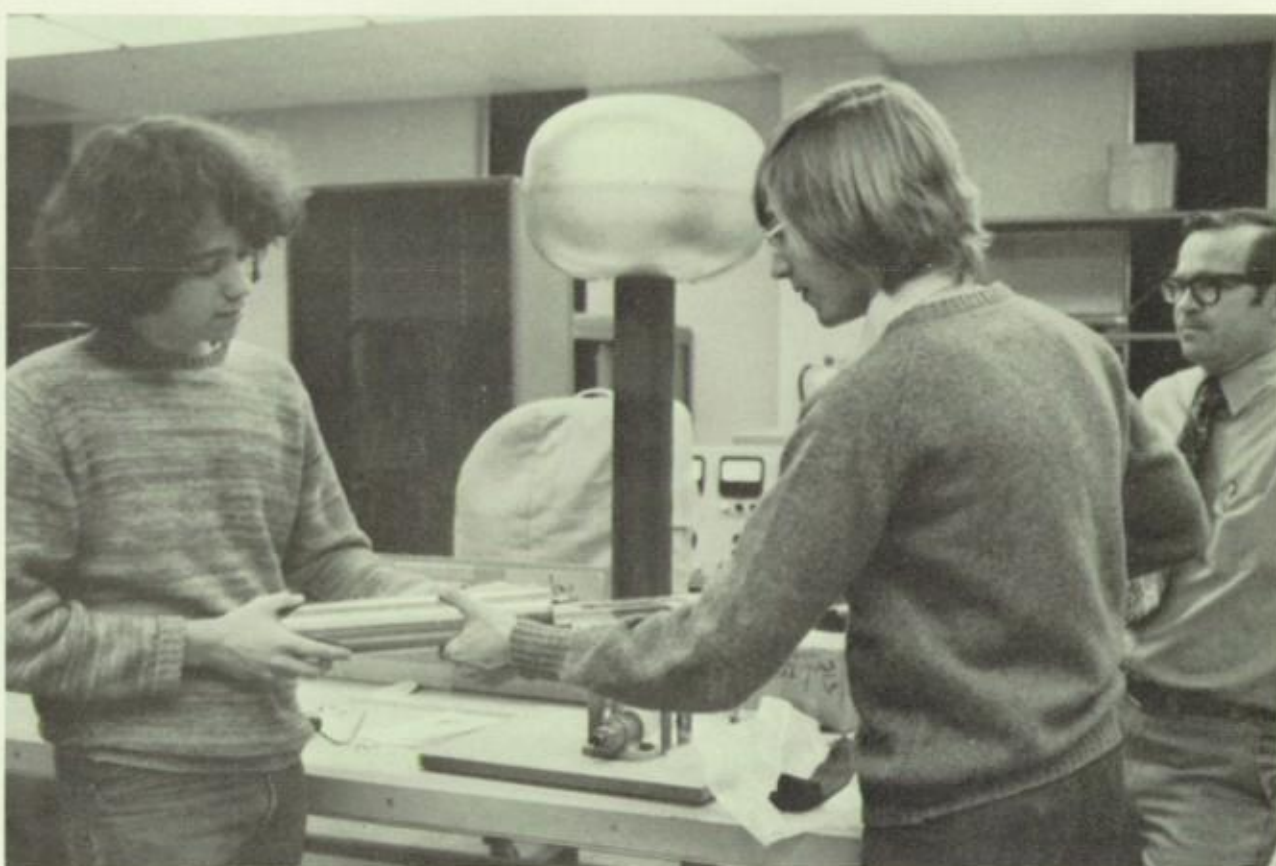

World Languages Cluster

The World Languages Cluster offers a program of advanced study to help students who are pursuing a career that requires a background in oral and written skills in foreign languages.

A first year student receives an intense advanced study of French, German, or Spanish. Beginning studies are available in Russian, Italian, Hebrew, Swahili, and Greek.

In his second year a student may continue studies in a certain language or languages.

Advanced Science Cluster

The Advanced Science Cluster is coordinated to meet the needs of students who are advanced in science. The curriculum is academically oriented to meet a variety of individual needs. With its extensive research equipment, the curriculum provides unlimited opportunities in student research.

The course is designed so that a student will have a more intelligible career choice in science, a variety of laboratory skills, and possible advancement in college science work. The cluster has three more areas of study: life science, chemistry, and physics, along with two sub-clusters: math-science and museum biology composed of study topics.

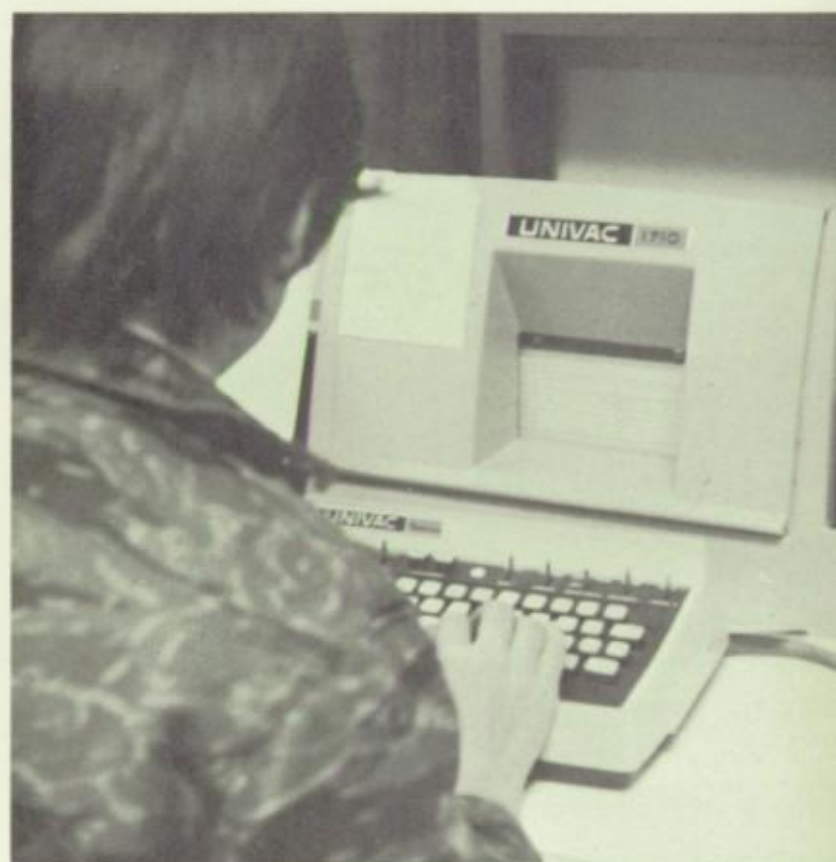

Computer Technology Cluster

The Computer Cluster is designed into three courses: Fundamentals, Programming, and Operations.

Fundamentals is the introduction which lays the ground work for concepts and skills needed for later concentration in the student's specialty. This course gives an overview in the characteristics and uses of computer language types.

The Programming Course works with the student on flowcharting and problem-solving activities.

The Operations Course emphasizes computer operation principles with much work on the onsite computer.

Graphics Communications Cluster

The Graphics Communications Cluster prepares students to meet demands in all phases of the industry. The course is designed to familiarize the students with the lithographic letterpress, operations and production, and to prepare him for post-training for proofreading, photo mechanical preparation, plate making, and many others.

In the first year of this cluster the students learn hot metal composition and they work mainly with the letterpress and bindery. Those students who can type 40 words per minute can go into cold type and learn photocomposition.

In the student's second year, he learns offset lithography as well as camera work, stripping and paste making, and offset presswork.

Architectural Technical Drafting Technology Cluster

The Architectural-Technical Drafting Technology Cluster is composed of Architectural Drafting and Technical Drafting.

In the Architectural Drafting course the student learns professional drafting skills for those interested in entering an architectural office as an architectural draftsman upon graduation, or for those interested in pursuing a professional five-year architectural degree. The entering draftsman studies design, technique, and composition, and may choose one of seven areas of study and major in that area: architectural structures, equipment of buildings, commercial and residential design, city planning, landscape, architectural delineation, and models. The emphasis on form, space and structure are also explored.

The Technical Drafting course includes as drafting fields: machine, structural, topographical, map, electrical, and full color renderings of machine parts. Machine drafting includes the design and drawing of machine parts, assemblies and complete machines, detailed drawings of individual parts, and special elements such as gears and cams.

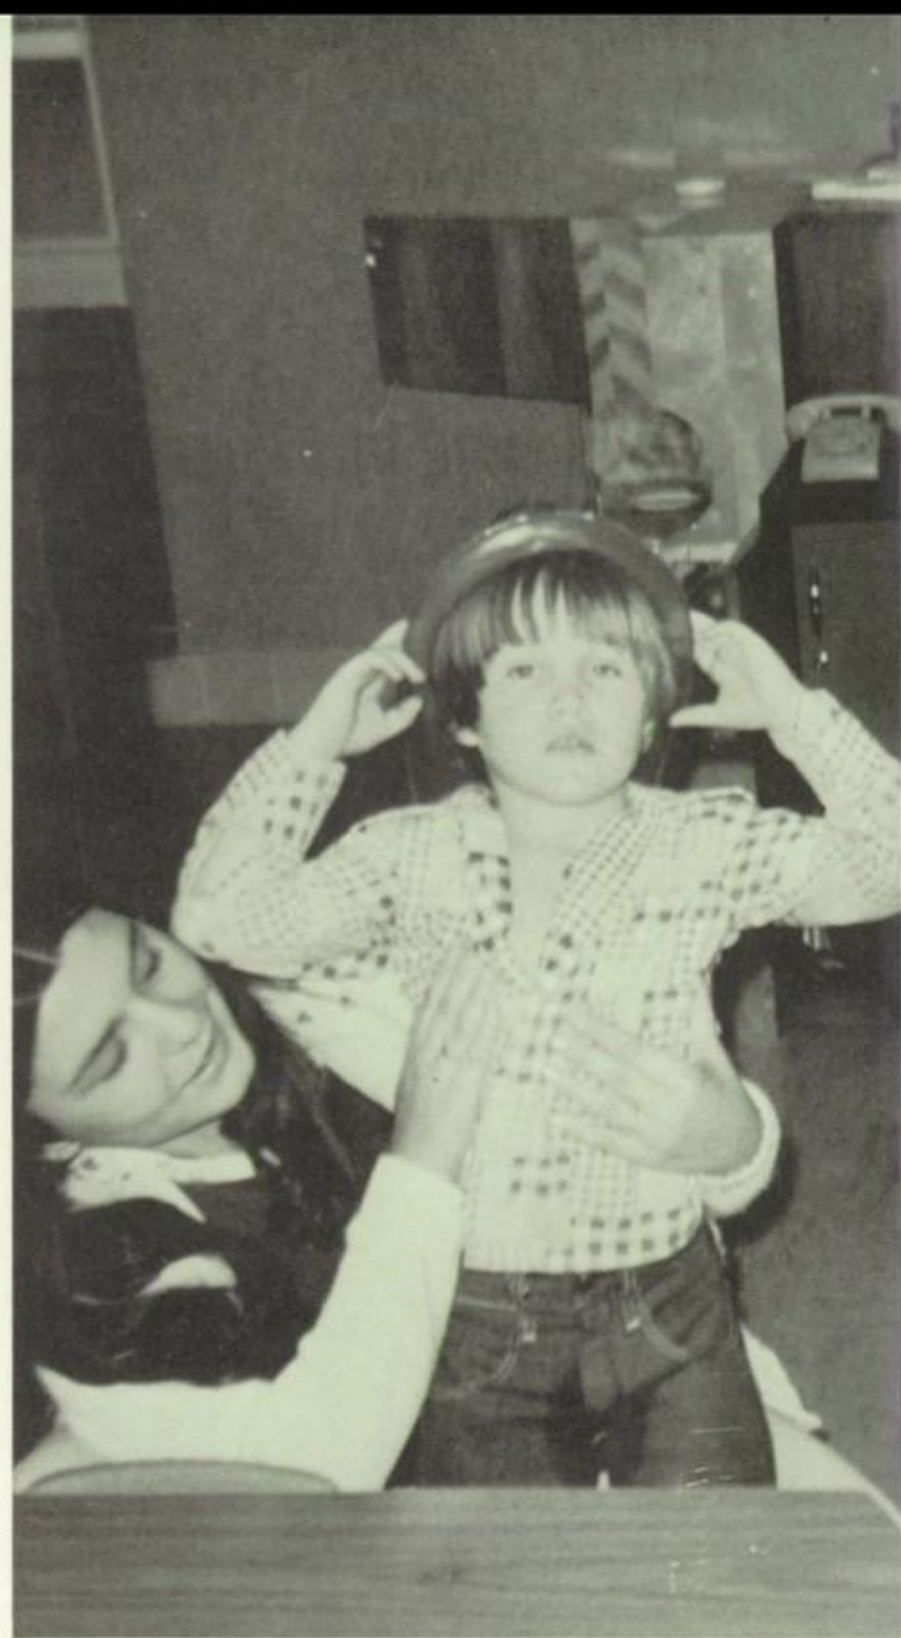

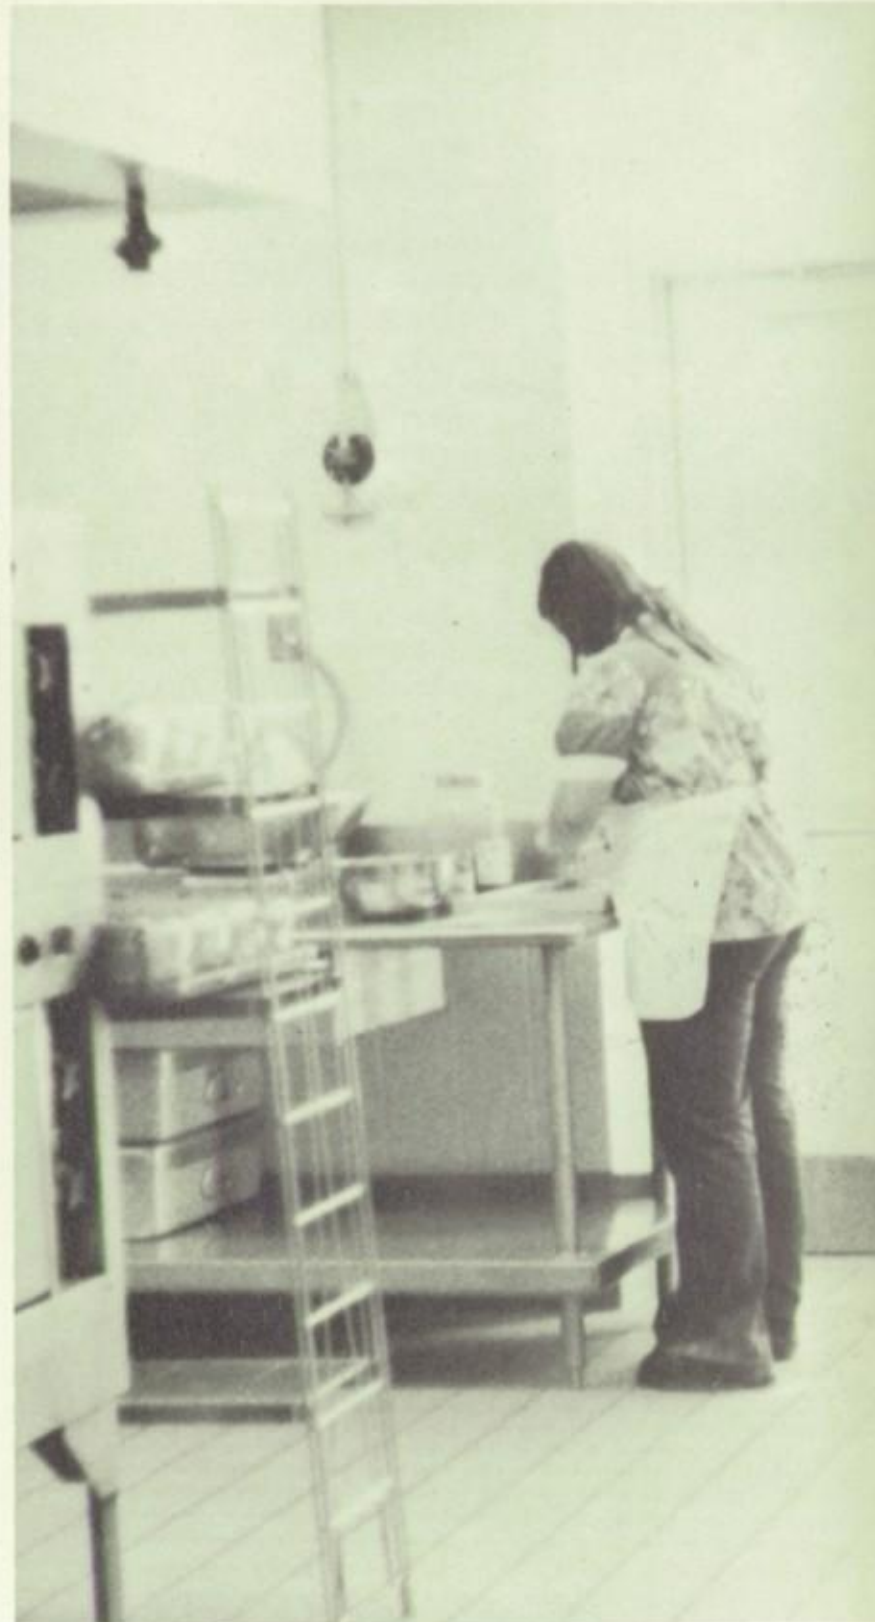

Child Related Professions Cluster

Phase I of the Child-Youth Related Professions Cluster is a mandatory introductory training unit. The groundwork for studying children is laid by studying the living patterns of socio-economic levels and socio-cultural backgrounds which affects a child's psychosexual development. Living and buying patterns determine the physical and intellectual growth. Emotional and psychological growth is influenced by the family's life style, and social goals and growth patterns are also related. A unit in nutrition for children is included during Phase I.

Phase II prepares the student for becoming a child care aide and kindred types of work. Students learn how to understand the normal preschool child's behavior as a family member and participate in preschool life, how to work with parents and help them help their child. On-the-job training provides food preparation skills; this and Phase I produces a well-trained child-care aide.

Phase III offers a look into the various professions of education, medicine, nursing, occupational therapy, psychology and psychiatry, law, social work, recreation, and interior design. It allows the student to study mentally, psychologically, emotionally and physically handicapped children, legal procedure, health care for children, plus clothing, recreation and furnishings for children's rooms.

Food-Service And Management Cluster

The Food Service and Management Cluster provides training in the field of food preparation and service. The teachers are experienced in this industry and, using the most advanced equipment, they help the students learn by allowing them to practice on the faculty of Skyline.

In his first year a student learns the basic principles of sanitation and hygiene, the equipment used, and converting recipes as to weights and measures. He is also trained in pantry work, breakfast cook, vegetable cook, fry cook, soup cook, broiler cook, roast cook, and baker.

The second year student gets two weeks of on-the-job training in the basic fields as well as training for cashier, steward, and manager.

Cosmetology Cluster

The Cosmetology Cluster offers the student, for two years, training in beauty culture. It requires a knowledge and understanding of the underlying theories and occupational information related to the beauty industry. The cluster develops the ability to perform manipulative skills and to operate the machines and equipment of this occupation.

All students have the opportunity for personality development by learning the techniques for working with people in the field of cosmetology.

During this two-year course all Texas requirements for licensing preceding employment in the beauty industry are met and after graduation a student may take this test without any further training.

English-Journalism Cluster

The English-Journalism cluster offers students career training for jobs in various fields of communication. Students work individually on mini-courses in journalism, poetry, short story, magazine articles, and drama. The cluster emphasizes practical training in writing skills. Experienced writers from local newspapers and magazines give students valuable career hints and guidance.

Classes

A black and white photograph of a graduation stole. The stole is dark and has a textured, possibly knitted or beaded, appearance. A large, oval-shaped medallion with the number '74' is prominently displayed on the stole. Above the medallion is a small, circular ornament. A white sash is draped over the stole, and a white ribbon is tied in a bow on the left side. The background is dark and out of focus.

Raiders Muscle Past Carter, 20-18

The game started with a minor tragedy. On the opening kickoff Skyline fumbled the ball, thus giving Carter excellent field position. The Cowboys took advantage of the situation and scored from the one with 8:24 left in the first quarter. Fortunately the extra point attempt was blocked.

The Raiders countered with a 7-yard TD run by Mike Sandone. Billy McBee's attempt for the extra point was wide to the left. A Carter score brought the halftime count to Skyline 6, Carter 12.

In the third quarter the locals marched downfield and Quarterback Jim Jennings threw a 12-yard strike to Charles Green for the score. McBee's kick was good with 4 seconds left in the quarter.

A Carter score soon brought the tally to 18 to 13 but the Raiders would not be lassoed. Jennings scored on a quarterback dive from the one with 4:07 left in the contest. Final score was Skyline 20, Carter 18.

Stallions Kick Skyline

It was a Skyline-North Mesquite game for the third year in a row — minus the rain. One tradition remained, Skyline lost.

Three interceptions by North Mesquite held the Raiders scoreless until the fourth quarter when with 5:09 left, Steve Hollywood went across from the twelve for the touchdown. Billy McBee's PAT was good.

But to no avail, because Skyline was already down by twenty points. Thus the Raiders lost 26-7.

Raiders Top GP

The Grand Prairie game started on an uninspiring note with the Raiders fumbling the opening kickoff. This gave the Gophers good field position in Skyline territory. But thanks to the Raider defense the Gophers did not score, for a while anyway.

With 3:25 left in the first quarter, Levelle Lee of Grand Prairie scampered 25 yards for a Gopher touchdown. The PAT was good and the score was Grand Prairie 7 Skyline 0.

Early in the second quarter Skyline replied with a 7-yard touchdown run by Mike Sandone. The extra point attempt by Billy McBee was good. The Gophers took the ensuing kickoff and marched downfield to score another touchdown. The extra point was good and the score at the half was 14-7 in favor of the Gophers.

Quarterback Jim Jennings, pushed across from the 2 for a touchdown. The PAT was no good. Midway through the third quarter Scooter Reed went for 84 yards for another Gopher TD. The Raiders countered with a one-yard run by Sandone to make the score 21-20, Grand Prairie.

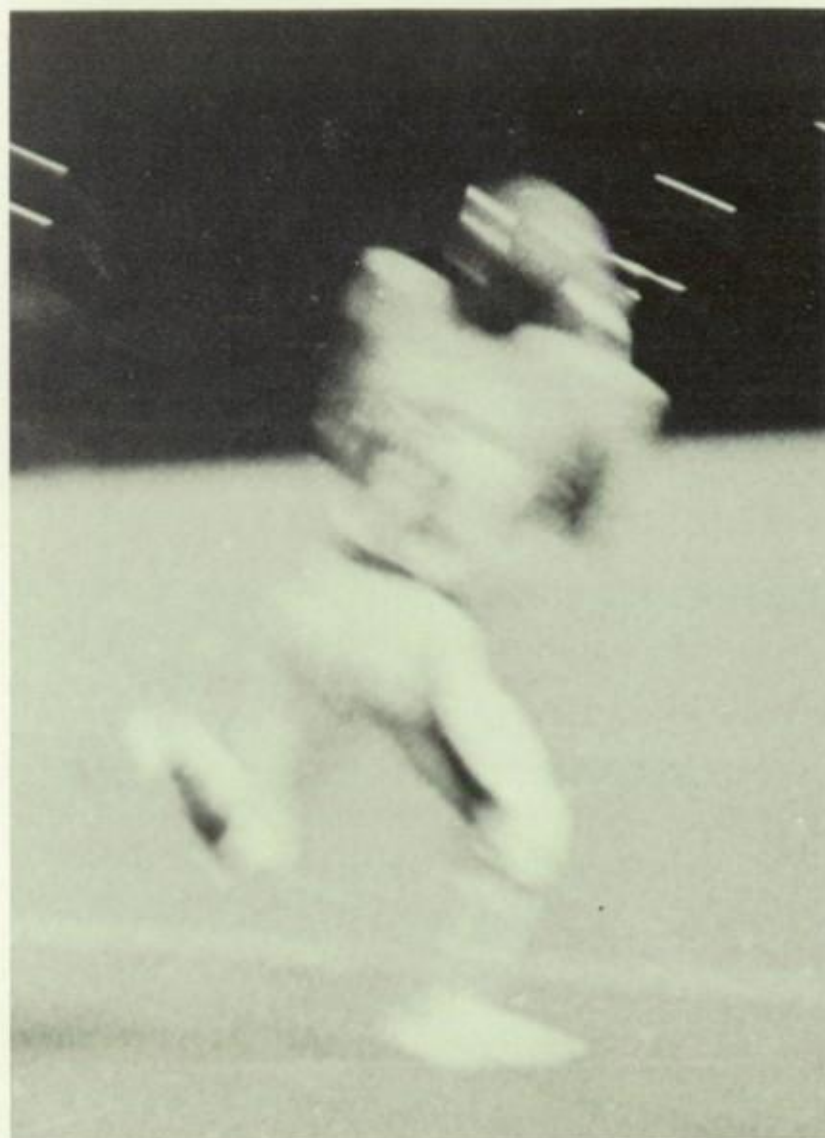

Skyline drew the final blood with a short pass from Jennings to Miller for a touchdown. The try for 2 was successful and that made the final score Skyline 28 Grand Prairie 21.

Turnovers Top TJ, 27-0

Yes, Virginia, the Skyline mascot is still a Raider, but one should give credit where credit is due. During the second quarter of the TJ game, both teams were plagued by fumbles.

Skyline finally converted one of the Patriots' miscues into a touchdown to take a 6 to 0 halftime lead. After recovering another TJ fumble in the third quarter the Raiders marched down the field to score again and make it 13-0. On their next possession TJ fumbled again, and Skyline got 7 more points as a result, thus making the score 20-0 in favor of the Raiders.

TJ's last fumble came in the fourth quarter. Once again, Skyline pushed across for a touchdown to make the final score, Raiders 27, Patriots 0.

Panthers Swim Past Raiders

A "plain vanilla" attack by Hillcrest, and a driving rainstorm combined to give the Panthers a 13-6 win over Skyline.

The game started out as a defensive battle as both teams exchanged the ball. In the second quarter the Panthers got things going as Don Farris carried it over from the 19 to put the first claw marks on the Raiders. The Raiders were not to be denied though. In the hardest rain of the night, Skyline used the running of Jim Jennings and Steve Hollywood to drive 67 yards and tie the score at 6-6.

Skyline looked like they would pick up where they left off. The Raiders drove to the Panther one, only to fumble. Hillcrest pounced on the loose ball. The final claw marks inflicted by the Panthers came in the closing moments of the third period with a 1-yard run by Don Farris.

The fourth quarter was won by the rain, but of more importance the Raiders suffered a setback in their quest of another district title.

White Edges Skyline In Crucial Game

Had it not been for one mistake in the waning minutes, Skyline may have been 2-1 instead of 1-2 in district play. The Longhorns kicked a field goal to down the Raiders 10-7, and emerge as the number one challenger to Spruce.

Offensively, Skyline dominated the game outgaining White 369-217. Jennings struck on a quarterback dive to give the Raiders a 7-0 halftime lead.

In the second half, the Longhorns rallied to strike for 10 points. The touchdown came on a 64-yard pass, and then after a White interception of a Skyline pass, the Horns kicked the field goal that made the difference.

Skyline was not through. With about 5 minutes left in the game the Raiders drove to the one, but to no avail. White recovered a Raider fumble, thus ending the Raiders' hopes for another District Championship.

Apaches Massacre Raiders

Spruce took a giant step forward in their quest for a district championship, by topping defending champion, Skyline, 31-0.

Things were not intended for Skyline this night as they committed eight turnovers which Spruce turned to good advantage. The Spruce defense set up three of the five Apache touchdowns.

The touchdowns came on runs of 31, 1, 1 yards and a 9-yard pass. The backs that did the most damage were Frederick Turner, Kenny Pizzoro, and the pass from Joe Wright to Kenneth Dickerson.

There was little good for Skyline, except for an interception late in the game. It even looked like the Raiders might score and avert a shutout, but alas the clock ran out, thus preserving the Apaches' 31-0 victory.

Miles Achieves #200

It was the second Skyline Homecoming, and the Raiders brought home a 28-2 victory as well as win number 200 for Head Coach Theo "Cotton" Miles.

Unlike the week before when everything went wrong for Skyline, every thing went right. A well-balanced offense that amassed 264 yards of total offense, and a defense that came up with 7 turnovers led the way in the victory over the Spartans.

Skyline scored first when Jennings threw a 14-yard pass to Hughes. Sandone ran for a two-point conversion. In the second quarter Skyline really got things going. Billy McBee connected on two short range field goals, and the Raiders were obviously in command. Right before the half, Sandone scored a touchdown from 7 yards out. The extra-point was good and at the half Skyline led 28-0.

The third quarter was uneventful, but Chuck Walton set up the final Raider touchdown with a fumble recovery. Jennings scored a few plays later on an 8-yard run, and the extra-point sealed a 28-2 Skyline victory.

Raiders Cage Tigers

The Lincoln Tigers found themselves trapped in a cage surrounded by Raiders, as Skyline cruised to a 14-6 victory.

It was a cold and windy night; and for awhile things looked cold and windy for the Raiders. Lincoln scored first on a 56 yard return of an intercepted lateral. The extra point attempt went awry, and Lincoln owned the scoreboard 6-0.

Skyline came back to make the second quarter their finest hour. First, Jennings scored on a short run, and McBee's extra point gave the Raiders a narrow 7-6 lead. Then after an intercepted pass Skyline moved deep into Tiger territory, but the drive stalled. Enter Razzle-Dazzle Thompson who jumped up from the holder's position and fired a touchdown pass to Mike Sandone. The half ended Skyline 14, Lincoln 6.

The second half was marred by mistakes, stalled drives, and tough defense. When the final gun sounded the Raiders had successfully tamed the Tigers, and rose above the .500 mark for the season.

Raiders Claw Cougars

A combination of defense, trick plays, and a little luck enabled Skyline to down Bryan Adams 14-7, and close the season on a winning note. Earlier in the week, a prelude for victory had been set as the Junior Varsity and "B" teams won their games.

The scoring started in the second quarter after an interception by Mike Hughes. Skyline then pulled the old Aggie play, and it worked like a charm, as Bohne tossed a TD pass to Tom Miller. Later in the same quarter the Raiders started a drive from their own 33. 67 yards later Mark Thompson ran into the end zone to give Skyline a 14-0 halftime lead.

Bryan Adams came roaring back in the third quarter blocking a Raider punt and running it over for six points. The extra point narrowed Skyline's lead to 14-7. Twice in the final stanza B.A. came knocking on the touchdown door, but the Raider defense rallied to the occasion and shut down the Cougars both times.

It was a good way to end a surprising 6-4-0 season and a third-place finish in District 11-AAAA.

Student Life

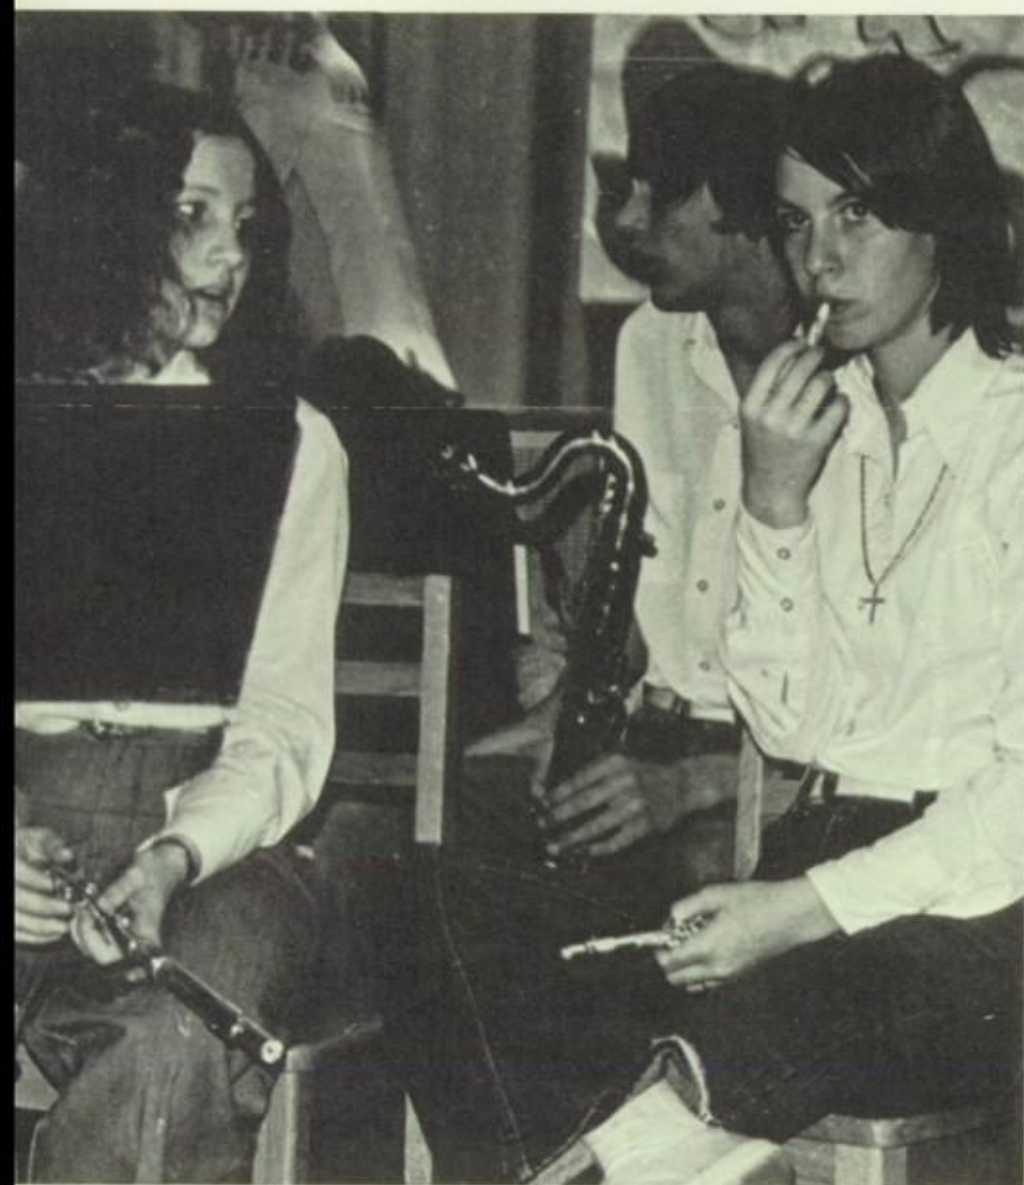

Fall Finds Raiders Active

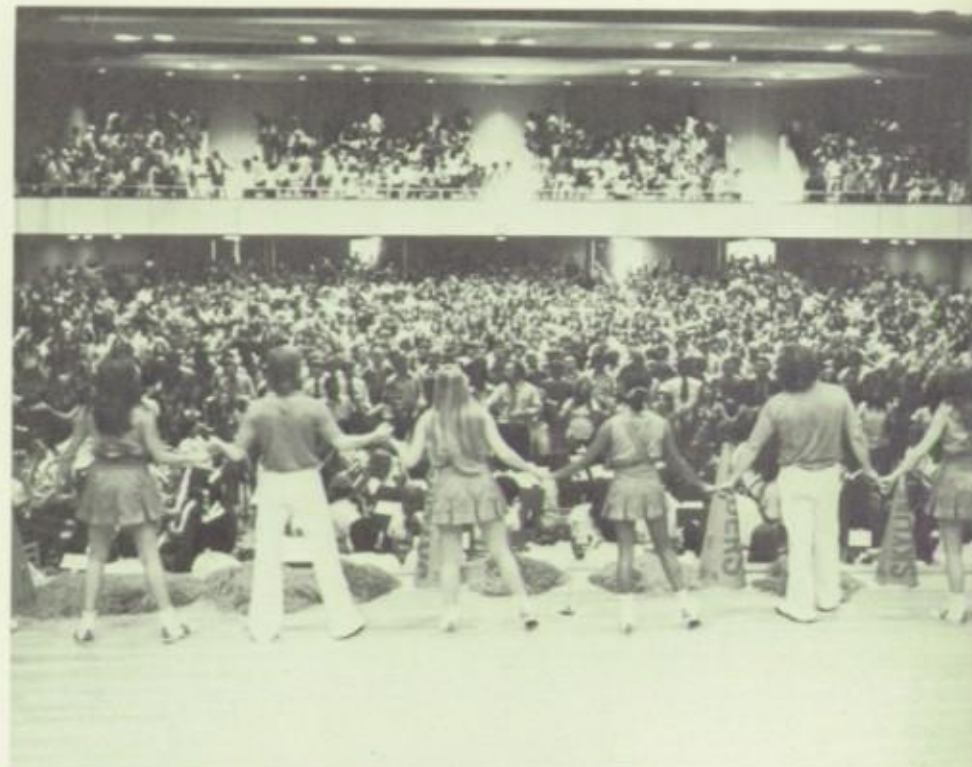

The fall semester of the 73-74 school term was filled with activities. Open House, the State Fair, schedule changes, and the familiar routine of classes filled the fleeting days of the fall term.

***Pep Assemblies
Raise Spirit***

The cheerleaders promoted pride and unity as well as spirit in the weekly football pep assemblies. Students chanted, yelled, clapped and laughed to show their support for the Raider team. And every loyal student felt a tingle as the entire audience united in the singing of the alma mater.

Sophomore Becky Adams admires Junior members!

Looking for something, Judy?

Silhouettes

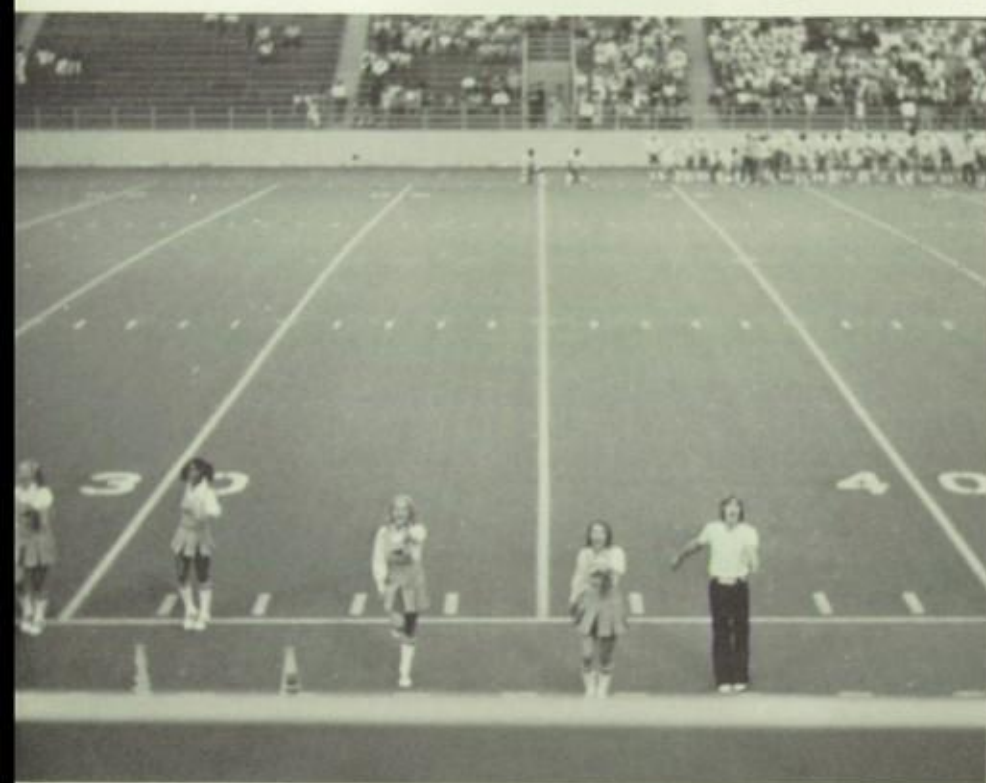

The Silhouette Life can really get to you!

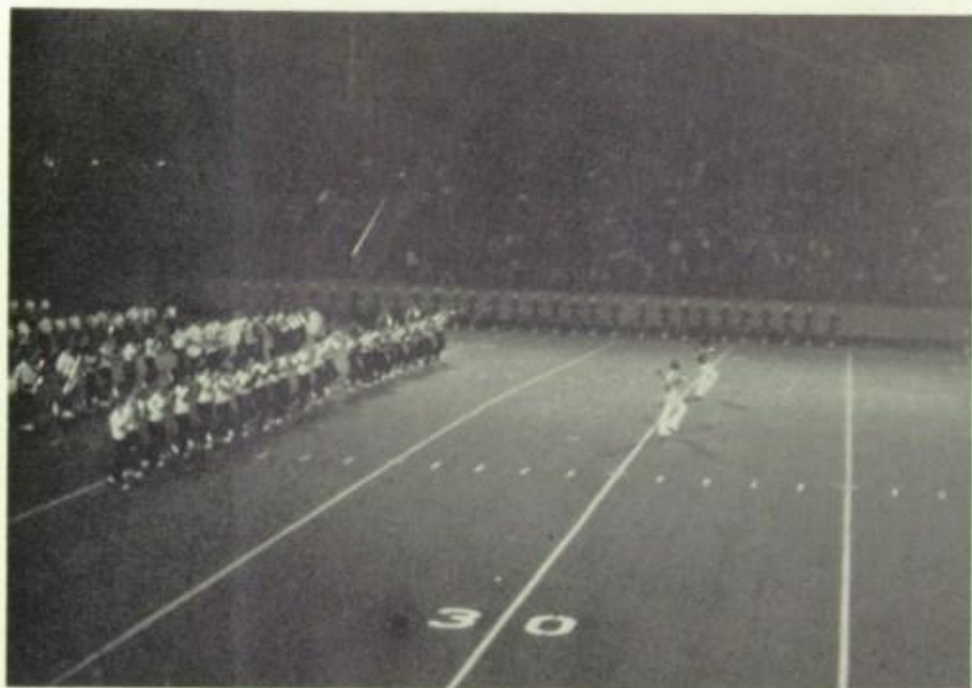

This a new form of attention, Johnnie?

*Football Season
Features Pageantry*

The pageantry and excitement of football season attracted many fans to the games. The combination of the Raider Marching Band, the Silhouettes, and the cheering fans urged the football players to a successful season.

The annual Military Ball was held December 14 at the Adolphus. Cadets and their dates danced and honored Sharon Fuller as the 1974 Military Ball Queen. The Homecoming Dance was concluded at midnight with the crowning of Delores Richardson as queen.

Homecoming and Military Ball Highlight Queens

My, what sexy legs!

Spanish Club

Exciting game?
(for those who
play!)

Spanish Club enjoys picnic.

How do I love thee?

Skyline's "# 1 Spanish" volleyball team!

On guard!

Spanish students step on las cucarachas.

Jack Mounts comes back to life.

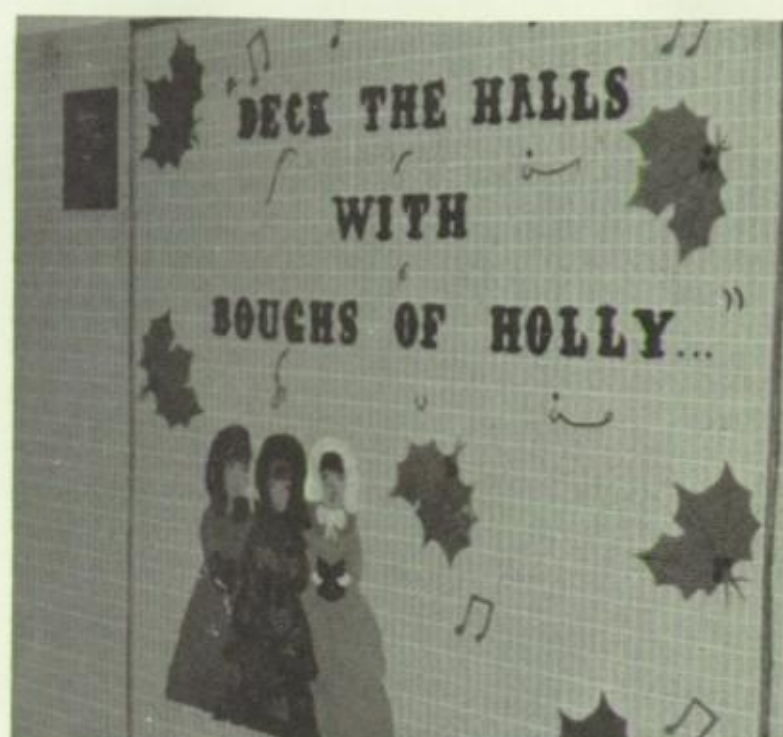

Spanish cluster and their puppets say, "¡Hola!"

Mighty Raider wins again.

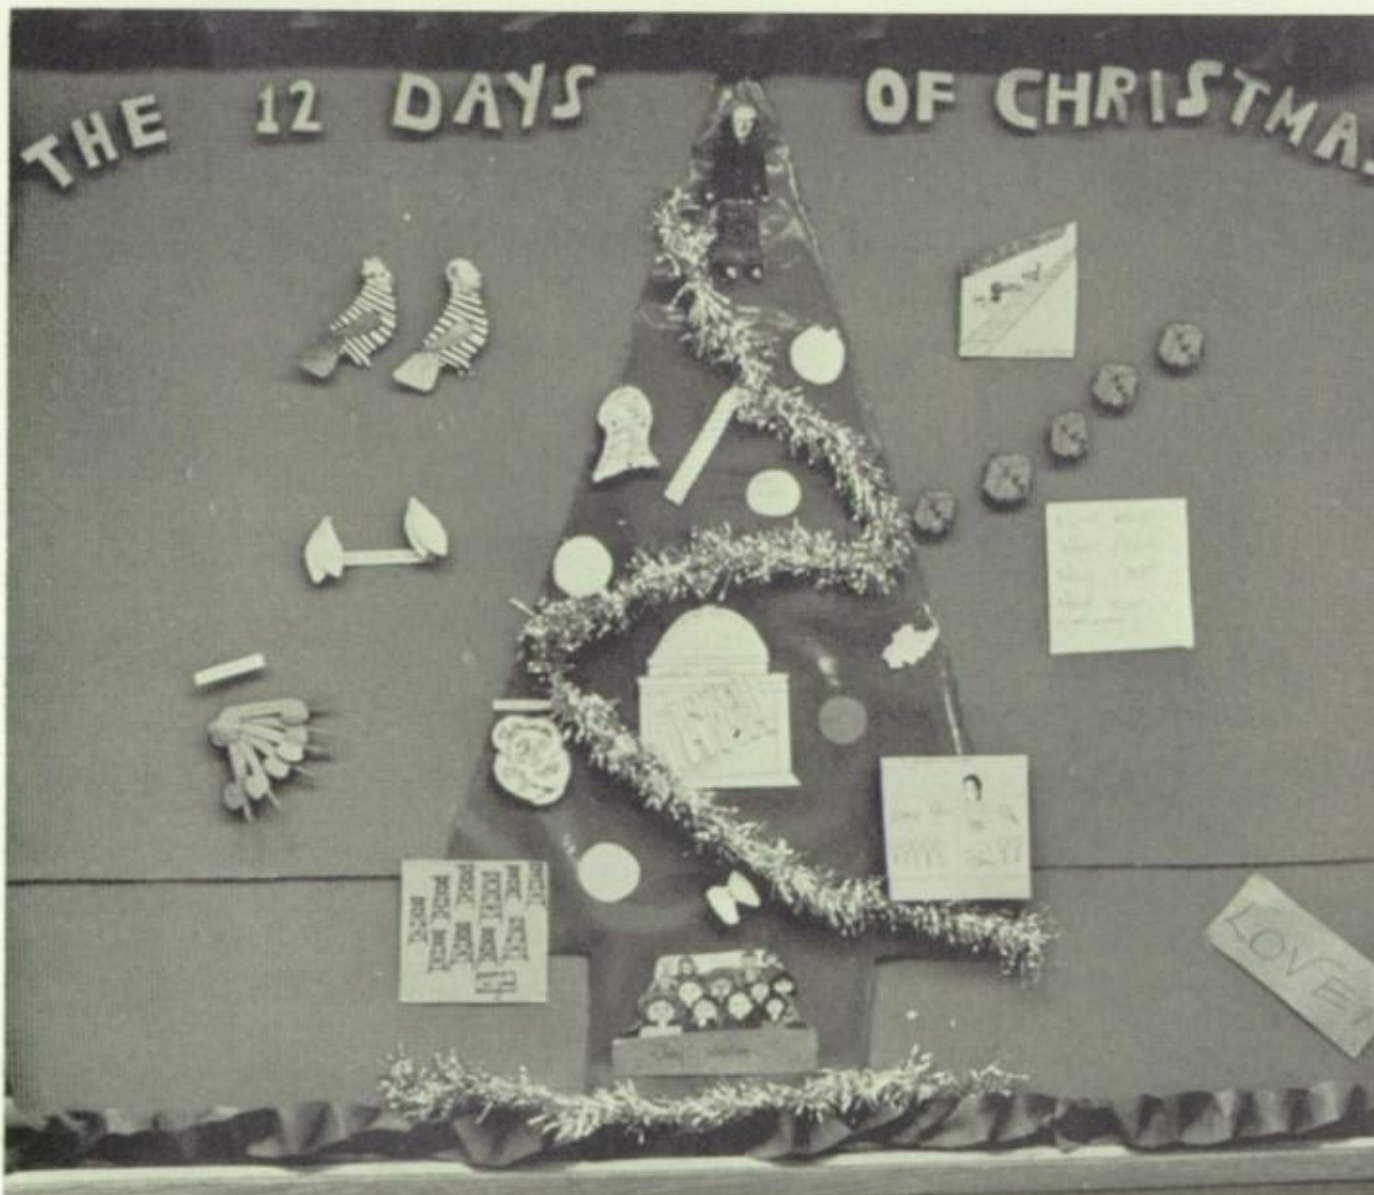

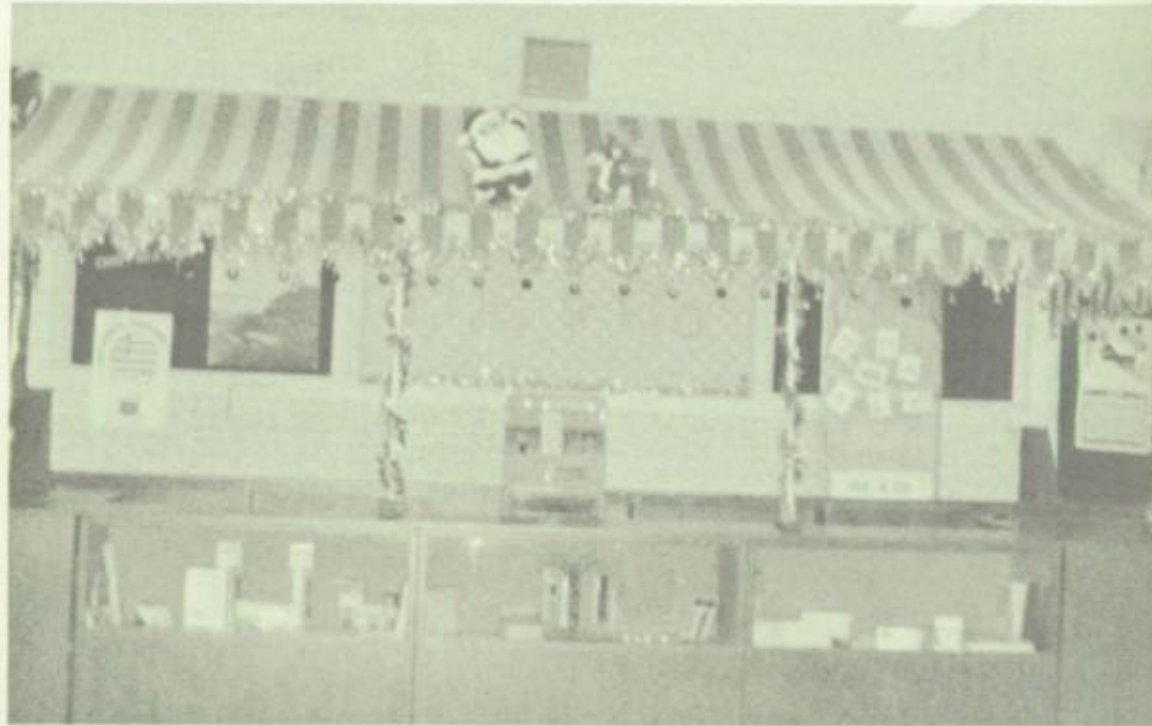

Skyline students and faculty celebrated the holiday season with a door decorating contest, a music assembly, and classroom parties. A special glow of peace and good will was felt by students after a choral presentation by the students of the deaf education cluster.

Christmas Season Fosters Goodwill

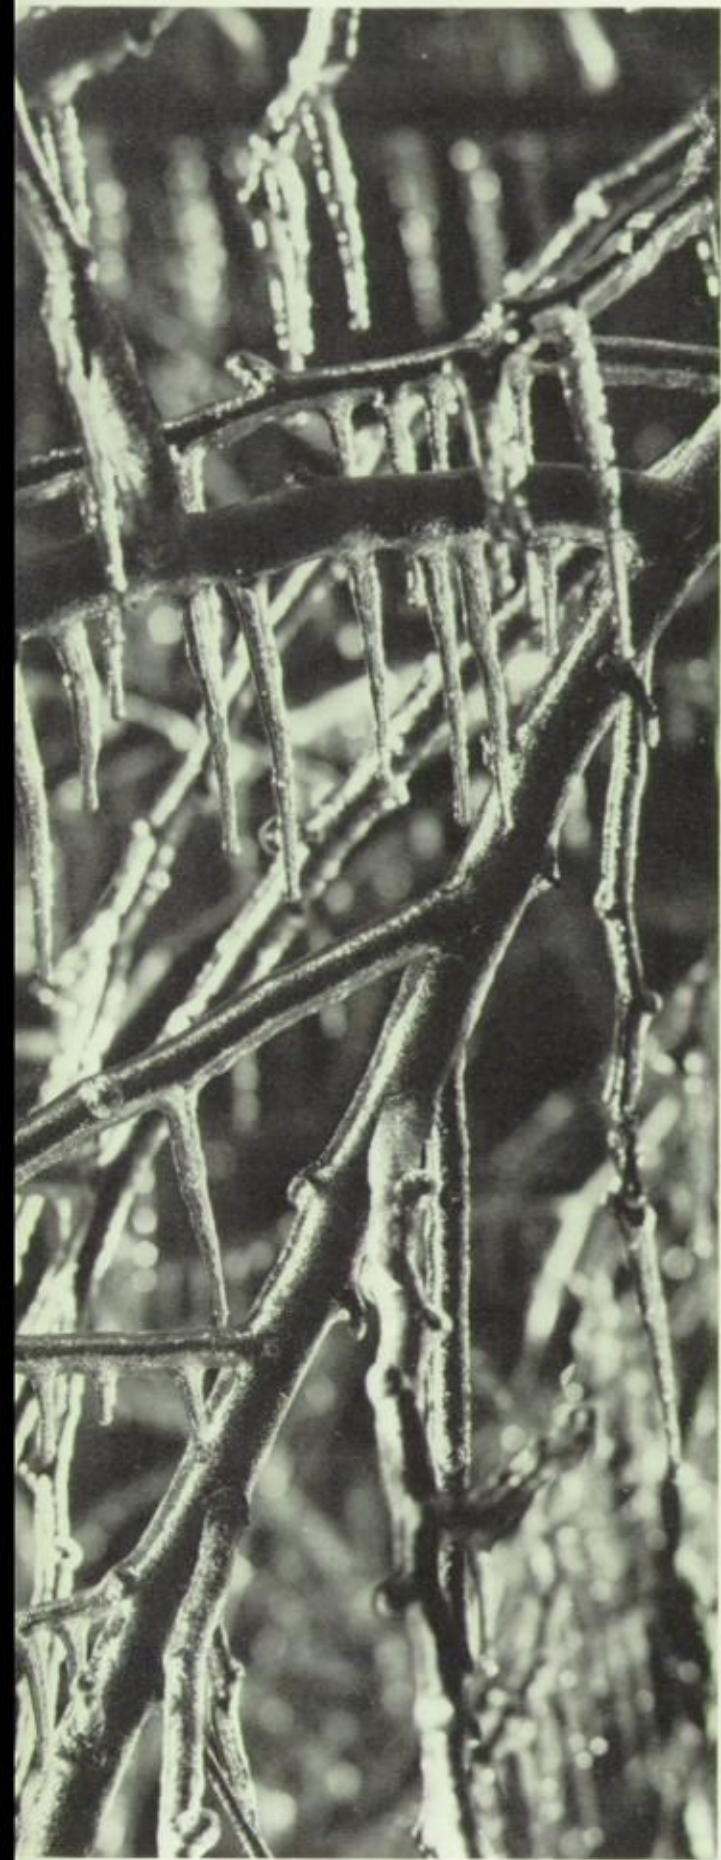

Jack Frost Follows Christmas

The Christmas vacation ended, the decorations were taken down, and students returned to a chilly new year. A rare ice storm turned the Skyline neighborhood into a winter wonderland. Nearby Tennison Park became a paradise of shimmering icicles for some runaway ponies.

Icicles Chill Air

German Club Emphasizes Participation

Folk dancing is a contact sport.

OK! Who forgot the Right Guard?

Who's the leader of the club that's made for you and me?

German Club

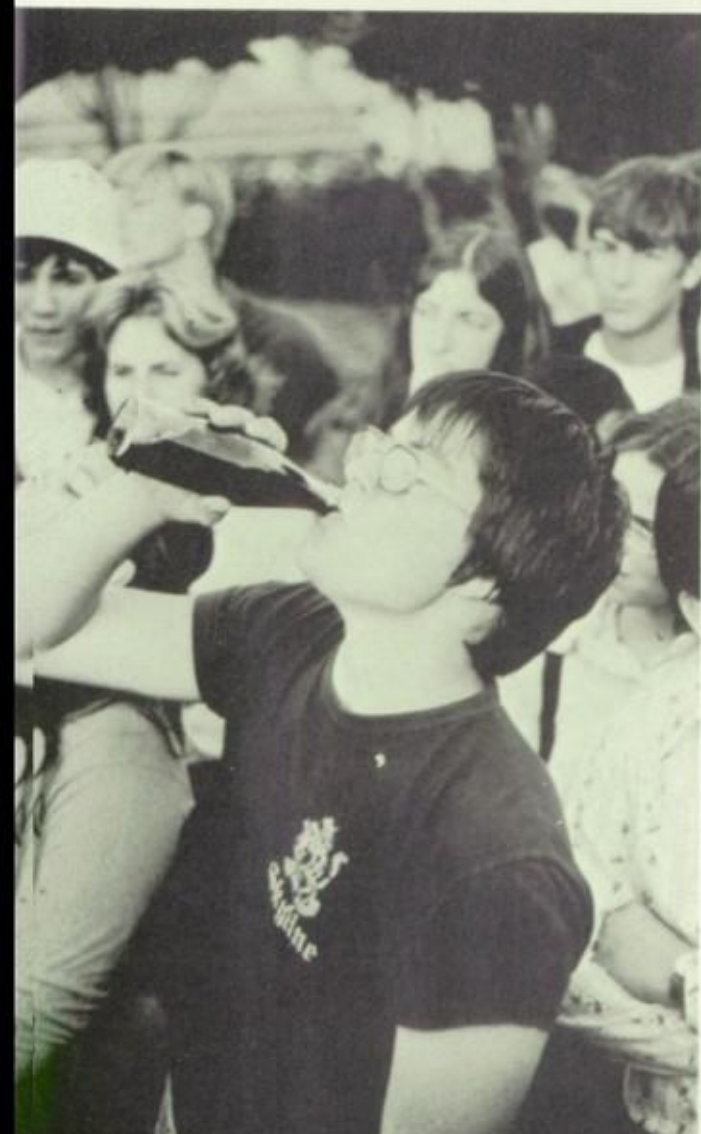

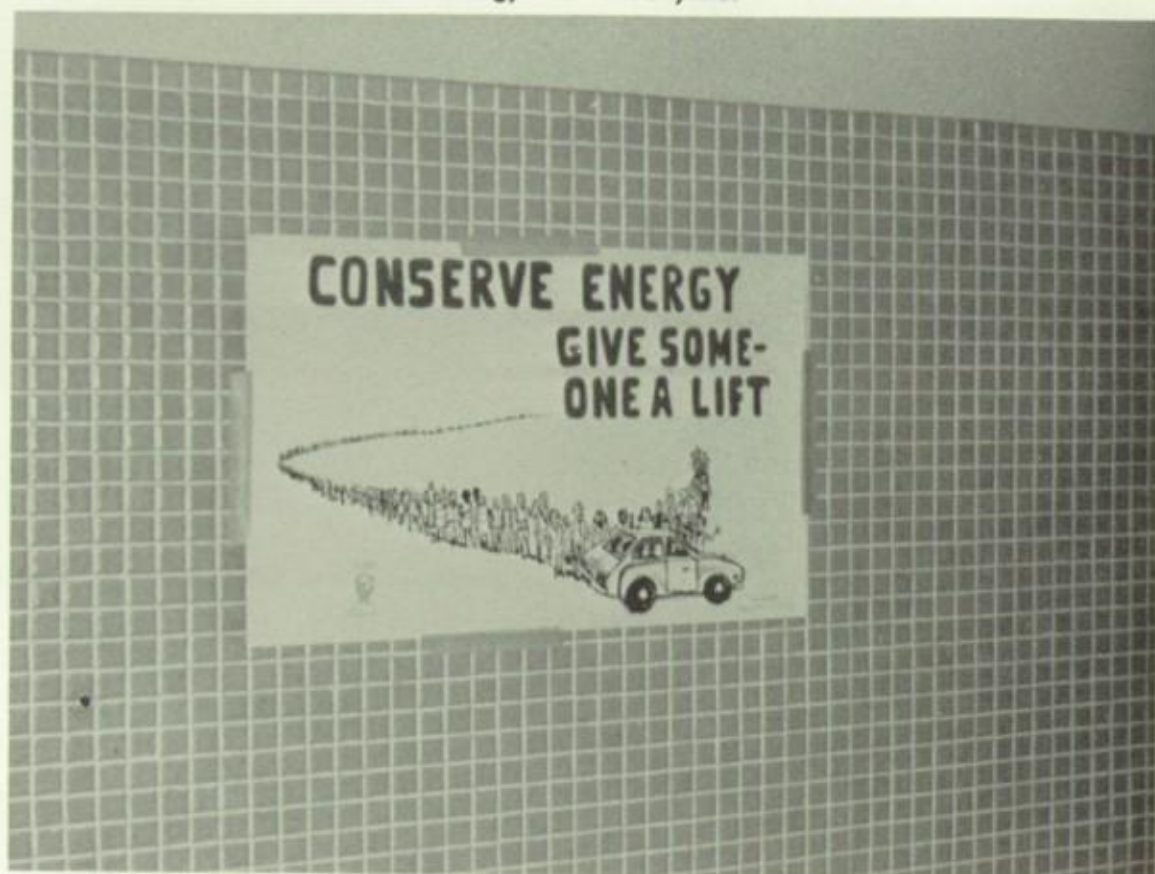

We shall overcome!

If they don't take this picture soon, I think I'm gonna wet my pants.

Energy Crisis hits Skyline!

Acting up in the library, Miss Wright?

Don't cry Louis!

"Sorry, Tommie. No Tabs today."

Oh my! What has Louis done now?!

BLACK HISTORY WEEK

Dr. Carter G. Woodson was a man who firmly believed that the achievements of the Negro, properly set forth, will crown him as a factor in early progress and a maker of modern civilization. Dr. Woodson initiated Negro History Week in 1926 and selected the period in February that encompassed the birthdays of famed abolitionist, orator and civil rights leader Frederick Douglass, Feb. 14, and Abraham Lincoln, Feb. 12, also the day of the founding of the NAACP in 1909.

The Black History Week national theme for this year was "Helping America Understand." All the activities highlighted the Afro-American's concerted efforts to maintain and develop the American dream: life, liberty, and the pursuit of happiness!

Black History Week should be a week when all Americans take time out and look at the achievements and contributions of a large minority group.

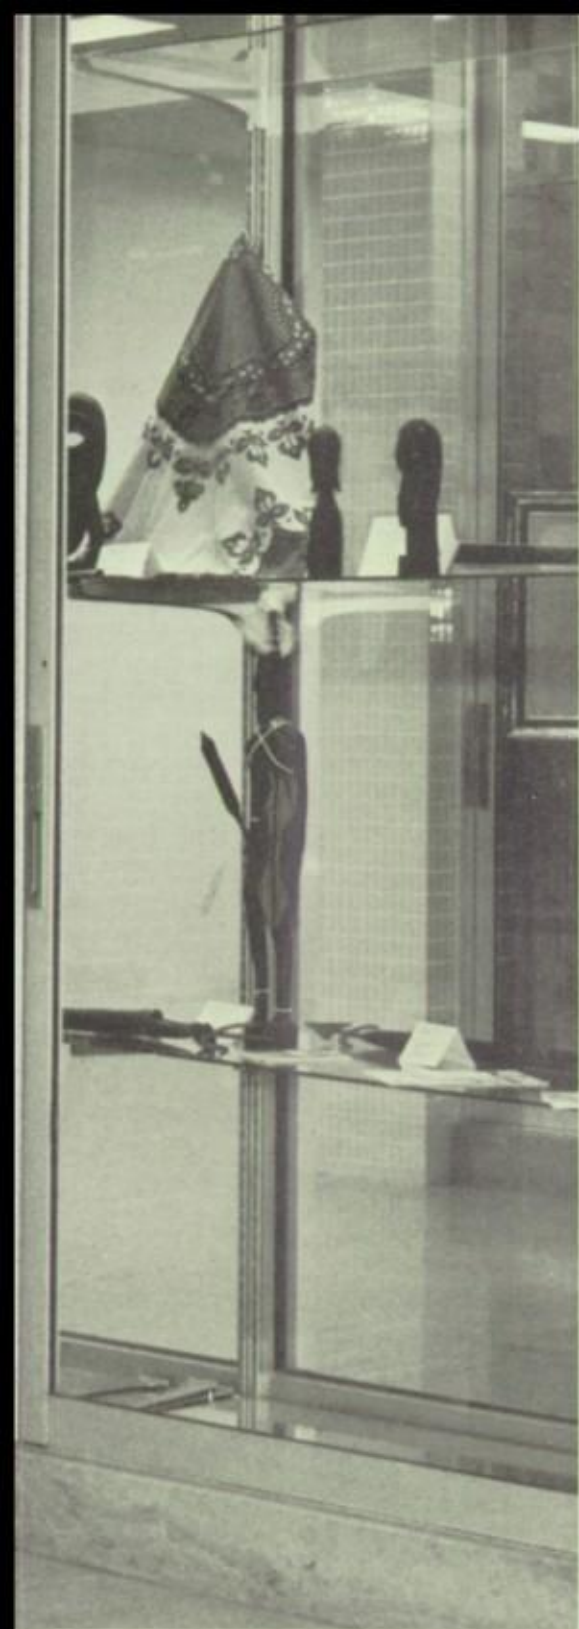

Black History Week at Skyline was a tremendous success this year. The complete student body of Skyline contributed to making Black History Week a week to remember.

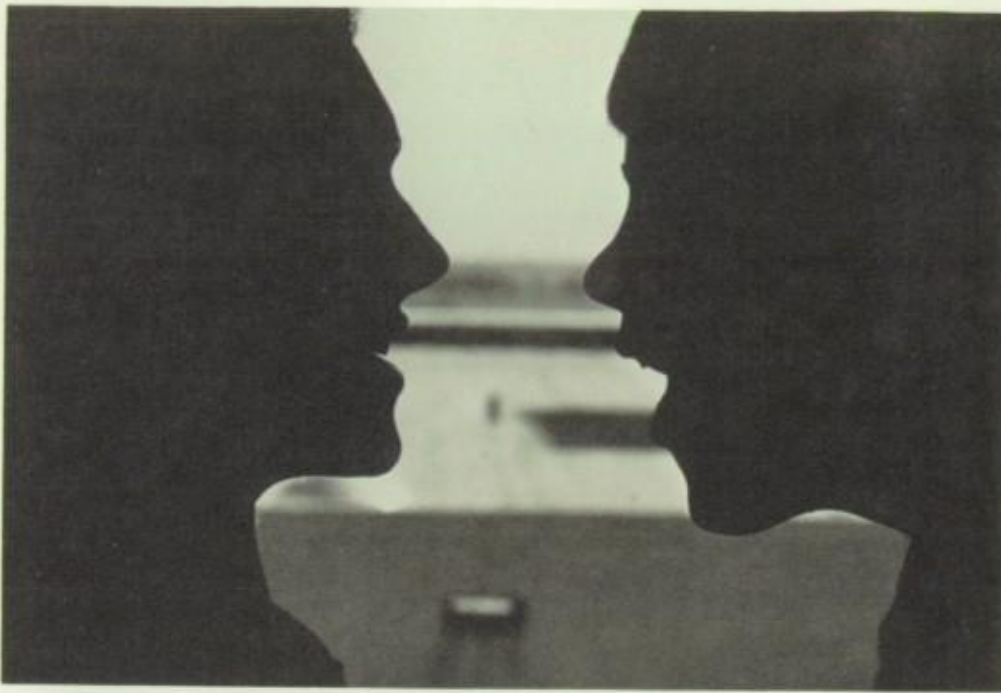

***Assembly, Fashion Show, Displays
Reflect Black Heritage***

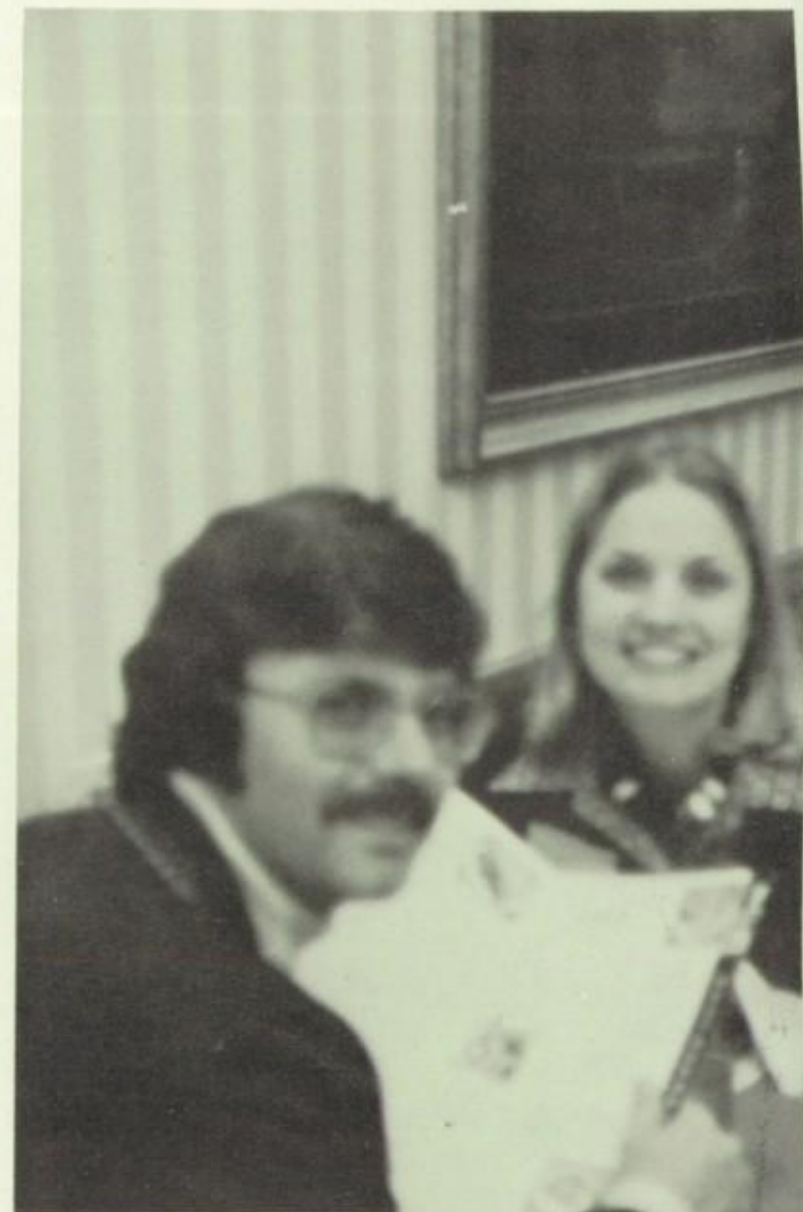

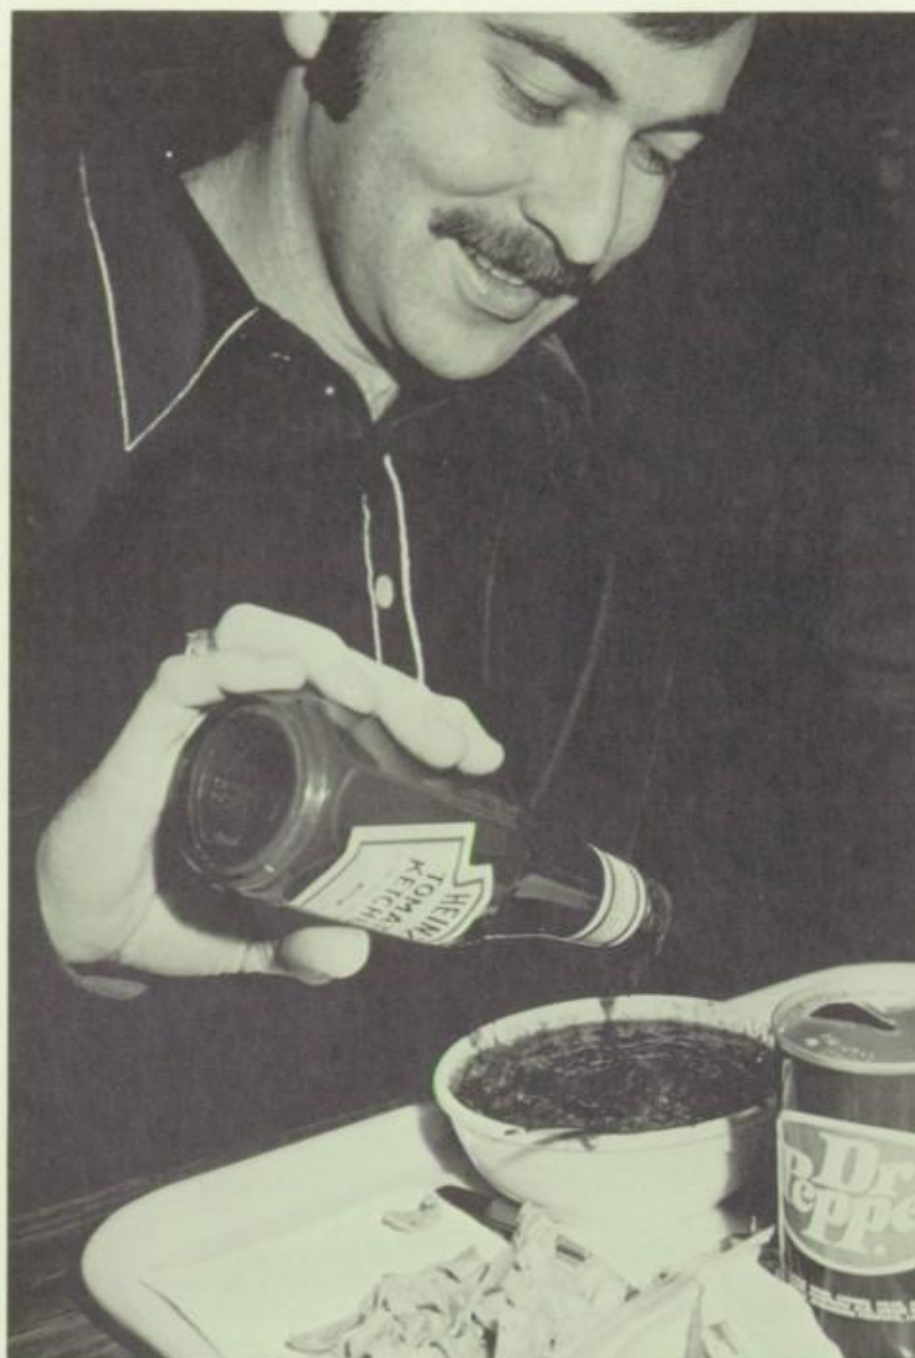

Members of the National Forensic League traveled to the University of Arkansas for a speech and debate tournament. This was their longest trip but not their only successful one. The students filled the Skyline trophy cases with evidence of their talent and ability.

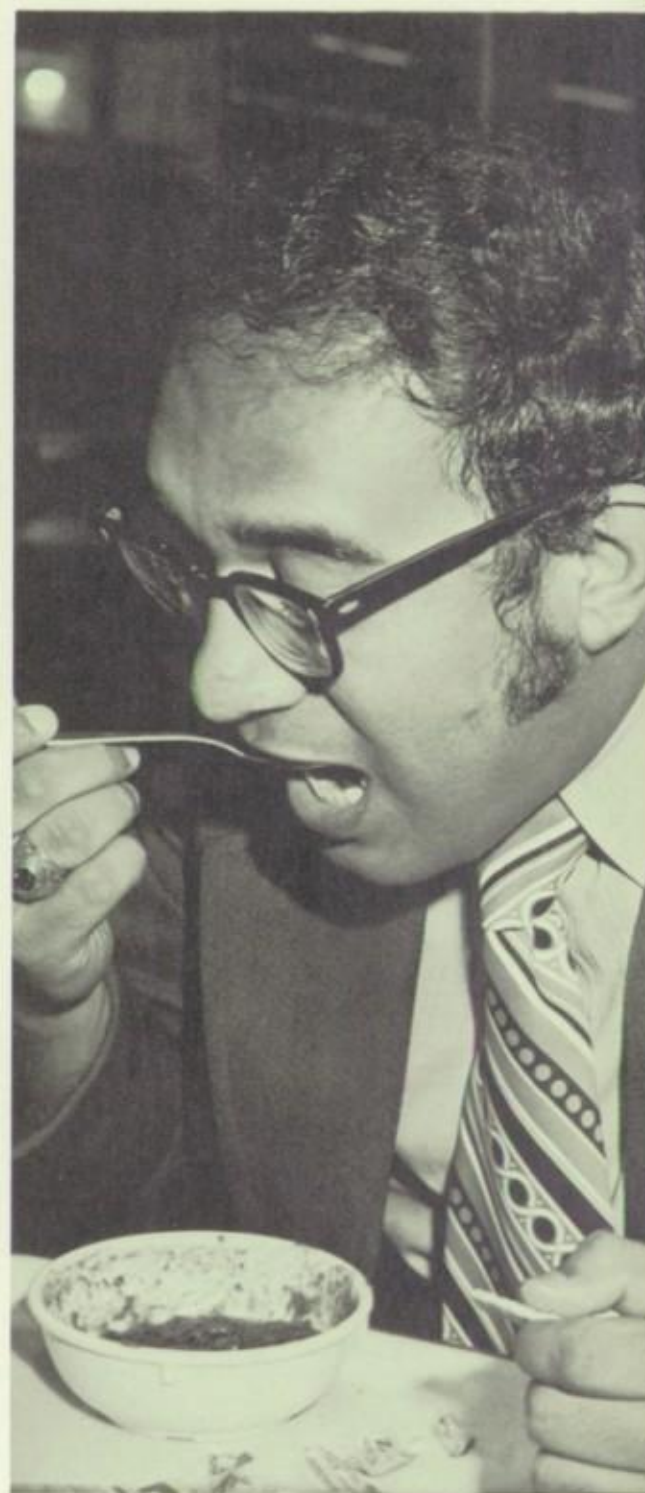

NFL Travels To Arkansas

Chili Supper

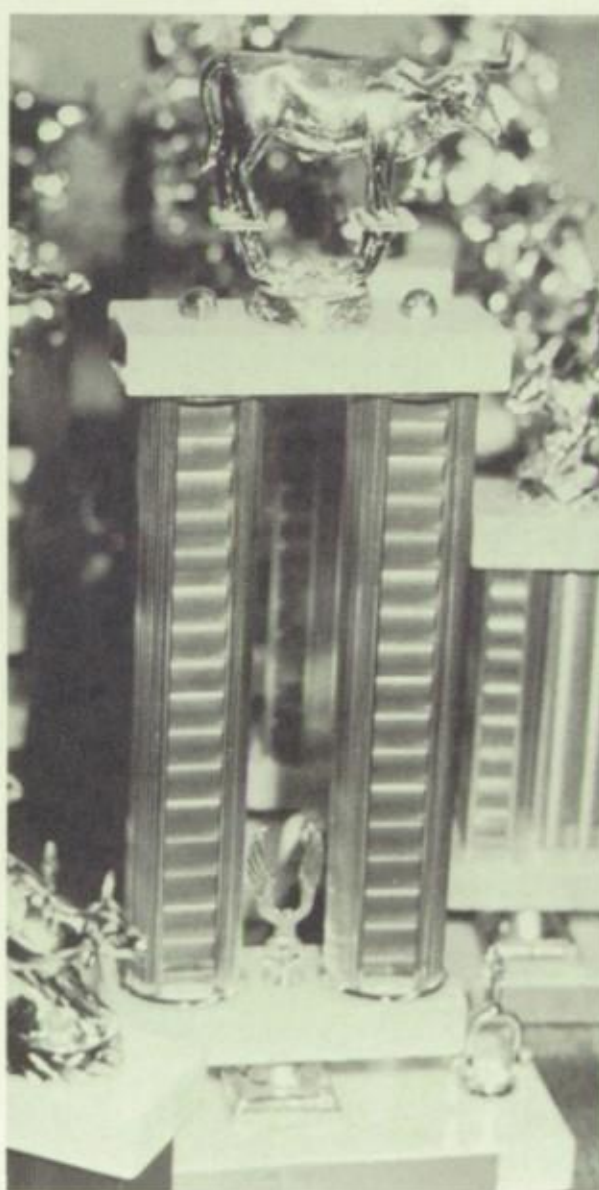

Hot steaming bowls of Skyline chili filled empty stomachs at the Booster Club supper. For only a buck and a half, eager eaters could feast on chili, crackers, chips, homemade cake, and soft drinks. Profits from the supper were used to support the athletic program.

*Skyline Students
Go Western*

The Skyline Rodeo Club sponsored its first rodeo Feb. 15 and 16. Under the direction of Mrs. Mary Banks and Mrs. Billie Phillips, the rodeo club members organized events ranging from chute dogging to bull riding. Students from the greater Dallas-Fort Worth area participated in the rodeo.

Fabulous Faculty Challenges Students

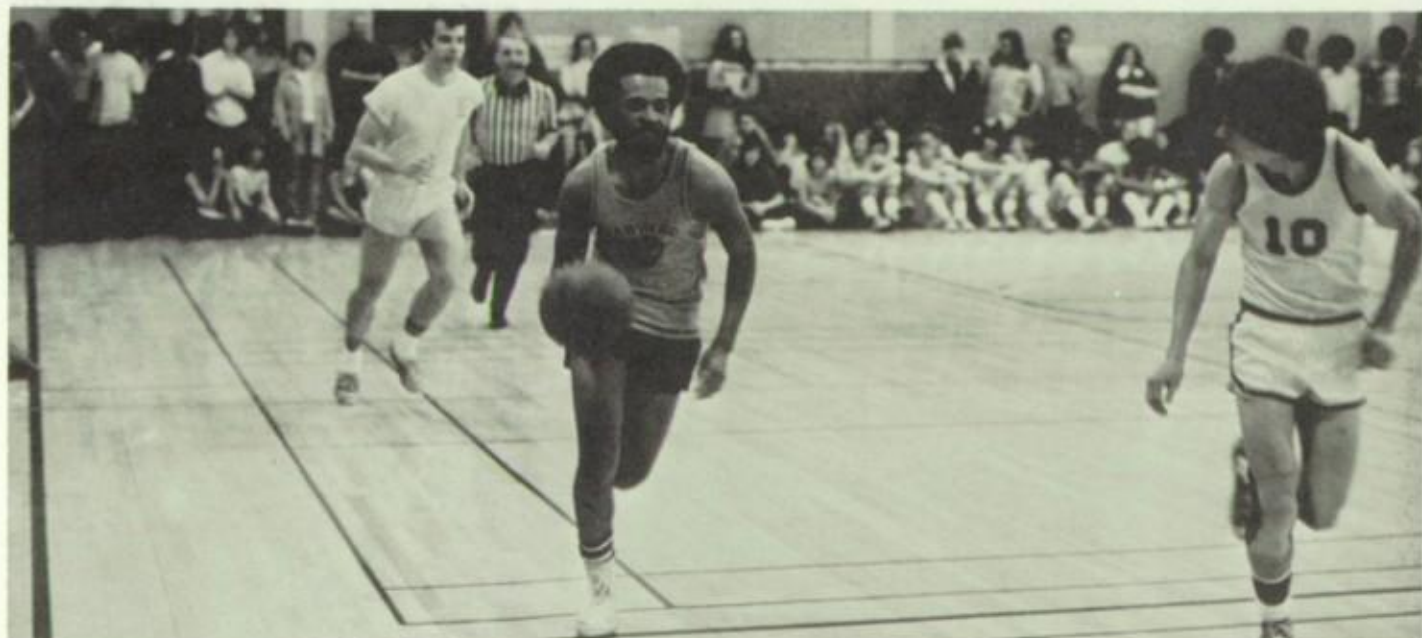

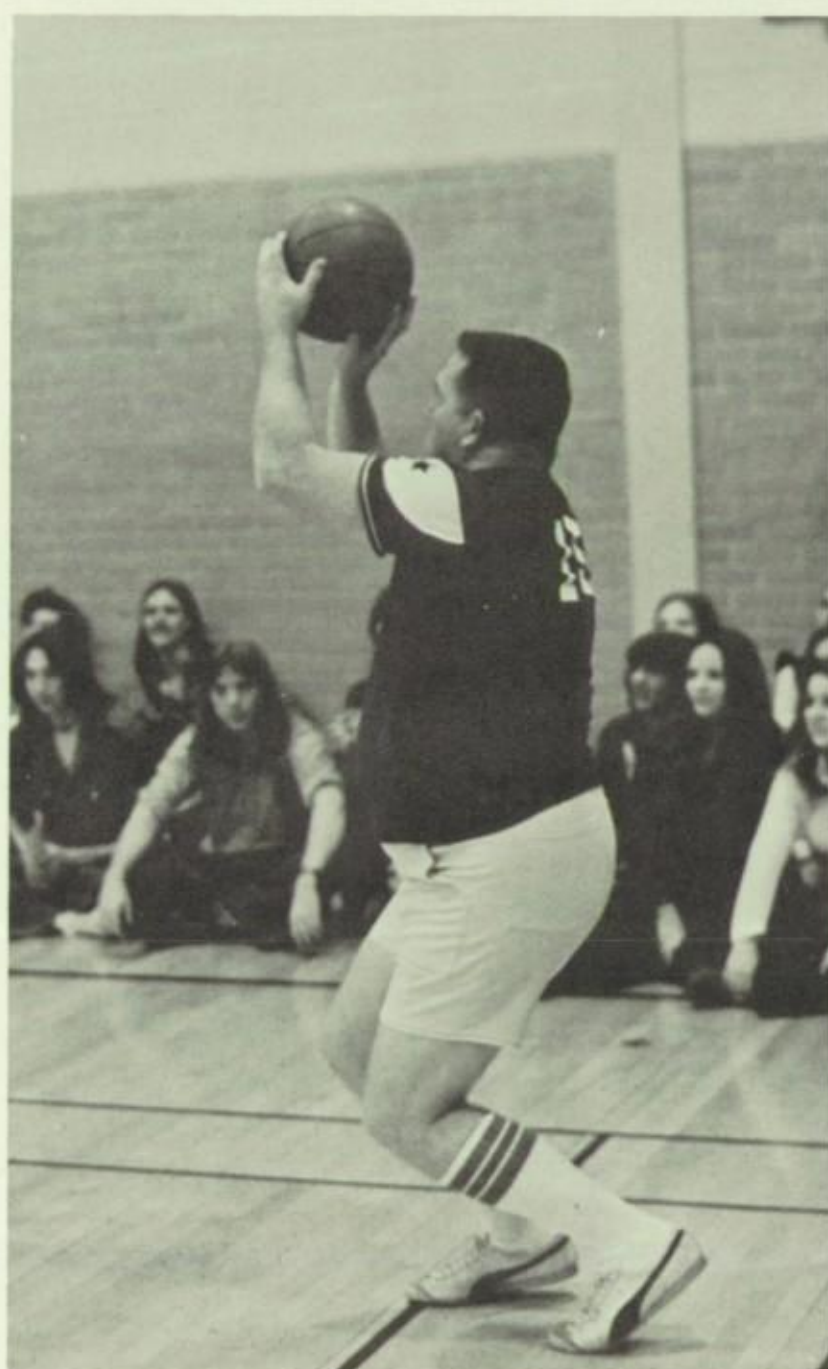

On Wednesday Feb. 20, The Geritol Gang played the Varsity Basketball team a hardfighting, losing game. "Meadowlark" Miles, "Double Bubble" Lewis and "Terrible Tom" Edison were very outstanding old men for the Geritol.

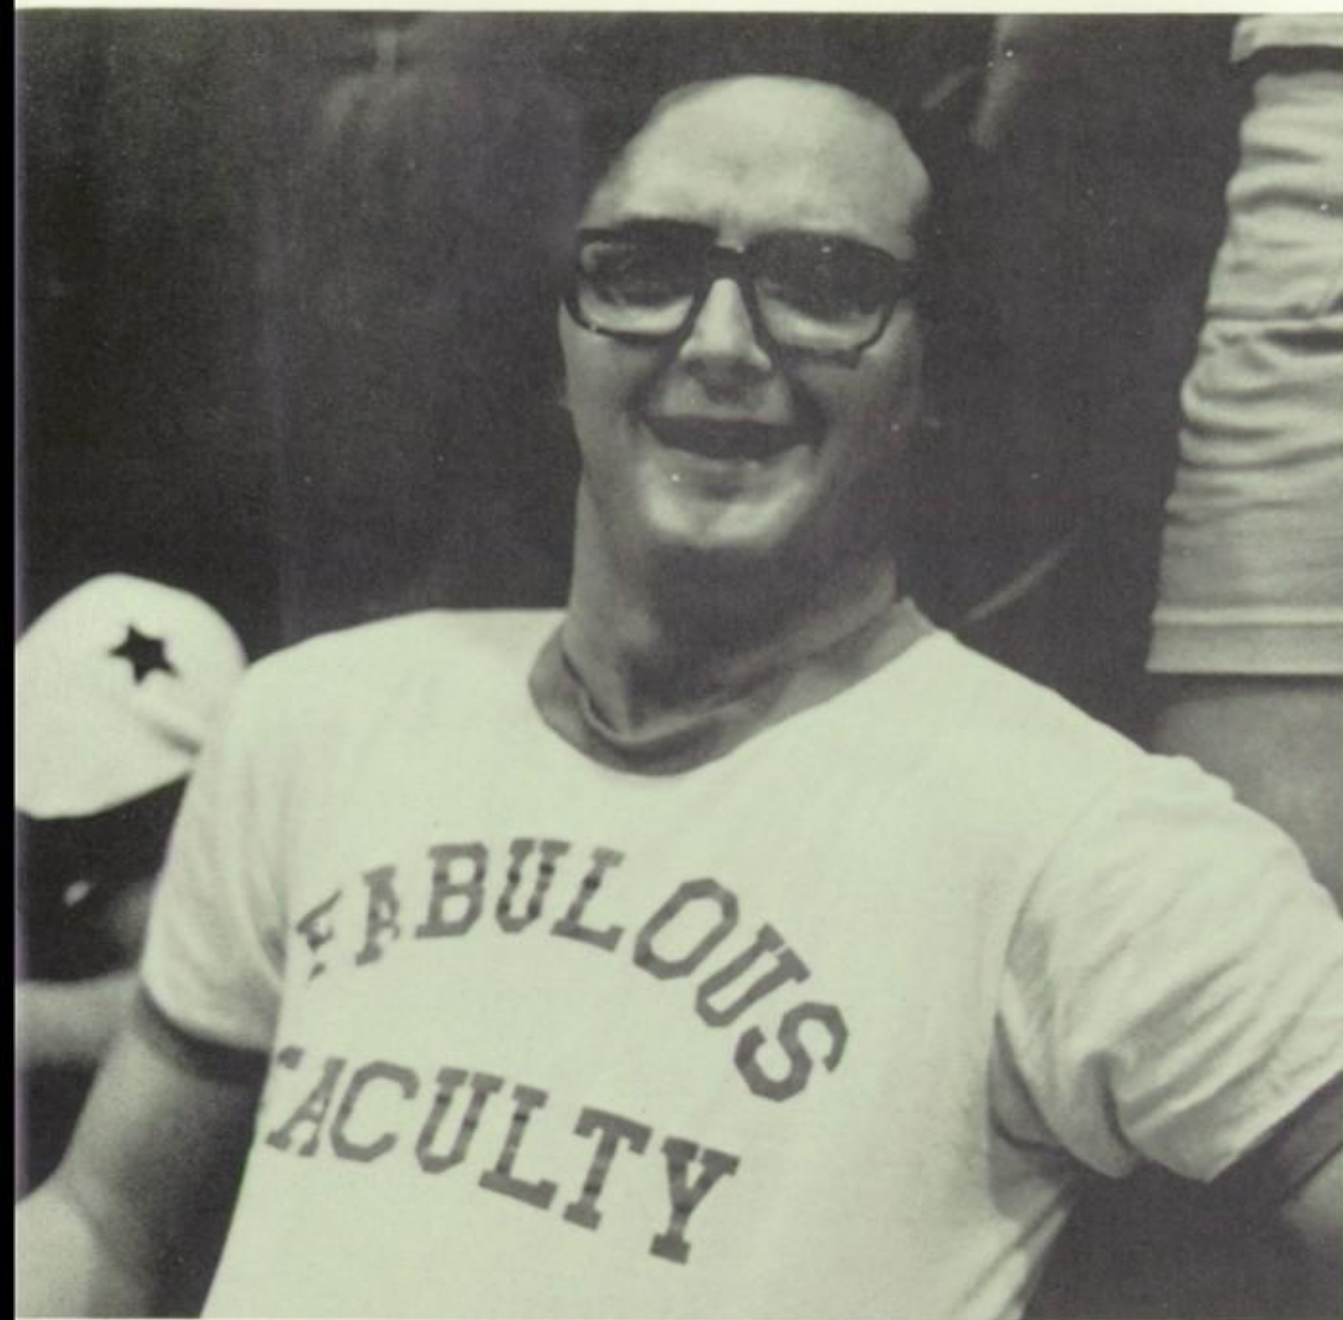

During the 2nd period of play, "Goosy" Guzick as drum major entered leading his band composed of "Flamboyant" Flores, "Bear" Barton and "Skinny" Schermerhorn.

The half time entertainment was done by Ms. Atwood and her dainty girl's team.

There is a sad part to life which all living things must face. It is time for us to face ours. Life is continually ending.

To the Silhouettes of 73-74:

Thanks for all your hard work and dedication. This year has really been the best. You've given the name Silhouettes something that won't ever be forgotten; you've given it something that other schools have respect for. Together we can say that we really had "pride and unity." Let's hope that all the other future Silhouettes will remember that we were the *best* and hope they try to be better!

Y'all have just got to be the best drill team ever! Each of you means so much to me! Thanks for all the good times — I'll never forget y'all!

Love,
Debbie

Thanks for making my Senior year the best. I will always remember each of you and the good times we've had together!

Love,
Shannon

What makes Joe L. Pearce an outstanding State Farm agent?

1. . . . a little neighborly attention
2. . . . some fast, efficient service
3. . . . and a lot of good State Farm policyholders

JOE L. PEARCE INSURANCE

To Gena

Because I love Her,

From Don

People so seldom say I Love you . . .
And then it's too late . . .

OR LOVE GOES . . .

So when I tell you I love you
It doesn't mean I know you'll
never go, only that
I wish you didn't have to.

— J. Greene

Congratulations Seniors

In remembrance to the Senior boys we, the Senior women, for the year 1974, leave to the Junior girls the Sophomore men.

It's Been Good Lookin' At You
This Year

We're Lookin' Forward To Lookin' At You Again Soon

Thanks

THE PICTURE MAN

3023 Routh St. 744-3446

The difference in Army schooling.

Army schooling and civilian schooling will prepare you for a meaningful career. But there is an important difference between the two kinds of schooling. In many cases, civilian education concentrates on theory with little practical application. On the other hand, the Army, while strong on theory, lets you apply that theory in actual, practical workaday problems. You learn by doing . . . by putting book theory to work.

There is another facet of Army schooling that shouldn't be overlooked. Since Army schools teach you the most modern techniques and methods used in American business and industry, civilian executives and personnel directors place high value on the Army-trained man. Therefore, if you decide later on a civilian career, you'll take with you assets that will command respect from prospective employers.

Will you like Army life?

You'll like the Army if you are the sort of guy who likes a challenge and who likes to do his best at anything he takes up. For the Army is no place for a person who does just enough to get by and no more. Army life is demanding, the training tough. It calls for the very best you have, and, most of the time, it demands a little extra.

To measure up to what the Army expects of you, you must have the ability to learn new skills . . . assume leadership responsibilities . . . and above all, exhibit a deep-seated dedication to your work and to your Country. But you'll find that the Army returns a lot in kind. Training that gives you a solid foundation for a life's work. Travel — to the degree that few civilians ever have. A chance to participate in news-making events of the day. Opportunities to get to know yourself and your capabilities. Time to build strength in both mind and body . . . for recreation and friendship . . . and perhaps the most important of all, the opportunity to make a really worthwhile contribution to the security of your Country.
